2 operating modes (automatic, manual) with random length function.

No. 1UXR1—LED display and color-coded keypad. Dispenses premeasured lengths of tape from 1" to 39" and adjusts to accommodate 1" or 3" dia. core. Ideal for masking and strapping tapes.

MANUAL

No. 3EGL6—Automatically dispenses film-backed and paper tapes ½" to 4" lengths with each stroke.

No. 3FKN8—Pull-and-cut dispenser with multiple-roll capacity. Weighted design for stability on flat work surfaces. Dispenses film, paper, or filament tapes.

No. 4HY25—Coated steel frame, replaceable serrated blade, and rubber bottom prevent slipping. 2 mounting holes for securing to work surface. Dispenses 2"W nonreinforced tapes on 3" dia. core. Max. roll dia.: 5½".

No. 52JH82—Dispenses self adhesive tapes with a maximum width of 3", unlimited tape length.

No. 2A673—Ideal for frequent use. Dispenses 72-yd. rolls of tape. Rubber base holds dispenser firmly in place.

CENTRAL brand

Water-Activated Carton Sealing Tape

Tamper-evident, secure band tape works well in dusty and dirty environments. For all weather use.

No.
23M285

KRAFT PAPER

Designed for fast, permanent adhesion with superior strength. Cracking of the adhesive surface provides tape with excellent flexibility for sealing carton corners, edges, and irregular surfaces. Ideal for lightweight or standard-sized cartons shipped in unitized or full pallets.

FIBERGLASS-REINFORCED KRAFT PAPER

Provide consistent performance in carton sealing applications where durability, strength, and reliability are required. Extra-strong fiberglass yarns are bonded between high-tensile strength sheets for extra strength.

Water-Activated Tape Machines

ELECTRIC

- UL Listed; meets CE, CSA, C-UL standards
- 115V, 60Hz

No. 3TJH9

- Dispenses 45" per sec.
- 44-oz. water bottle

14 preset lengths dispense from 6" to 45" of reinforced or nonreinforced tapes up to 3"W. Random key allows custom length up to 120". Features safety interlock switch.

Nos. 1UXP4 and 1UXP5

- Dispense 45" per sec.
- 64-oz. water bottle

Hold up to 1000 ft. of 1½" to 3"W tape. Feature color-coded keypad with 14 preset lengths. Larger motor and urethane feed wheel enhance efficiency. Self-oiling blade provides consistent cutting. No. 1UXP5 comes with a feature that automatically advances the next length of tape. Tape Aerial Accessory No. 1UXP6 delivers and holds a straight length of moistened tape.

No. 3TJJ1

- 64-oz. water bottle

Holds reinforced or nonreinforced tapes up to 4"W. Features thermal cutoff and color-coded keypad with 20 preset lengths. Dispenses 6" to 100" lengths of tape. Random key allows for continuous uninterrupted tape dispensing.

MANUAL

No. 1UXP9

Holds up to 600 ft. of 1" to 3"W reinforced and nonreinforced paper tape. Easy to operate and excellent for low-volume carton sealing.

No. 3TJJ2

Holds 500-ft. of gum-side out nonreinforced tape from 1" to 1½"W. Dispenses tape in lengths from 1" to 8".

Nos. 1UXP7 and 1UXP8

- 44-oz. water bottle

Hold up to 600 ft. of 1½" to 3"W tape. Dispense up to 30" with 1 pull. Urethane feedwheel and guillotine shear blades provide consistent cutting. No. 1UXP8 features a top heater to enhance water-activated tape adhesion.

Packaging Tables

PRO-LINE

Complete Pack Benches include a full lower shelf with 4 dividers, full-width storage shelf with 4" of clearance, bin holder, 6 outlet power supply, spool holder, enclosed metal shelf with 4 dividers, corrugated shelf with 4 dividers, uprights, and a shop light.

Packing Tables include powder-coated painted steel frame, uprights, paper spool holder, adjustable upper steel shelf with dividers, corrugated shelf with dividers, 120V 15A power supply, shop light, and 6" leg extenders with leveling feet.

Optional Scale Stands Nos. 33VC36 and 33VC35 are height adjustable with included 6" leg extensions.

Optional Cardboard Storage Stand No. 33VC37 keeps boxes clean and off the floor. 24" W x 36" with 5 steel dividers.

BENCHPRO

All sets include 6" height-adjustable with leveling glide feature, powder painted steel structure, roll holder, bin box rail, 8 outlets, 16A power strip, and top and lower bin shelves with steel dividers. Premium Packaging Bench Sets feature a 1,000-lb. weight capacity and 13-ga. steel frame. Heavy-Duty Packaging Bench Sets feature a 6600-lb. weight capacity and stainless steel trim.

UPS Guidlines	Fiber Box Handbook	Box Type
30-lb.	65-lb.	32 ECT Single Wall
40-lb.	65-lb.	200# Single Wall
50-lb.	95-lb.	44 ECT Single Wall
60-lb.	100-lb.	48 ECT Double Wall
80-lb.	120-lb.	51 ECT Double Wall
—	160-lb.	71 ECT Double Wall
—	280-lb.	90 ECT Triple Wall

What strength do you need?

Using the chart (at left), find the weight of your shipment to see the box strength that you'll need to support it. You may need to follow a particular set of guidelines depending on your carrier. Both the UPS and Fiber Box Handbook recommendations are represented in the chart.

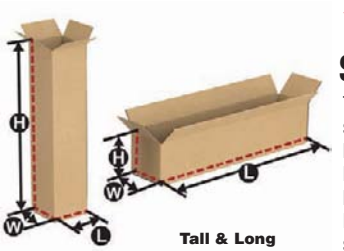
There are two tests of box strength to consider:

ECT (Edge Crush Test) measures the stacking strength of the box. The greater the number, the greater the amount of force required to crush the box during stacking.

200# is a rating given to boxes that have received The Mullen Test for bursting strength. These boxes provide greater overall stacking strength than ECT boxes.

Single Wall, also known as double face boxes, have walls constructed of a corrugated medium glued between two sheets of linerboard.

Double Wall boxes can be used to ship rough-edged items. The walls are constructed of two corrugated mediums glued between three sheets of linerboard.



Triple Wall boxes can be used to ship heavy, sharp-edged metal parts. They have walls constructed of three corrugated mediums glued between four sheets of linerboard.

Flat

Tall & Long

GA GRAINGER APPROVED

Standard Shipping Boxes

These boxes are made of corrugated cardboard for storing and shipping products. Box strengths vary, but 200# and 32 ECT are common strength ratings. Boxes labeled 200# provide more protection against bursting and are stronger for stacking than boxes labeled 32 ECT. Heavy-duty boxes include 44 ECT single-wall and 48 ECT double-wall boxes.

Gaylord Container

Lids

GA GRAINGER APPROVED

Gaylord Containers and Lids

Containers—These large boxes have outside measurements of 48"L x 40"W and varying heights that fit on a pallet. They hold and organize bulk loads and transfer large shipments between locations. They are commonly used to collect recycling, trash, or debris at a facility. Half Slotted Container (HSC) closure style boxes have bottom flaps that meet at the center of the box; however, there is no cover or flap on top. These boxes are for applications where boxes require frequent loading and unloading. Typically, a lid is required to close the box. Regular Slotted Container (RSC) have top flaps that meet at the center of the box when folded and are usually closed using tape or staples.

Lids—Cover and close Gaylord containers while protecting the contents from dirt and dust during transport or storage. These lids make Gaylord containers stackable within warehouses or storage facilities. They can be reused as covers or flipped upside down and used as a tray to store and organize items in a warehouse or facility.

Standard-Duty Corrugated Pads

These single-wall corrugated pads are sheets of 32 ECT cardboard for layering between items on a pallet. Corrugated pads separate products in a stack, protecting them from damage or slippage. They can be used to protect the floor from pallet base damage.

Printed Moving Boxes and Kit

Printed Moving Boxes—Large enough to hold household items and small enough to be handled by movers and stacked in a truck or container for transport. They are preprinted with labels that allow movers to write in identifying information.

Kit—Includes a combination of products for packing and moving household items. Boxes have labeled areas for writing in contents or other identifying information. Protective packaging material wraps fragile items to protect them from damage during transport such as cracks or chips. Tape seals a packed box, and markers label boxes with contents. Moving kit includes:

(5) boxes: 16" x 12-½" x 12-½"; (4) boxes: 18" x 18" x 16";
(2) boxes: 24" x 18" x 18"; (1) tall box: 26" x 6" x 36-½"

(2) rolls of tape: 2" x 55 yds.; (2) rolls of bubble wrap: 16" x 9";
and (1) black marker.

Cold Packs

- Reusable

Gel—These packs are flexible when not frozen and contain refrigerant gel that stays colder longer than ice. They help maintain a consistent temperature inside boxes or pallets of perishable products. Moisture safe packs have a nonwoven poly cloth that absorbs moisture.

Freezer—Rigid cold packs resist damage from punctures and can last for years. They contain a nontoxic gel that helps maintain a consistent temperature in coolers and ice chests to prevent perishable products from spoiling.

Cold Packs—These leakproof packs of refrigerant gel stay colder longer than ice. They help maintain a consistent temperature inside boxes or pallets of perishable products.

Insulated Foam Shipping Container No. 12F276

Insulated Box & Foam Shipping Kit No. 12F337

PolarTech Industries

Insulated Shipping Kits

Box and Foam Kits—Preassembled kits include a shipping box with a lidded foam insert for packaging and shipping food, beverage, and pharmaceutical products. The foam container holds the product and fits securely into the box. These kits help keep the package temperature constant and prevent damage to the products from excessive heat or cold.

Foam Containers—Lightweight boxes made of expanded polystyrene have a tight-fitting lid that closes the box opening with an insulated seal. These reusable containers resist leaks and keep food and medical supplies cold during transport.

SONOCO THERMOSAFE

Insulated Plastic Shipping Containers

Reusable boxes or totes secure food products for transport. These hard plastic containers help maintain a constant temperature inside the package and protect the contents against damage from excessive heat or cold. They are more durable and maintain temperature longer than corrugated boxes and foam containers.

Stencil Rollers

These rollers are used to apply roll-on inks to shipping stencils and transfer a message from the stencil to a shipping container or product.

Stencil Rollers—Shipping stencil rollers come with replaceable handle and head.

Stencil Brush—A valve dispenses compatible Rolmark and K-1 ink into hog hair brush bristles. The protective cover prevents drying when not in use.

Foam Roller Handle—Economical stenciling system uses Rolmark ink on porous and nonporous surfaces for occasional stenciling.

Replacement Fountain Brush Tip—Replacement tip with hog hair bristles is for stencil fountain brush No. 5A134.

Stencil Ink

Shipping stencil inks are applied to shipping stencils to transfer the message from the stencil to a shipping container or product.

Spray Cans—Aerosol cans are used to spray ink onto a shipping stencil. This is a faster way to apply ink than rolling it on.

Roller Inks—Water-resistant ink is rolled onto a shipping stencil with a compatible ink roller.

Roller Ink Cartridges—These cartridges screw into express roller No. 4HY28 sold on this page.

Stencil Cutting Machines and Oil Boards

Stencil Cutting Machines—Punch out letters and numbers on oil boards to create custom stencils for marking shipping containers with messages, warnings, and handling instructions. Compatible with individual shipping stencil oil boards. Not compatible with shipping stencil oil board rolls.

Stencil Oil Boards—Individual rectangular sheets of material are used with cutting machines to create custom stencils. After the machine punches the message into the board, ink is applied to paint the message onto a container or product. Boards are made from materials that resist ink bleedthrough, which helps ensure crisp, readable messages. They can be used on flat or curved surfaces.

General-Purpose Pre-Printed Packing List Envelopes

A message on the front of the envelope identifies the contents within. Adhesive-backed plastic pouches are stuck to the outside of a package to hold shipping documents.They ensure invoices, packing lists, and safety data sheets are visible and reduce the risk of them getting damaged, lost, or thrown out. Use on boxes, cartons, mailers, tubes, and large envelopes.

Thermal Transfer Labels

Blank paper labels require a ribbon to produce crisp images that will last longer than direct thermal label images. An adhesive backing allows the labels to stick to shipping containers. A thermal barcode label printer is used to customize the labels with print addresses, barcodes, and company logos. **Thermal transfer label rolls** save time because they contain more labels than a fanfold. **Fanfold labels** consist of multiple labels that are folded into a stack. **Colored labels** can be used for color-coding shipments, shipping locations, and products.

Thermal Transfer Ribbons

Use with thermal barcode label printers to print information on thermal transfer labels. The ribbons contain ink that is absorbed into the label material to form a crisp image during printing. **Wax ribbons** create smudge-resistant images. They are suitable for labels that will be used in indoor environments. **Wax/Resin** and **Resin ribbons** resist smudges and scratches and can be used in indoor and outdoor environments. Wax/Resin ribbons may be exposed to light or moderate abrasion. Resin ribbons may be exposed to heat, heavy abrasion, greases, oils, and harsh chemicals.

DYMO brother at your side AVERY

Direct Thermal Labels

Create custom labels with barcodes and other useful information. These blank paper labels do not require a ribbon, ink, or toner for printing. Adhesive backing sticks to surfaces such as packages, shipping containers, and warehouse or retail racks. A compatible thermal barcode label printer is used to print addresses, barcodes, company logos, etc., see page 1379. Images on direct thermal labels may fade over time, so they're not recommended for lifetime identification

Direct Thermal Label Rolls—Multiple labels are stored on a roll core. Label rolls reduce reloading time because they contain more labels than a fanfold.

Fanfold Direct Thermal Labels—Multiple labels are folded into a stack. Fanfold labels take up less space than label rolls. There are typically more labels in a fanfold stack than on a label roll, which reduces how often labels need to be loaded into the printer.

Colored Direct Thermal Label Rolls—These labels can be used for color-coding shipments, shipping locations, and products in a container. Multiple labels that are stored on a roll core. They can also be used to draw attention to shipping information.

Heat Poly Bag Sealers

Seal parts in plastic bags for shipping, distribution, or storage. Bag sealers use pressure and heat to close poly bags with a watertight, airtight seal. They crimp the top of a bag and apply heat that melts a strip of the bag to close it.

Foot-Operated—These sealers help with floor sealing jobs.

Hand-Operated—Spot crimp sealing for flat and gusseted poly bags or poly tubing.

Clamp-Style Hand-Held—Create a consistent seal on flat and gusseted poly bags or poly tubing.

Repair Kits—Kits include heating element, lower PTFE tape, and upper PTFE fabric.

GA GRAINGER APPROVED

Gusseted, Open-End Poly Bags

For heat impulse sealers, see page 1406.

LLDPE Poly Bags—Linear low-density bags have extra strength that can allow a lighter-gauge bag to replace a heavier-gauge LDPE bag.

LDPE Poly Bags—Low-density bags can be heat sealed, stapled, taped, or closed with a bag tie. Accordion folds on both sides accommodate bulky items.

Poly Tubing Rack No. 8AYX4

GA GRAINGER APPROVED

Poly Tubing and Rack

Poly Tubing—Cut to length for flexibility; heat seal, staple, bag tie, or tape closed. 100% virgin low-density polyethylene material is treated on 1 side to accept printing. 3" cores. Meet FDA or Amine-free requirements; see Grainger.com® for more standards information.

Cleanroom Poly Tubing—Polyethylene tubing is manufactured in a Class 100 cleanroom, where environmental control of particulate and microbial contamination is maintained. Use of Class 100 tubing is required in aseptic manufacturing/packaging environments.

Poly Tubing Rack—Holds multiple rolls.

GA GRAINGER APPROVED

Reclosable Polyethylene Zipper and Slide-Seal Bags

- Secure seal helps eliminate spills or contamination
- Meet FDA requirements for food applications
- All items are LDPE bag material except where noted in footnote

Zip-Seal—Wide opening for easy sealing and resealing. Zipper seal bags are premium, leak-resistant bags with heavy-duty zipper.

Slide-Seal—Slide mechanism glides smoothly across bag.

Reclosable LDPE Zipper Seal Bags

MINIGRIP
A Member of Inteplast Group

- Reinforced double zipper seal
- All-LDPE construction
- Meet FDA packaging standards

Durable double zipper is easy to snap open, even with one hand, and zips securely shut. No. 36FF38 features white write-on block. No. 36FF27 features white write-on block and hang hole.

Clear Polyethylene

Cotton/ Poly Blend

Cotton/Poly Blend with Mailing Tag

Drawstring Parts Bags

GRAINGER APPROVED

Drawstring seals bag securely and provides a means for attaching enclosed parts to a larger member of assembly.

Polypropylene and Polyethylene—Clear bags with drawstring.

Cotton/Poly Blend—Breathable bags are 50% heavier than most muslin or mill bags and provide good closure. All items have a single drawstring except Nos. 5DHZ9 and 5DJA0 have double drawstrings. For very small parts.

Cotton/Poly Blend with Mailing Tag—Same as the cotton bags above, but with an 8 mil card stock mailing tag overstitched at the bottom of the bag. Write on surface.

Door Jamb Protector No. 2NKU1

Nonwoven Pad No. 4LGK9

Lifting Straps No. 32TL81

Moving Pads, Covers, Bags, and Lifting Straps

GRAINGER APPROVED

All pads and covers are 50% cotton and feature zigzag lock stitching, 1-pc. linear batting, and finished corners to cushion items. The greater the weight, the thicker the material.

Pads—Woven pads have double-lock stitching and nonwoven pads have single-lock stitching.

Covers—Sofa and loveseat covers have ties, door jamb protector has 3 springs to hold cover in place. All other woven covers have hook-and-loop fasteners.

Lifting Straps and Moving Harness—Encourage proper lifting techniques by using leverage so that items being moved seem lighter. Also won't leave scrapes and scratches on floors like dollies or hand trucks.

Packing Peanuts

Reusable, loose packing peanuts fill excess space in a container around a product and provide some protection against damage during transit for items that are not fragile. They are stored in bags or boxes at a packaging station to prepare items for shipment.

Recycled Polystyrene Peanuts— Dissolve in water. Reusable.

Biodegradable Peanuts—For packages that will not be exposed to moisture. 100% recycled fill is reusable and static-free. Will not chip or dust.

Instant Foam Packaging

The foam relies on pressure to form into the shape of items in a container. It doesn't need to be warmed and works faster than foam that requires heat. It is supplied in a bag containing two compounds. When mixed with pressure, the compounds harden into foam that surrounds the item in the box and fills all void space.

Bubble Rolls for General Use

Flexible plastic material made with regularly spaced air pockets is used to wrap and cushion items inside a package.

UPSable—Rolls meet standard UPS shipping guidelines. Because they're smaller than standard rolls, they are a good choice for small e-commerce businesses that ship low volumes and have limited space.

Standard—These rolls are ideal for e-commerce companies that pack and ship lightweight or midweight items without sharp corners.

Desiccant Bags

When added to packages, these packets absorb water vapor and protect items that must not get wet. They protect leather items, food products, or medicines.

Nonwoven—When the relative humidity (RH) is less than 20%, these bags absorb moisture better than silica gel. They are used to control humidity around metal and electronics, and are effective at temperatures up to 302°F.

Tyvek—These tear-proof, dust-free bags meet FDA specifications for contact with food and drugs. They are used to absorb moisture when shipping food, pharmaceuticals, and electronic components.

Capsule and Cartridge—FDA-approved desiccant bags are for use in food and pharmaceutical applications. The silica gel is packed in a hard capsule or cartridge to save space when used in pharmaceutical bottles. Cartridges and capsules are best suited for use at temperatures below 100°F, but can be used at up to 302°F.

Standard Foam Rolls

Foam sheeting is ideal for packing large volumes of fragile or breakable items. Rolls fit on a dispenser stand so foam can be pulled from the roll and cut to size or torn at perforations. White color packaging foam is thin, flexible and protects glass, ceramics, metal parts, or wood products from scratching or breaking during shipment.

Kraft Paper Dunnage Bags

Recyclable bags are inflated with air and reusable if not punctured, and help prevent items in trailers, railcars, and containers from shifting during transit. They provide a firm cushion around large items and protect products against damage. Inflator connects an air compressor to a dunnage bag for quick inflation.

Humidity Indicator Cards

Moisture-sensitive spots measure the percentage of relative humidity inside a shipment. The card hangs on the inside of a container wall. If the humidity level exceeds a certain percentage, the moisture sensing spot on the card changes color from blue to pink, alerting shippers to check the package for moisture or damage.

Corrosion Inhibiting VCI Stretch Wrap

VCI (volatile corrosion inhibiting) film is wrapped around a bundle or pallet to protect machinery and ferrous parts where corrosion of metal parts is a concern. **Hand-grade wrap** can be applied with or without a handheld dispenser. The worker applies the wrap by holding the roll and walking around the bundle. These rolls are smaller than machine-grade wrap rolls, making them easier to transport around a facility. It is used in low- to moderate-volume wrapping applications. **Machine-grade wrap** is installed on a stretch wrap machine. It comes on larger, heavier roils than hand-grade wrap. Opaque stretch wrap cannot be seen through, which provides added security by hiding product labels when shipping sensitive or valuable items.

Corrosion Inhibiting VCI Pads

Foam pads are infused with a volatile corrosion inhibitor for preventing rust. They can be placed in or between fragile metal items or electronic components to cushion them during transit or storage. VCI pads prevent moisture from accumulating on fragile metal parts that would cause water damage or rust.

Hand-Grade Stretch Wrap

Protect pallets and bundles from contaminants such as dirt and moisture, keep items together, and prevent tampering. This wrap is for use with or without a handheld dispenser. Apply the wrap by holding the roll and walking around the bundle. These rolls are smaller than machine-grade wrap rolls. Use to wrap boxes and irregular loads or bundles, such as lumber or pallets with irregular sides.

Cast Stretch Wrap Films—This wrap is quieter to apply, and has more cling than blown film. It also provides improved clarity over blown film for viewing bundle contents and requires less force to stretch the wrap during application for uniform loads.

Blown Stretch Wrap Films—Puncture- and tear-resistant wrap is a good choice for irregular loads with sharp edges. It is less likely than cast film to change shape or stretch after application, which makes it good for heavy loads or loads that might shift during transport.

Color-Coding Stretch Wrap with Handles

Color-coding is used to quickly identify contents to sort and route items, and can be used to indicate tampering or repalletizing. This hand-grade stretch wrap has a handle that workers hold while applying wrap, protecting hands from cuts and scrapes caused by sharp cores and reducing hand fatigue. **Handle with brake stretch wrap** features a brake between the roll and the user's hand. **Reusable handle stretch wrap** can be removed from the roll when it's empty and reused. Ergonomic grip helps reduce worker fatigue.

Stretch Wrap with Handles

Handles are included to protect hands from the sharp edges of the core and reduce cuts and abrasions. To apply the wrap, the worker holds the handle and walks around the bundle. Smaller than machine-grade wrap for easy portability.

Longer Core Handle Stretch Wrap Films—Built-in handle extends from each end of the core, allowing workers to hold the core while wrapping. Handles are disposable.

Reusable Handle Stretch Wrap Films—Handles can be removed when the roll is empty and installed on refill rolls. An ergonomic grip allows wrap to be applied with one hand and helps reduce hand fatigue.

Handle with Brake Stretch Wrap Films—Hand-grade stretch wrap has a reusable handle with a brake between the handle and core to protect workers' hands from sharp edges.

Machine-Grade Stretch Wrap

No. 36P113

This wrap is installed on a stretch wrap machine. It comes on larger, heavier rolls than hand-grade wrap. Stretch wrap machines are used in medium- to high-volume packing and shipping applications.

Cast Stretch Wrap Films—The film protects the contents from tampering and damage, and is quieter to apply and has more cling than blown film. It also provides improved clarity over blown film for viewing bundle labeling and requires less force to stretch the wrap during application, reducing worker fatigue.

Blown Stretch Wrap Films—Blown film is less likely than cast film to change shape or stretch after application, which makes it a good choice for heavy, irregular loads with sharp edges.

Product-Concealing Stretch Wrap

Opaque wrap provides added security by hiding product labels when shipping sensitive or valuable items. It is a continuous length of plastic that is wrapped around the sides of a pallet or bundle to protect the package from dust and moisture, prevent and indicate tampering, and keep items together.

Handle Opaque Stretch Wrap Films—This hand-grade wrap has an integrated handle that protects hands from the sharp edges of the core, reduces cuts and abrasions, and eliminates the need to purchase a handle separately.

Hand Opaque Stretch Wrap Films—This hand-grade wrap is manually wrapped and can be applied with or without a handheld dispenser. These rolls are smaller than machine-grade wrap rolls, making them easier to transport around a facility. Hand-grade wrap is used in low- to moderate-volume wrapping applications and can be used to wrap boxes and irregular loads or bundles, such as lumber.

Machine Opaque Stretch Wrap Films—This machine-grade wrap comes on larger, heavier rolls than hand-grade wrap and is installed on a stretch wrap machine. It is used in medium-to-high volume packing and shipping applications to conceal bundle contents.

High-Performance Stretch Wrap

This wrap provides the same strength and puncture resistance at a thinner gauge than standard stretch wrap. It is a continuous length of plastic with one-sided cling that is wrapped around the sides of a pallet or bundle to protect the package from dust and moisture, prevent and indicate tampering, and keep items together.

No. 49XF32

Hand-Grade—Used in low-to-moderate volume wrapping applications or to wrap boxes and irregular loads or bundles, such as lumber.

Machine-Grade—Larger and heavier than hand-grade stretch wrap.

No. 21XL01

NELSON WRAP DISPENSER

Stretch Wrap Dispensers

These dispensers hold stretch wrap rolls, making it easier and quicker to manually apply stretch wrap to pallets and bundles.

Bar Handle Dispensers—Ergonomic handle and grip provide two-handed control when applying wrap. These dispensers are used with larger hand-grade stretch wrap, usually rolls 12" to 20" wide. Handles protect hands from sharp core material and reduce hand fatigue and strain.

Rope Applicators—These applicators apply wrap at full width and have an attachment that can be used to compress the full-width stretch wrap to the thickness of a rope. Stretch rope provides added stability over full-width wrap alone when bundling large or heavy loads.

Stand Up Bar Handles—Long handle allows workers to apply stretch wrap at the bottom of the pallet without stooping or bending at the waist or reaching up to wrap the top of tall pallets. They hold larger stretch wrap rolls, usually 12" to 20" wide.

Reusable Mini-Wrap Handles—Reusable handle and rotating mount allow workers to apply stretch wrap with one hand. The handle protects hands from the sharp edges of the core, reduces hand fatigue, and speeds application. Reusable mini-wrap handles are used with narrow stretch wrap rolls, generally 2" to 5" wide.

Orbital Bundler Dispensers—Manually-operated dispensers hold bundles off the ground while stretch wrap is applied vertically around the bundle. They can hold regular or irregularly shaped bundles. Arms can be adjusted vertically and horizontally to ensure bundles of different sizes are centered when wrapping.

End Caps—Caps are inserted into the stretch wrap roll core and protrude slightly from the core to provide a smooth surface that protects workers' hands from cuts and abrasions caused by sharp core edges. End caps can be removed and reused.

Stretch Wrap Machines, Turntables, and Ramps

Machines—Rotate the product and apply wrap in one operation, eliminating the need for workers to walk around a pallet, reducing worker fatigue, and freeing them up for other tasks. Use them on loading docks and in storage facilities to wrap pallets with uniform or irregular sides.

Turntables—Electric turntable holds the bundle and slowly rotates while workers stand in one place and hold the wrap. Use stretch wrap turntables on loading docks and in storage facilities to wrap pallets with uniform or irregular sides.

Ramps—Ramps allow operators to use a pallet jack to load heavy pallets onto stretch wrap machines and remove the pallet when wrapping is complete. The jack is pushed up the ramp, providing quick access to the machine table.

Heat-Activated Shrink Wrap Films

Wrap tightly around items to keep them contained during transport or protected against weather. Film shrinks when exposed to heat. Use to protect small packages, loaded pallets, and dry docked boats. For use with heat guns or shrink tunnels, sold separately.

Industrial, Single-Wound Polyethylene Shrink Films—Waterproof, durable, and high puncture and tear resistant. Provides UV protection for up to 9 months. Shrink with propane heat gun, sold separately.

Centerfold Polyolefin Shrink Films—Polyolefin wrap is approved for direct food contact. It forms a skintight protective wrap over packages.

Centerfold PVC Shrink Films—Clear PVC has maximum shrink of 40%. This shrink film is economical for manual applications. It forms a skintight protective wrap over packages.

PVC Shrink Tubing—Provides crystal-clear, skintight wrap around contents. Makes bags of any length.

PVC Domed Shrink Bags—Domed feature provides extra space. Insert package into bag and seal open end.

PVC Shrink Bags—Insert package into bag and seal open end.

PVC Shrink Bands—Fit 4-, 8-, 12-, 16-, 24-, and 32-oz. deli pack containers with 4⅝"-dia. lid. Available clear or clear with red print that reads "Sealed for Your Protection." Preformed with round shape and built-in lip to quickly fit over container lids.

Standard Steel Strapping

Applied by hand, this strapping secures heavy loads with irregular or rough edges. **Standard-duty**, low-carbon steel strapping is for securing most moderate-to-heavy loads, such as heavy wooden crates. **High-tensile strapping** is used in the railroad industry. It is made of heat-treated high-carbon for use with heavy loads such as cement blocks, lumber, and machinery. **Portable standard-duty** is packaged on smaller rolls in a dispenser box. It is suitable for securing pipe and other quick strapping needs.

Seals for Steel Strapping

These high-grade galvanized steel seals are pinched tight around strapping ends to secure them in place. A tensioning tool is used to pull the strapping tight and a sealer tool compresses a seal to hold the strapping in place, see page 1420. **Open seals**, sometimes called snap-on or open flange seals, secure steel strapping around flat surfaces, such as boxes and pallets. They have an open face that is placed around the strapping during or after tensioning. **Pusher seals** secure steel strapping around round surfaces such as pipe and rebar. They are installed by threading the strapping through the seal.

Steel Strapping Kits

These kits include a selection of items that work together to hold, store, transport, tension, and seal steel strapping. Wheeled strapping carts store and transport coils and tools around a facility. Tensioners pull strapping tight to ensure a secure fit, sealers apply seals to keep the straps from slipping, and cutters cut strapping to length.

Strapping Carts

Carts secure coils through the core, so operators can pull strapping off the coil as needed. Wheels allow operators to move the carts around worksites. A brake stops the roll from turning or unwinding when not in use. A built-in bucket or tray holds tools and seals. **Plastic carts** hold polyester and polypropyene strapping coils. They are not compatible with steel or poly cord strapping coils. **Poly cord carts** are sized to hold poly cord strapping coils and are not compatible with steel, polyester, or polypropylene strapping coils. **Steel carts** hold core sizes and widths of steel strapping coils and are not compatible with plastic or poly cord strapping coils. **Plastic and Steel carts** feature an extension bar that holds wider cores than those generally found on steel strapping. They are for steel, polyester, and polypropylene strapping coils and are not compatible with poly cord strapping coils.

Cutter Tools for Steel Strapping

Cut off excess strapping to reduce the risk of injury caused by sharp edges. Strapping band cutters are used to cut steel and zinc-coated steel strapping to length, trim ends, and cut strapping free after it's been secured.

1-Handed—Use on light- to medium-duty strapping. One-handed operation keeps the opposite hand free.

2-Handed—Use with medium- to heavy-duty and high-tensile strength steel and zinc-coated steel strapping. Two-handed operation provides the extra power needed for quick cuts.

Combination Tools for Steel Strapping

These tools tension, seal, and cut steel and zinc-coated steel strapping in a single operation, eliminating the need to use different tools for each operation. They are used in medium- to high-volume applications to speed the processing and reduce operator fatigue over using separate tools to perform the same functions. Combination tools can be used on flat or round surfaces such as bundles and pipe.

Manual—Manually-operated tools can be brought to the work location and do not require an external power source or attachments, so are often used in applications where access to a power source is limited.

Pneumatic —Air-powered combination tools, are powered by a compressed air system. They speed the operation and reduce operator fatigue compared to manually-operated combination tools.

Sealer Tools for Steel Strapping

Crimp and secure strapping seals for steel and zinc-coated steel strapping. Strapping is wrapped around a bundle or package and tightened, then a seal is crimped in place using a sealer tool.

Manual—Use for low-volume applications or where access to an external power source is limited. They can be carried to the work location. The operator squeezes a lever to crimp and press the seal in place.

Pneumatic—Also called air-powered sealers, these tools connect to a compressed air system to automatically apply seals to steel strapping in medium-to-high volume applications. They can be used on flat and round surfaces, such as pallets and pipe, and are compatible with all seal sizes and strapping strengths.

Tensioner Tools for Steel Strapping

Pull the ends of the strapping to secure the strap around the bundle before sealing the ends together.

Manual—These tools can be brought to the work location and do not require an external power source or attachments. They are used for low-volume applications. The operator pushes a lever to tighten straps before a seal is applied using a sealing tool.

Pneumatic —Also called an air-powered tensioner, this tool connects to a compressed air system to secure the ends of steel strapping in medium- to high-volume strapping applications. The operator presses a button or squeezes a lever and the tool automatically tightens the steel strapping, speeding operation and reducing fatigue. It can be used on flat or round surfaces, including bundles and pipe.

Poly Cord Strapping

Embedded cords provide more strength and higher resistance to shock and tearing than standard polyester. Poly cord is similar in strength to steel strapping but is more flexible. It does not scratch or mar surfaces and is more resistant to shock. It won't rust and withstands temperature changes when used outdoors. The ends are secured using a handle tie or sealed with a strapping buckle, seal, friction weld, or heat. Apply and seal using a strapping machine or manually-operated tools.

No. 4DWT9

Nonwoven—Light-duty strapping (sometimes called composite strapping) has embedded fibers along its length to resist snapping and tearing when securing lightweight boxes, papers, and magazines.

Woven—This nonmarring cord is used to secure heavier loads than nonwoven poly cord. Fibers run the length of the strapping and across the strapping to provide added strength and resistance to breaking. Use to secure bundles of brick, stone, and steel.

Buckles for Poly Cord Strapping

CARISTRAP GA GRAINGER APPROVED

Metal buckles maintain tension on poly cord strapping. Each end of the strapping is wrapped around the buckle and tightened using a tensioning tool. The buckles use strap tension to hold strapping in place and do not require sealing. They have a phosphated seal finish. **Standard-duty buckles** secure poly strapping in light-to-medium weight strapping applications. **Heavy-duty buckles** resist corrosion and secure poly strapping in medium- to heavy-duty applications, such as securing lumber, bricks, stone, metal, and pallets.

Polyester Strapping

These coils secure lumber, heavy pallets, and other medium-to-large loads for storage and shipment. Polyester construction is noncorrosive so it will not damage surfaces. It is a safer alternative to steel and is more rigid and stretches less than polypropylene strapping, allowing it to retain tension over time. Polyester strapping is stronger than polypropylene strapping, but has less overall strength than stainless steel strapping. Apply strapping using manually-operated strapping tools or a strapping machine.

Hand-Grade—Manually apply to lumber, heavy pallets, and other medium-to-large loads. This strapping is generally used in low-to-moderate volume applications. It is secured using tensioning tools, seals, and sealers.

Machine-Grade—This strapping does not require seals. Automatic strapping machines are used in moderate-to-high volume applications.

Seals for Polyester Strapping

A textured surface grips the smooth polyester surface to prevent the strapping from slipping and losing tension. Secure seals using a manual strapping sealer.

Open—These seals secure polyester strapping on flat surfaces. They are placed over the strapping during or after tensioning and can be used where high-tensile strength is needed.

Gripper—Sometimes called serrated seals, these gripper-style seals have barbs that grip the polyester strapping. They are secured in place using a sealer tool.

Combination Tools for Polyester Strapping

- Friction weld joint type

Tension, seal, and cut strapping in a single operation, eliminating the need to use a different tool for each operation. Combination tools can be used on flat or round surfaces, and are used in medium-to-high volume applications.

Battery—A rechargeable battery allows the tool to be easily moved around a worksite. One-hand operation with no need for external attachments or power sources.

Pneumatic—Also called air-powered combination tools, these pneumatic tools are powered by a compressed air system. They can be operated with one hand.

Polypropylene Strapping

Sometimes called poly strapping, these lightweight bands are used to bundle newspapers, seal and bundle cartons, and secure light loads. The embossed surface makes the strapping flexible so it's easier to bend around edges and irregular shapes.

Hand-Grade—Secure using hand-operated tensioning tools, seals, and sealers. Generally used in low-to-moderate volume applications.

Machine-Grade—Applied using a strapping machine, these bands do not require seals. Strapping machines are used in moderate-to-high volume applications.

Seals and Buckles for Polypropylene Strapping

- Regular-duty seals
- Flat seal surface

Apply to overlapping strap ends to maintain tension and keep the strapping from slipping.

Open Seals—Secure poly strapping on flat surfaces using a manually-operated sealing tool. Seals are placed over the strapping during or after tensioning and can be used where high-tensile strength is needed.

Buckles—Strapping is threaded around the buckle and pulled tight. Buckles are held in place with the tension on the strap and do not require special tools to ensure a secure fit.

GA GRAINGER APPROVED SIGNODE

Polypropylene Strapping Kits

These kits include a selection of items that work together to hold, store, transport, tension, and seal polypropylene strapping. Polypropylene strapping, sometimes called poly strapping, is a lightweight strap used to bundle newspapers, seal and bundle cartons, and secure light loads. The embossed surface makes the strapping flexible to make it easier to bend the strapping around edges and irregular shapes.

Strapping, Tensioner, and Buckles— Strapping is wrapped around a bundle and tightened with a tensioner tool. The ends of the strapping are wrapped around the buckle and tightened manually.

Strapping, Tensioner, Sealer, and Seals— These items work together to perform all the tasks required to strap and secure strapping. Pull the strapping tight using a tensioner, then use a sealing tool to secure a seal that ensures strapping does not come loose.

Strapping and Seals—Lightweight strap is used to bundle newspapers, seal and bundle cartons, and secure light loads. Seals secure strapping to maintain correct tension.

Strapping and Buckles—These kits can be used to replenish supplies at workstations and on strapping carts, or can be used independently of carts and workstations. The buckles are secured manually, without the need of a sealing tool.

Defender™ 3000—Application modes include weighing and parts counting. Ideal for production, warehouse, shipping, and receiving areas. Indicator can be wall, column, or tabletop mounted. Include stainless steel pan with painted carbon steel frame, IP67 load cell, and bi-directional RS232. Operate on AC adapter or 100-hr. internal rechargeable battery. Weigh in kg, g, lb., oz., lb.:oz.

MeasureTek—Applications include weighing, counting, checkweighing, percent weighing, accumulation, and hold modes. Ideal for general weighing and simple counting applications in production, packaging, warehouse, inventory, shipping and receiving areas. Rigid powder-coated steel base includes stainless steel platter and pole. Also feature large LCD and blue backlight. USB / RS232 interface and cables for communication with a PC.

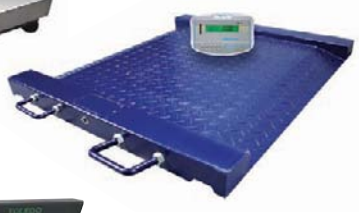
ADAM OHAUS

More scales are available online, see Grainger.com®.

GFC Series—A powerful asset for parts counting in applications including inventory, quality inspections, and in warehouse or production environments. Include built-in rechargeable battery for portability, preset tare to speed up repetitive weighing, and RS-232 interface to connect to a computer or printer. Weigh in kg or lb. Meet FCC, UL, CE standards.



GFK Series—Efficient checkweigher with large scale benefits is excellent for quality control, production, warehousing, and packing applications. Features include LCD, programmable audible alarm, hold fuction to freeze displayed weight, and over, under, and acceptable weight LED lights. Include built-in rechargeable battery. Weigh in g, kg, lb., lb.:oz and oz. CE, UL, and CSA Certified.

PTM 500 Series—Features an easy-access base with built-in ramps and GK remote indicator. Integrated wheels permit easy movement and diamond plate surface improves grip. Backlit LCD displays weight in kg and lb. Includes AC adapter and charger. Ideal for warehouse or medical applications. Meets FCC, UL, and CE standards.

Defender™—Features epoxy-painted steel construction with beam lock mechanism to protect scale during storage, and phenolic wheels for portability. Beam calibrated to 100 lb. in 0.5 lb. increments. Includes counterpoise weights to increase capacity to 1,000 lb.: 2 × 100 lb., 1 × 200 lb., and 1 × 500 lb.

Platform Scales

More scales are available online, see Grainger.com®.

CPW Plus Series—Portable scales with multiple configurations are ideal for many applications including warehouse, production, and field work. Operate on AC adapter (included) or battery power. Feature a large stainless steel platform and convenient hold function. Backlit LCD displays weight in kg, lb., lb.:oz and oz. Meet UL and CE standards.

B-Tek Bench Series—Scales have a stainless steel weighing platter and a structural tube base to ensure long-term performance in rugged and corrosive applications. Functions include weighing, checkweighing, bagging, packaging, and other high accuracy industrial weighing applications. NTEP Approved.

B-Tek Floor Series—Industrial scales are designed with a formed channel substructure and tread plate decking to ensure maximum durability for the life of the scale. Specially formulated, durable 2-part epoxy paint finish provides excellent hardness and protects against chipping and wear. NTEP Approved.

PS3000 Series—Heavy-duty diamond plate steel construction features a 2-part epoxy paint finish. Include a 20-ft. long braided interface cable with quick disconnect, RS232 cable for printer and PC connectivity, and bright 1" tall display. Ideal for use in shipping and receiving and inventory control applications.

MeasureTek—Thick top tread plate platform provides added durability and slip resistance and is IP65 waterproof. Run on AC adapter (included) or 4 AA batteries. Include large LCD and blue backlight. USB /RS232 interface allows communication with PC. Functions include weighing, counting, checkweighing, percent weighing, accumulation, and hold. See Grainger.com® for standards and regulation information.

VN and VX Series—Painted carbon steel top plate has raised cross-hatch surface for added slip resistance and shear beam load cells protected to IP67. Feature both weighing and counting functions. Include stainless steel indicator with bi-directional RS232, AC adapter, and internal rechargeable battery. Weigh in kg, g, lb., oz., lb.:oz. See Grainger.com® for standards and regulation information.

Shipping and Receiving Scales

- LCD

More scales are available online, see Grainger.com®.

MEASURETEK

Nos. 12R969 and 12R971 to 12R973 are simple to operate and feature a compact design, rugged ABS housing. Compatible with UPS Worldship.

No. 12R970 is NTEP, UL Approved and allowed for use in legal-for-trade applications. Functions include weighing, counting, checkweighing, and percent weighing. Feature accumulation and hold modes. Constructed with die-cast aluminum base, stainless steel platter, and aluminum housing indicator with big LCD display and blue backlight. Include USB/ RS232 and cables to communicate with PC.

C11 CATAPULT

Compact with built-in carrying handles and feature modes for both weighing and dynamic weighing. Also feature display hold function. Operate on AC adapter or 3 C batteries (not included), with power saving auto shutoff mode. Weigh in kg or lb.

ES SERIES

Features integral stainless steel platform and adjustable stainless steel indicator mounting plate, and a large 1" display. 150% overload protection. Coiled indicator cord allows mounting indicator to scale, table, or wall. Easy 2-button use with auto shutoff and stability and overload indicators. Weighs in kg, lb., lb./oz.

SD SERIES

Portable bench scales feature painted steel platform and indicator with 2-button operation. Applications include weigh, dynamic weighing, and a display hold. Coiled 9-ft. indicator cord and brackets allow mounting indicator to table or wall. Power with included AC adapter or up to 360 hr. with 3 C batteries (not included). Weigh in kg.

RUBBERMAID

Rugged 18-ga. scale designed to handle heavy packages and containers with a low-profile, nonskid platform. Remote ½" wall-mount indicator saves counter space and provides eye-level, readout (9-ft. cord reach) for employee-safe receiving. Tare feature removes weight of container.

TE SERIES

Durable and portable scales feature a separate platform and control panel with readout.

MEASURETEK QUALITY SCALES OHAUS

Digital and Counting Scales

More scales are available online, see Grainger.com®.

EHC SERIES

Functions include count, tare, preset tare, Hi/Low, and accumulation. Feature robust ABS housing with removable stainless steel platter, LED, RS232 interface, and 256 memories. Internal counting resolutions of 1:600,000 and a 30000. Powered by AC adapter and NiMH rechargeable battery. Meet UL and CE standards.

RANGER® COUNT 3000

Feature stainless steel pan with ABS housing, 30 item library, 210 hours of battery life, APW auto-optimization, numeric keypad, and low battery indicator. Stabilization occurs in under 1 second. Functions include weighing, parts counting, checkweighing, checkcounting, and accumulation. Include RS232 and 3 backlit LCDs. Weigh in kg, g, lb., oz., and lb.:oz.

RANGER® 7000

Feature a 300 item library for storage, keypad with graphical interface, standard RS232 or USB device. Additional connectivity options include a second RS232 or Ethernet, and standard USB host port for bar code scanner or flash drive. Application modes include weighing, parts counting, percent weighing, check weighing, dynamic weighing, filling, formulation, differential weighing, and density weighing. Backup, restore, and clone user profile library using USB port. Weigh in kg, g, lb., oz., lb.:oz. For standards and regulations, see Grainger.com®.

MEASURETEK QUALITY SCALES OHAUS TAYLOR

Digital Packaging and Portioning Scales, Dry Use

- LCD

More scales are available, see Grainger.com®.

Measuretek EHC-W Series—Compact scales include AC adapter, rechargeable battery, RS232 port, and stainless steel pan. Functions include weighing, counting, check weighing, percent weighing, tare, and accumulation. Weigh in g and lb. Meet FCC standards.

Valor™ 1000—Economical, multipurpose, and compact scale has a backlit display and ABS plastic housing. Functions include weigh, accumulate, and checkweigh. Operate on AC adapter or 80-hr. internal rechargeable battery. Weigh in lb., oz., kg, g. NSF Listed/Certified and supports HAACP systems.

Valor™ 3000—Constructed with stainless steel housing and pan with added chemical resistance. Functions include weighing, percent weighing, combined zero/tare, and specific gravity (S). Operate on AC adapter or up to 100 hr. on 4 C batteries (not included). Weigh in kg, g, lb., oz., lb.:oz., fluid oz. NTEP Certified and NEMA 4X/IP65 models available. NSF Listed/Certified, USDA/AMS Accepted, and supports HAACP systems.

TE Series—Compact scale is ideal for commercial foodservice applications. Include a tare function and auto-off feature. Run on batteries (not included) or AC adapter. NSF Listed.

Mechanical Hanging Scales

No. 3JKN1 is constructed of heavy-gauge japanned steel with a large, easy-to-read dial. Includes convenient zero adjustment screw and plated top loop and bottom hook. Nos. 3JKN5 and 3JKN7 are extra heavy-duty steel and cast iron construction and have a recessed pointer with deeply embossed numbers and graduations. Nos. 5A354 and 4VG68 feature a heavy-gauge solid brass construction with precision steel springs. Can be used in salt water applications. Feature avoirdupois and metric graduations.

GA SERIES

Features a stainless steel platform, leveling feet , auto shut-off, and tare function. Weighs in kg, g, oz., lb., and pcs.. CE Certified.

HL-WP PORTABLE SERIES

Compact and portable IP67 washdown scales are great for harsh industrial environments, wet areas, and kitchens. Constructed with a stainless steel body and removable pan that can be fully submersed in water for cleaning. Use 6 AA batteries or AC adapter (optional). Battery level indicator with auto shut-Off. Weigh in g, oz., and lb. Meet NSF and HACCAP standards. No. 3JKD3 is NTEP legal-for-trade.

YA SERIES

Functional, portable design includes high-contrast backlit LCD, stainless steel weighing pan, hinged pan cover, low-battery indicator, and auto shut-off. Operate on 2 AAA batteries (included). Weigh in g, oz., ct., and gn.

HH SERIES

Compact and portable unit has a low-battery indicator and overload and underload indicators. Constructed of rugged plastic with a protective snap-on cover and button-activated luminescent display. Easy to calibrate. Operate on 2 AAA batteries (included). Weigh g., oz., dwt., and t oz.

Calibration Weights

- More sizes, documentations, and classifications are available online, see Grainger.com®

For routine calibration of scales or verification checks.

CAST IRON

Painted weights with an adjustable sealing cavity. Typical application is field standard for testing industrial weighing devices.

Slotted

Weights with a slot to stack on a hanger for checking or calibrating devices that do not have a surface to stack weights.

STAINLESS STEEL

Type 2 design weights feature a sealing cavity for adjusting material in 100g or larger weights. Applications include field standard for testing light industrial weighing devices.

Types of Disposable Cups

Poly-Coated (PE) Paper
Polymer coating provides extra insulation and makes these cups ideal for hot or cold beverages. This material also helps protect the outside of the cup from weakening due to condensation or "sweating."

Foam
A great option for hot or cold beverages, foam cups hold their shape better than paper cups. 1-pc. molded construction provides effective insulation in a durable, low-cost vessel.

PET
Polyethylene terephthalate, or PET, is part of the polyester family and is lightweight and proficient at blocking moisture. PET cups are also strong and impact-resistant. Use only with cold beverages. Recyclable.

PLA
Polylactic acid fiber is a nontoxic, sustainable material made from plant-derived materials. Provides an eco-conscious alternative to petroleum-derived products.

Polystyrene
Heavy-duty, flexible cups have a medium wall construction that flexes but still remains crack-resistant, making them a perfect choice for parties and catered events.

Napkin Dispensers

Dixie Ultra® dispensers feature quick and simple loading, visual appeal, and are simple to use. One at a time dispensing is hygienic and helps reduce costs. No. 4DB81 is wall mountable, but is easily adapted for counter freestanding operation with optional No. 4DB84 base and pole stand. No. 455A04 includes a table top stand or can be wall mounted.

Mini

SmartStock® Dispensers and Cutlery

Enclosed dispensers store utensils and distribute one at a time for hygienic dispensing. Also help reduce waste and countertop clutter. Touchless Dispensers dispense individual utensils with guests only touching what they use; as one utensil is taken, another one automatically drops into tray. Mini Dispensers are 30% shorter and take up 30% less counter space versus the Classic SmartStock® Dispenser. Dispensers work with preassembled disposable cutlery refills, see table below.

NEWCO BUNN CRESTWARE

Airpot and Infusion Coffee Brewers

- NSF Certified (except leaver airpots)
- For coffee, see page 1437

Stainless steel units brew directly into airpots (sold separately). Newco® No. 48FP52 is a fresh water system and only boils the required amount of water that is poured into the brewer, for a fresher cup of coffee. No. 48FP57 features a dump valve system and a water level detection system and a tank on/off switch. Bunn® airpot brewers include hot water faucet and cold brew lockout capability. SmartWAVE® brewers are low-profile and feature an energy-saver mode.

Infusion brewers feature preinfusion and pulse brew, energy saving mode, and 3 separate brewing profiles. Also allow full- and half-batch brewing.

Scales

TAYLOR

Mechanical Portion Control— Rotating dial allows container weight deduction and ingredient measuring. Removable stainless steel platform and shatterproof lens protect dial, except plastic model No. 3NZN2. No. 3NZN2 includes dishwasher safe bowl and lid and weighs in ¼ oz. and 5g increments.

Digital Portion Control—LCD readout with tare and auto/off features. Overload and low battery indicators. Nos. 3NZG9 and 3NZH1 include AC adapter or operates on one 9V battery. All others run on batteries only.

SANI-LAV

Stainless Steel Food Processing Tools

Electropolished finish enhances corrosion resistance and allows easier cleaning.

Shovels—D-handle shovels are specifically designed for use with food, drug, beverage, and chemical processing equipment. Can also be used as a snow shovel.

Forks—For meat, poultry, and other industries where cross-contamination is a concern.

Scoops—Pharma scoops are ideal for use in the pharmaceutical industry and other hygienic applications.

Pails—Heavy-duty, corrosion-resistant construction with no rolled edges or areas to collect dirt or bacteria.

Mixing Paddles—Durable paddles are ideal for moving bulk materials.

Dump Buggies—Heavy-duty construction with a reinforced bottom plate and solid top rim. Standard lifting fitting can be used with most standard loaders and dumpers. Include push handle, replaceable molded plastic wheels, stainless-steel spanners, nuts, and bolts. Use in food processing plants to move food products from one operation to another.

Popcorn Makers and Wagons

Popcorn Makers have enclosed heat lamp and heated corn deck that keeps popcorn warm. Auto shut off safety features included with Goldrush, T-2000 and T-3000 models. Eye level rocker control switches and illuminated kettle heat switch makes machine easy to operate. The 1-pc., nickel plated all steel popping kettle features a clean-in-place design. No. 31EV90 is steel with powder-coated finish to resist scratching. Tempered safety glass windows resists scratching. No. 31EW23 includes 32 oz. popper and caramelizer mounted on welded stainless steel table; ideal for caramel corn and cheese corn production.

Commercial Refrigerators and Freezers

Provide years of reliable service in demanding commercial applications. Most models come with heavy-duty casters (height does not include casters).

True®—Include NSF-certified temperature gauge and a dynamic condenser that delivers superior performance in high-temperature food service environments. Adjustable shelves feature stainless steel supports and chrome-plated clips. Freezer lids include locks, except for Nos. 6PPK6 and 6PPK8.

Everest®—Feature 5-yr. manufacturer's warranty on compressor and 2-yr. on parts and labor. Reach-In units have a digital thermostat and top mount condensing unit. Glass door models are bottom mount. All units are lockable, except No. 20CA57.

Note: For repair parts, go to Grainger.com®.

Refrigerator/Freezers

Top Freezer, Right and Reversible Door Hinge— Brightly-lit interior, clear dairy door, and Space Wise® organization system makes it easy to find exactly what you need. Humidity-controlled crisper drawers keep fruits and vegetables fresh. Stainless steel exterior units are resistant to fingerprints, easy to clean, and the interiors are designed to contain spills for easier cleanup.

Side-by-Side, Reversible Door Hinge—Adjustable interior storage gives you over 100 options to organize your refrigerator. Humidity-controlled crispers drawers keep fruits and vegetables fresh and PureSource® water filtration keeps clean, impurity-free water right at your fingertips. A full-width freezer shelf provides more usable space for increased storage. Energy-efficient technology will automatically put unit into energy-saving mode if not opened for 24 hours.

French Door—Adjustable interior storage and flip-up and slide-under shelves make organization easy and let you store tall or large items. Effortless™, easy-glide crisper drawers are humidity controlled and configurable to be side-by-side or stacked. PureAir Ultra® filters keep the air in your unit fresh and PureSource® Ultra ice and water filtration provides pure, clean water and ice.

Under Counter Dishwashers

UltraQuiet™ Plus—OrbitClean® spray arms provide an excellent clean with 4 times better water coverage than traditional spray arms. DishSense™ technology automatically adjusts the cycle times based on how much cleaning the dishes require. Large-capacity unit fits up to 14 place settings and upper rack adjusts to fit tall or odd-shaped items. Also feature multiple cycles options including a quick wash and rinse only cycle.

UltraQuiet™ III—Multiple cycle options include a gentle setting for cleaning fine china and crystal and an energy efficient no-heat dry option. Set your dishwasher to start at a specific time with the delay start feature and adjust washing pressure with AquaSurge™ technology. Large, multicompartment silverware basket has room for over 180 items.

Power Cords

FRIGIDAIRE

Round power cords for ranges and dryers are lengths of electrical cable specifically designed to connect appliances to a compatible outlet. These heavy-duty cords have a larger diameter (lower gauge) than general purpose power cords, with a molded plug at one end and bare wire at the other end for wiring to the appliance. Eyelet connector ends. 125/250VAC. UL Listed.

Pillows

SURE CHECK

Self-deodorizing, nonallergenic, and flame-retardant pillows have thousands of microscopic vents covering the entire pillow. These vents help destroy bacteria by allowing fresh air to flow through the pillow.

GOLD CHOICE

The poly-cotton ticking with extra hollow siliconized fiber fill of these pillows provides ideal comfort and support.

MICROVENT SOFT

Durable without sacrificing comfort, the microscopic air vents as well as an antibacterial, antistatic, flame-retardant, and fluidproof finish make these pillows an ideal choice for healthcare facilities.

MICRO DENIER

Soft micro fiber filling provides a down-like feel using blown polyester. Pillows have a 100% cotton T230 ticking with piped edges.

MARTEX® BRENTWOOD

Cluster fiber pillows have a down-like softness and are easy care. Soft and comfortable microcluster polyester fiber fill with polyester/cotton cover.

COMFOREL®

The 100% cotton T230 ticking with piped edges and cluster fiber fill provide both comfort and support. The hypoallergenic and antimicrobial protection inhibits a variety of odor causing molds, bacterias, and funguses. Washable.

ECOPURE®

Soft, warm, and comfortable fiber fill reprocessed as a recycled, environmentally friendly product with cotton cover.

Every Mattress Needs Protection

Bedding Encasement Systems

- Machine washable

Feature the innovative Miracle Membrane® to keep water and stains out while the mattress protector remains breathable and comfortable.

AllerZip® Smooth—6-sided waterproof protection has a 3-sided zipper system with Secure Seal® to provide barrier against allergens, dust mites, human contamination, pet dander, pollen and mold. Certified to be asthma and allergy friendly.

- **Protect against bed bug entry, exit, and bites**

BugLock® Plus—Provide 6-sided bed bug entry/exit prevention and is bite-proof and waterproof on the top surface. 3-sided zipper system with Secure Seal® to protect against bed bugs, dust mites, human contamination, allergens, and other irritants.

Waterproof Quilted—Waterproof top surface protects against bacteria, dust mites, human contamination, allergens and other irritants.

Basic—Ultra-thin fabric has 4-way stretch barrier that allows for flexibility. Waterproof top surface and protection against bacteria, human contamination, dust mites, allergens, and other irritants.

Premium—Waterproof top surface and durable ultra-thin fabric has 4-way stretch barrier that can be laundered over 200 times. Guards against bacteria, human contamination, dust mites, allergens, and other irritants.

Box Spring Encasements—Extend an impenetrable barrier that protects against allergens, dust mites, and bed bug entry and escape.

- **Protect against bed bugs**

LOCK-UP®

Bedding Encasements

Lock-Up® pillow, mattress, and box spring encasements trap any existing bed bugs and keep invading bugs out. Pillow and mattress covers also protect against allergens and dust mites, and have soft, breathable fabric for comfortable, sound sleep. Pillow cover is water-resistant. Premium mattress covers have a waterproof lining and feature a double-zipper enclosure for added protection. Standard mattress covers have a waterproof top and also feature a double-zipper enclosure. Box spring covers are durable stretch knit with double-knit corners for snag protection.

Institutional Bunks and Beds

CORTECH

- Polyethylene construction

Feature durable, one-piece, rotationally-molded design for increased strength. These beds are easy to clean and maintain and are stain-resistant. Ideal for use in correctional and behavioral health facilities, residential institutions, and public safety facilities. Endurance Bunk has molded-in side slots for property box storage and can be reverse-mounted to eliminate property box storage feature. Endurance Bed 2.0 is designed with lower side rails that help make entry and exit easier, and end shelving provides open storage for personal items.

Electric Irons and Steamers

Electric Irons—Steam irons provide vertical and horizontal steam bursts. Auto-Off. Expert Finish™ has 9 temperature settings with electronic LCD control. 1700W. 2-Way models automatically reduce sole plate temperature if iron is not moved while in vertical position for 3 min. Adjustable temperature and steam controls.

▪ 1700W (Expert Finish™); 1100W (2-Way) ▪ Self-cleaning ▪ Spray mist

Cord-Keeper™ Electric Steam Irons—Feature adjustable temperature control, nonstick soleplate, and anti-drip function to help reduce spills and conserve water. Safety auto shutoff feature turns iron off when left horizontal for 30 sec., vertical for 8 min. Cord retracts for easy storage.

▪ 1400W ▪ Self-cleaning ▪ Spray and burst of steam

Electric Upright Steamer—Compact system has a telescoping hanger pole, pants-clip option, and fabric brush to quickly refresh guest clothing. Also features Auto-Off, crease attachment, rotating hanger, and removable, extra-large water tank.

▪ 1500W ▪ Steam ready in 45 sec. ▪ 90 min. steam output

Electronic Steam Press—Compact, portable press has fabric-specific electronic heat settings, variable steam selections, and steam bursts. Auto-Off has an alarm. Locks for storage and portability. Includes washable pad cover, pressing cushion, spray bottle, and measuring cup.

▪ 1500W ▪ Easy-fill tank ▪ Die-cast aluminum base

Pool Care Troubleshooting Guide

Skin and Eye Irritation—Caused by improper pH levels of the water in your pool or spa, especially a pH level of below 7. Test the water pH level; adjust as needed to maintain the proper pH range of 7.2 to 7.6. Shock to destroy any contaminants.

Algae Problems—Test and adjust your pool or spa water pH level to 7.4. If you are seeing the beginning of algae growth, shock the water. Wait 24 hr. after shock and then use an algaecide.

Cloudy Water—Check the filter system and pump to make sure they are operating effectively. Check the filter for holes that are letting fine particulars pass through. Make sure you are running the filter long enough to clean your pool. Test water for total alkalinity and pH and adjust as needed. Check the chlorine level and check for the presence of dead algae. Shock the water. Use a clarifier for small particles that the filter does not catch.

PurTest® CLOROX Pool&Spa KEM-TEK pool & spa care.

Pool Chemicals

Water Analysis Kits—Detect a wide range of bacteria, including E. coli, pseudomonas, Klebsiella, and salmonella.

Step 1 Balance—Balancing your pool water ensures that it has an optimal pH level, including total alkalinity and mineral content levels.

Step 2 Chlorinate—Chlorinating your pool water properly sanitizes it, killing harmful bacteria and aiding in the control of algae. No. 494P17, 6 and 1 formula tablets control algae and prevents corrosion and scale while killing bacteria. Removes organic contaminants for clear water, making water silky and smooth. Can be used as a skimmer, feeder or floater application.

Step 3 Pool Shock—Skocking formulas have algae killing crystals which controls and kills off green, black, and mustard algae along with bacteria. Reduces chlorine odor and removes swimmer containments such as body oils, sweat, and urine. Shocking the water cleans cloudy water without impacting pH, helping the water stay clear. No. 494P19 is a 6 and 1 formula. No. 494P18 is a 4 and 1 formula and comes in a bag.

Algaecide—Quickly and effectively kills green, mustard, and black pool algae. For use with all pool types.

Remedy—Algaecides stay active in your pool water, with minimal loss of effectiveness due to water temperature, sunlight or swimming use.

Clarifiers are used from time to time when your pool water needs products to clarify and help filtration of fine particles. For instance, if dead algae is present too much calcium or metals can build up in your water.

Pool Lifts and Accessories

SR Smith

- ADA compliant

Lifts provide access to aquatic environments for both mobility-challenged individuals and seniors. Lifts feature true operational redundancy and can be operated from the control box and the handset. Hi/Lo models can be used for facilities that have both in-ground and above-ground spas and pools. Spa models are designed for above-ground pools and spas up to 48" above the pool deck. Include battery, charger, battery console, and waterproof control.

Note: Deck profile sheet required with order; returns not accepted.

Splash!™—Removable lifting system easily detaches from the stainless steel deck anchor. No. 11Z854 is a CA package which includes arm rests, cover, and spineboard attachment.

PAL® (Portable Aquatic Lift) and PAL2®—Lifts are portable and freestanding while meeting ADA requirements and can be fixed to the deck with optional Pool Lift Wheel-Away Kit No. 16V951, sold separately. Can be conveniently stored when not in use.

Pool and Spa Accessories

Leaf Rakes—Use a mesh netting to skim the bottom of the pool and remove large types of debris and leaves.

Leaf Skimmer—Designed to smoothly glide over the surface of the pool and collect lose particles. Built with either aluminum or plastic frames with a mesh net.

Pool Vacuums—Use with either concrete/gunite pools or pools with vinyl liner. Built with attached weights to slide on the pool floor and collect debris that has settled.

Vaccuum Hose—Connect to a vacuum head and filter to remove debris from the bottom of the pool.

Telescopic Poles—Connect to multiple tools such as a skimmer or brush and can extended or detract to reach various lengths throughout a pool.

Pool Brushes—Use the bristle appropriate for the type of pool. Brushes sweep the bottom and sides of pools to remove stains.

Robotic Pool Cleaner—Cleans, scrubs, vacuums, and filters in-ground pools. Includes remote control.

Aluminum Bleachers

NRS National Recreation Systems

Feature all aluminum construction. Tip & roll bleachers have swivel casters for movement, and caster brakes keep the bleacher from rolling when stored as well as non-marring rubber footpads to protect wood floors. Always check your local code for bleachers to ensure you are compliant. ADA options are available; go to Grainger.com® and search "ADA Compliant Aluminum Bleachers".

Commercial-Grade Resin Chairs, Tables, and Umbrellas

Grosfillex

Durable, weather-resistant outdoor furniture is constructed for heavy-duty use in commercial environments. Molded melamine table tops are highly weather-resistant, as well as burn-, heat-, and scratch-resistant, to help minimize maintenance costs. ASTM tested 400-lb. weight capacity meets the high performance standards for nonresidential use. Include manufacturer commercial warranty.

Market Umbrellas—Provide shade and protection from the elements in outside food areas. 2-pc. wooden construction includes corrosion-resistant brass connectors, durable and color-fast canopy acrylic fabric, 8 ribs and a wind vent.

Umbrella Bases—Secure umbrellas to tables. No. 6DVK1 is sand- or water-filled and features a nonmarring resin glide. No. 6DVH3 is cement-filled and features molded anchor bolt holes to secure base to deck. UV-resistant and easy to clean with soap and water.

Pole and Crank

Motor with Remote Control Operation

KEYSTONE FABRICS

Exterior Sun Shades

- Easy-install system

Motor with Remote Control Operation, PVC Coated Polyester Yarn—Powered by a 12-ft. AC cord on right side of shade (cannot be moved to left side). A cable system secures shade and helps prevent flapping during light winds. The remote control is a multi-channel remote. Each remote can operate up to five shades. Hardware is oil-rubbed bronze and power cord and remote are white. Fabric comes standard as a reverse roll.

Pole and Crank Operation, PVC Coated Polyester Yarn—A flexible bungee system helps prevent flapping in light wind. Includes a 48" pole (with receiving ring on the right side of the shade). Hardware and crank pole are oil-rubbed bronze. Ring can be moved to the left side of the shade. Fabric comes standard as a forward roll.

enMotion® Motion-Activated Roll Towel and Dispenser Systems

enMotion® motion-activated paper towel systems combine hands-free, touchless hygiene and jam-free performance for state-of-the-art, quiet dispensing with an attractive, sleek design. One-at-a-time automated dispensing helps prevent cross contamination and improves hygiene. Convenient and customizable settings include: delay, sheet length, and dispense mode so hands-free dispensers can be programmed to meet your specific operational needs, while also helping to reduce waste. Each touchless dispenser features a set of batteries with excellent battery life to dispense up to 150 rolls, help reduce maintenance, and improve reliability. They come with a one-time, lifetime sublease agreement from Grainger (see bottom of page), backed by a 10-year warranty from Georgia-Pacific.

enMotion® brand towels are soft, thick, and absorbent. Long-lasting rolls help reduce the time spent filling dispensers. EPA-Compliant, recycled rolls are also available.

10-in Wide enMotion® and enMotion Impulse® Paper Towel Rolls and Dispensers

- Hardwound rolls
- Motion-activated dispensers

Disposable, absorbent paper towel rolls are designed to be compatible with corresponding dispensers. Dispensers include 3 sensor range settings and time-delay settings (1, 2, or 3 seconds). All are plastic, surface wall-mount. No. 4HVJ1 is water-resistant for use in washdown or damp areas. Dispensers are proprietary and are designed to be used with compatible hardwound paper towel rolls.

8-in Wide enMotion® Flex Paper Towels Rolls and Dispensers

- Hardwound rolls
- Motion-activated dispensers

Disposable paper towels dry hands, wipe surfaces, and clean up spills. Hardwound rolls are compatible with corresponding dispensers. Hands-free dispensers offer 99% jam-free dispensing. Dual-roll, auto-switch technology uses the smallest roll available first and uses 100% of the roll before switching to the standby roll to ensure zero waste. The intuitive design makes refilling easy. Automated dispensers are proprietary and are designed to be used with compatible hardwound paper towel rolls.

8-in Wide enMotion® and enMotion Impulse® Paper Towel Rolls and Dispensers

- Hardwound rolls
- Motion-activated dispensers

Paper towel rolls offer softness and absorbency to dry hands and clean surfaces quickly. Rolls are compatible with corresponding dispensers. Dispensers have adjustable settings and offer 99% jam-free dispensing. All dispensers are plastic, surface wall-mount, except No. 2NY13 is stainless steel, recessed mount. Batteries included. Nos. 2NY14 and 2NY15 are ADA-Compliant trash receptacles for use with No. 2NY13 dispenser. No. 4DB79 is a mounting bracket that quickly converts a facility's existing recessed towel dispenser door to a mounting platform for enMotion wall-mount automated towel dispensers. Motion-activated dispensers are proprietary and are designed to be used with compatible hardwound paper towel rolls.

Dispenser Sublease Information

Note: The enMotion® towel dispensers, owned by Georgia-Pacific Consumer Products LP (GP), are not available for sale, but are subleased to end user customers by Grainger, an authorized distributor of these products. The Grainger price is therefore a one-time sublease acquisition fee. The sublease requires that only Georgia-Pacific enMotion® products be used in these dispensers. By paying the one-time sublicense fee, you hereby agree to be bound by the sublease. You can review the sublease by visiting Grainger.com® listing for the relevant product.

Pacific Blue Ultra™ Paper Towel Rolls and Dispensers

No. 52RW80

No. 52RW81

- Hardwound rolls

High-capacity paper towel rolls dispense one-at-a-time. Use with compatible proprietary Pacific Blue Ultra motion-activated or pull paper towel dispensers. Motion-activated dispenser offers touchless, hands-free dispensing using infrared sensors. Manual pull dispenser has no buttons, levers, or cranks, eliminating any touch points that would spread germs.

Compact® Coreless Toilet Paper and Dispensers

TOILET PAPER ROLLS
Coreless design eliminates stub roll waste. Poly package reduces inventory space and provides easier product storage than corrugated boxes.

TOILET PAPER DISPENSERS
Covered design fits any decor and allows one-at-a-time roll usage, while protecting the spare roll.

TOILET PAPER ADAPTER SPINDLES
Cost-effective way to double tissue capacity using your existing standard-size dispenser.

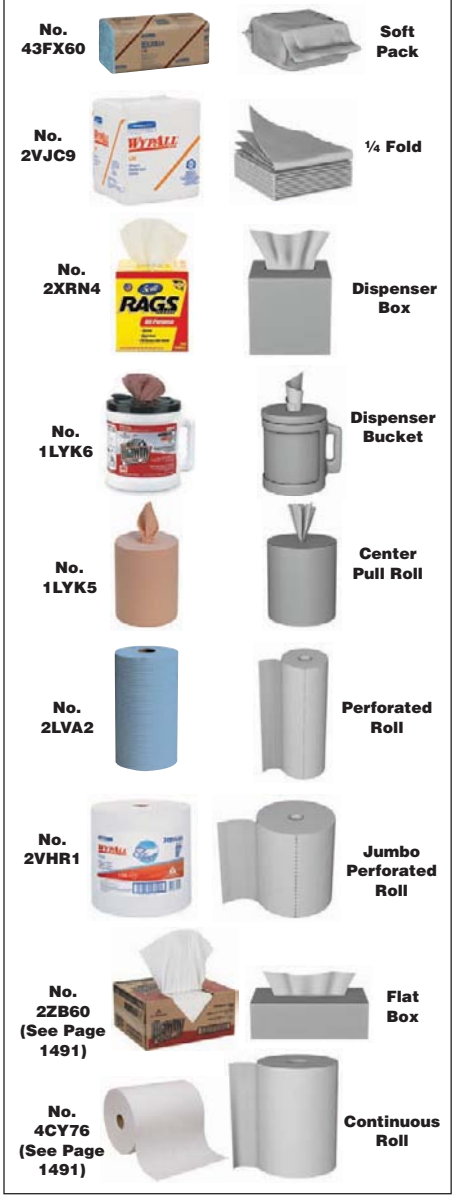
General Purpose Dry Wipes

Dry wipes absorb spills, clean messes, and dust surfaces. Use as an alternative to cloth towels to help prevent cross-contamination and to paper towels for added strength. Wipes come with different levels of absorbency and strength.



Light-Duty Small Task Wipes—Single-use task wipes are commonly used to clean smaller spills and messes on glass and smooth surfaces.

Medium-Duty Routine Task Wipes—Wipes have a cloth-like softness for cleaning and polishing, as well as wiping hands and faces.

Heavy-Duty Large Task Wipes—Clean large surface areas on equipment and in vehicles. Disposable, absorbent alternative to economy rags.

Extra Heavy-Duty Repeat Task Wipes—Resistant to harsh cleaning agents, these wipes can be used many times before discarding. Use on abrasive surfaces to clean up oil, dirt, and grime. An alternative to premium rags and shop towels.

Automatic Dry Wipe Dispenser & Rolls

Continuous-roll, wall-mount dispenser is sensor-activated to dispense dry wipes automatically. Touchless operation reduces the chance of cross-contamination and the spread of germs. Use task wipes for routine cleaning and polishing, as well as wiping hands and faces.

Critical Area and Delicate Task Wipes

Kimberly-Clark PROFESSIONAL

- Low lint

Soft and nonabrasive, wipes are used on delicate items like small parts and lab instruments and won't leave fibers behind on electronics or lenses.

KimTech Prep® Scottpure™— Cloth-like softness with high absorbency for cleaning and disinfecting.

KimTech Prep® Kimtex™—Wipes are acid-, base-, and solvent-resistant to prepare surfaces and clean up grease and oils.

Dry Wipe Bucket Systems

Rubbermaid Commercial Products HYGEN | TOUGH GUY | GP PRO | Kimberly-Clark PROFESSIONAL

Bucket systems hold dry wipes while cleaning solvents of choice can be added to create wet wipes for appropriate cleaning tasks. **Starter Kits** are for controlled chemical handling and include closed-top dispensing bucket and dry-wipe rolls. **Wipe Refills** are for use in dry-wipe bucket dispenser systems. **Bucket System Dispensers** have tight-fitting, resealable lids to help prevent spills. Dry wipes are not included.

XLERATOR® Touchless Hand Dryers

- Up to 95% cost savings compared to paper towels
- Use up to 80% less energy than conventional models
- UL Listed and CE Certified

Innovative hand dryers feature reliable performance and can dry hands up to 3 times faster. These industrial models come with adjustable speed and sound. BuildingGreen® Approved and can help you qualify for LEED® v4 credits and Green Globe Certification.

Heated Air—Feature adjustable heat setting controls and an externally-visible LED service light.
- 8 sec. dry time
- 3.7 Wh energy per use

Non-Heated Air—No-heat technology helps provide reliable and highly-efficient performance.
- 10 sec. dry time
- 1.7 Wh energy per use

ThinAir®—Surface-mount design has a slim profile, adjustable heat setting, and externally visible service LED.
- 14 sec. dry time
- 3.7 Wh energy per use
- C-UL Listed

Accessories—Wall Guard Nos. 15Z471, 15Z472, and 38G831 feature an antimicrobial surface. Xchanger Combo Kit Nos. 38G830 and 38G829 include a recess accessory.

Dyson Airblade™ Hand Dryers

dyson

- 110 to 127V
- Integral nozzle

Touch-free design provides an extremely fast and hygienic way to dry hands. 50% quieter than original Dyson Airblade dryers and tough enough for high-traffic areas. HEPA filter removes 99.97% of bacteria from air used to dry hands. Engineered to fit a variety of restroom environments. Nos. 489J80, 489J76, and 489J78 are tap-operated combination units that allow you to wash and dry hands at the sink.

Correct Handwashing Technique

Hands should be cleaned, at minimum, at the end of each work period, prior to breaks, and when visiting the bathroom. Developing good hand-washing technique is essential to ensure hands are thoroughly clean. After hands are washed, it is also important to make sure that they are thoroughly rinsed and dried to help keep skin from chapping and cracking.

Proper technique includes the following:

Rub palm to palm

Rub palm over the back of the hand, fingers interlaced

Palm to palm fingers interlaced

Fingers interlocked into palms

Rotational rubbing of thumb clasped into palm

Rotational rubbing of clasped fingers into palm

Glass and Multisurface Cleaners

Glass Cleaners—Loosen soil upon contact. Remove fingerprints and smudges without streaking or leaving a film. Also can be used to clean chrome, stainless steel, mirrors, ceramic tile, enamel, plastic, and other hard surfaces. Windex® cleans with Ammonia-D® for a streak-free shine and contains no phosphates. No. 4TKD9 is made with plant- and mineral-based cleaning ingredients and is EPA Safer Choice Certified.

Glass and Multisurface Cleaners—Use on most washable surfaces, including chrome, stainless steel, bathroom fixtures, and laminate countertops. No. 2ZWJ9 is made from 98% naturally derived biodegradable ingredients.

Natural Odor Eliminators

freshwaveIAQ Natural Odor Eliminator

Natural, nontoxic ingredients bond with odor molecules to completely eliminate smells in the air, woven materials, confined spaces, and anywhere else odors linger. Gels feature a continuous release formula to provide safe, effective odor control 24/7. Odor machines disperse submicron air freshening molecules into the air for greater penetration. Carpet and upholstery products penetrate deep into carpets and textiles to remove odor molecules.

Metered Dispensers

TimeMist®

- More fragrances are available, see Grainger.com®

Dispensers—Classic models activate a refill every 15 min., 24 hours a day for 30 days. 6000 cu. ft. coverage. The Settings Dispenser features 3 time settings and allows users to control the spray intensity and frequency for up to 90 days.

The Programmable Plus Dispenser allows 1- to 59-min. spray intervals plus an audible alarm option. The Virtual Janitor Dispenser provides an automatic cleaning and deodorizing system for urinals and commodes. 24/7 operation, refill lasts up to 30 days. 6000 cu. ft. coverage.

Oil-Based Dispenser—Lasts up to 60 days and cover 3000 sq. ft. Polymer wick inside refill absorbs essential oils and evaporates out, continuously releasing fragrance without a power source.

Refills—Counteract odors and leave a pleasant scent. Air sanitizer refills remove airborne bacteria.

Degreaser Types

SOLVENT—
As a degreaser component, a solvent is a substance in which another substance is dissolved. Butyl is the most commonly found solvent in degreasers used to dissolve petroleum grease and fatty oils.

NATURAL SOLVENT—
Biodegradable natural solvents are derived from organic sources. Commonly used natural solvents are citrus (usually d-limonene), pine (derived from pine oil), and soy.

NON-SOLVENT—
Popular in states that restrict certain solvents, this option does not contain any solvents, offering added safety.

Non-Solvent Cleaners/Degreasers

Tough Guy™—Formula contains no chlorinated solvents and a 4.75% VOC content.

Simple Green®—Water-based liquid concentrates are nontoxic, biodegradable, nonhazardous, phosphate-free, and VOC compliant. Crystal Simple Green® has no added fragrance or color and is NSF A1 A2, A4, A8, B1, and C1 rated.

Starpower Super Cleaner/Degreaser™—A biodegradable, water-based formula cleans greasy engines, ink, hard water deposits, mildew, paint, printing equipment, rust stains, tar, train cars and engines. USDA approved for use in food processing facilities. Nontoxic and nonflammable.

Diversey™—All-purpose cleaner and degreaser uses a blend of detergents and a water-soluble solvent to remove tough soils. Can be used in a pressure washer.

Disinfectants and Sanitizers Information

Disinfectants—A substance, or mixture of substances that destroys or irreversibly inactivates bacteria, fungi and viruses, but not necessarily bacterial spores, in the inanimate environment.

Sanitizers—A substance, or mixture of substances that reduces the bacterial population in the inanimate environment by significant numbers, but does not destroy or eliminate all bacteria.

- Any product that claims to "kill" anything needs to be registered with the EPA
- All registered products must be used exactly as the labels state they are to be used to validate the kill claim
- Disinfectants usually call for 1 to 10 min. wet contact vs. Sanitizers that usually call for 30 sec. to 1 min. contact

Disinfectants and Sanitizers

Purell

Easy-to-use, one-step formulas work across most hard and soft surfaces. Healthcare disinfectants feature the lowest allowable EPA toxicity rating and kill germs in just 30 sec. including MRSA, VRE, and norovirus. Food service sanitizers eradicate norovirus, E. coli, and salmonella. Can safely be used on food contact surfaces. Professional disinfectants kill 99.9% of surface germs including fast-spreading cold and flu viruses.

Disinfectants

Disinfectant Cleaners with Bleach—Cleans, disinfects, and deodorizes hard nonporous surfaces. Eliminates waste with Smart Tube® technology, which allows user to spray all the liquid to the bottom of the bottle. Effective in 30 sec. against pseudomonas, salmonella, staph, Rhinovirus, Hepatitis A, and Influenza A2/Hong Kong virus.

Disinfectant All-Purpose Sprays and Glass Cleaners—Combine a glass cleaner, all-purpose cleaner, and disinfecting cleaner into a single hospital-grade disinfectant/bactericide/fungicide/virucide/deodorizer. Effective against Influenza A2/Hong Kong virus, Respiratory Syncytial virus, Vaccin, Herpes Simplex Types 1 and 2, and HIV-1. Nos. 36XX41, 22C497, and 22C498 are EPA Registered.

Cleaners/Degreasers/Disinfectants—Clean and degrease nonporous surfaces. Disinfectant formula is bactericidal and virucidal. Spray Nine® sanitizes in 10 sec. and disinfects against viruses in 30 sec.

Professional Odor Eliminator and Deodorizing Disinfectants—Kills 99.99% of germs. Can be used as an air freshener, laundry freshener, mopping solution, pet odor eliminator, and spot treatment. 1 gal. concentrate makes up to 32 gal.

Surface Sanitizer/Disinfectant

BEST SANITIZERS INC.

Alpet® D2 Surface Sanitizer/ Disinfectant—No-rinse, alcohol/quat formula will sanitize a food contact surface in just 60 sec. and completely disinfects non-food contact surfaces in 5 min. Highly evaporative, non-corrosive and ideal for water sensitive equipment. Kosher, Pareve, and Halal certified. NSF listed, D2 classification.

Alpet® D2 Surface Sanitizing Wipes— Surface wipes Nos. 36P196 and 36P197 are pre-saturated and come in a canister with a spring-loaded lid to prevent them from drying out. Refillable Wiping System Nos. 36P188 and 36P193 include reusable canisters and dry wipes. Add 1 qt. of Alpet D2 Surface Sanitizer No. 36P191 to moisten wipes.

Hand Hygiene—Meet all USDA requirements for food handling. Formulated with emollients to keep hands soft. Kosher, Pareve, and Halal certified.

Sanitizer spray Nos. 36P171, 36P172, 36P173, and 36P175 kill 99.9999% of 26 tested pathogens. Atomized spray saturates fingernails, cuticles and crevices where germs hide. NSF Certified,

Foam soap Nos. 19RC65, 19RC66, and 19RC67 kill 99.999% of 12 tested pathogens. Rich, thick foam. NSF Certified, E2 classification.

Pump Kits and Pumps—Designed for foams and sprays, soaps and sanitizers.

Dispensing Options—Touchless dispenser No. 19RC84 reduces the risk of cross-contamination with dual-infrared sensor technology. Table top or wall mount.

Touch-free Nos. 36P155 and 36P156 and manual Nos. 36P168 and 36P169 dispense sprays, foams, liquids, lotions, soaps, and sanitizers. ADA Compliant.

Stainless steel dispensers Nos. 19RC73, 36P166, and 36P167 are designed for easy cleaning. Ideal for wet or dry environments.

Carpet Cleaners

Bonnet Buffs—Formulated for spin bonnet cleaning. Will not cause resoiling.

Carpet Shampoos—Work with rotary cleaning methods. Leave no tacky residue which can lead to restaining.

Extraction Cleaners—Low-foam formulas work in high-pressure extractors.

Prespays—Loosen heavily soiled carpets and contain repellent to reduce resoiling.

RTD™ Dispensing Systems

DISPENSER CHEMICALS

Maintenance-free dilution control system is built right into the bottle. Units easily attach to a common garden hose for water supply. Provide safe, accurate mixing; eliminate contact with concentrated chemicals and reduce chemical waste. Set flow lever to fill buckets or bottles.

ACCESSORIES

For use with all RTD™ bottles.

Wall-Mounted Holster—Holds two 1.5L or 5L bottles.

Water Hookup Kit—Includes instruction sheet, 5-ft. water hose, shutoff valve, and female quick-connect.

Quick Connect—Female attachment connects RTD bottles and water source.

Water Supply Hose—5-ft. hose allows greater flexibility; can easily move from one water source to another.

Wire Racks—Wall-mountable racks provide more-permanent installation and allow hands-free operation.

Dilution Control Systems

3M

3M™ TWIST 'N FILL™ CLEANING CHEMICAL MANAGEMENT SYSTEM

Tamper-resistant cap helps to prevent contact with hazardous chemicals.

Dispensers

Compact and versatile chemical dispenser dilutes chemical concentrates with water to accurately dispense cleaning products.

No. 4YEP7 features additional pressure relief valve. Integral air gap meets ASME/ANSI A112.12 and ASSE.1055B requirements, and prevents chemical back flow into water supply.

Wire Shelves

Provide neat storage and easy accessibility of chemicals. Store four 2L bottles. Also available in locking style.

Preprinted Bottles

Dispense mixed cleaning chemicals into labeled spout cap or sprayer bottles. 32-oz. bottles.

Floor Strippers

Heavy-Duty—Penetrate and emulsify the toughest UHS burnished finishes. Works the first time, eliminating the need for restrips.

Ultra Heavy-Duty—Fast-acting stripper begins to emulsify most finishes on contact, reducing normal soak times.

UHS—Specially-formulated for high- and ultra high-speed floor care programs. Quickly penetrates and emulsifies finish.

Noncorrosive—Formula is noncorrosive to eyes and skin without sacrificing performance. Chemical goggles and gloves are not required.

Linoleum—Effectively removes existing finish without damaging floor. Also works on marble and other sensitive substrates.

Baseboard—Ready-to-use, fast-acting formulas are ideal for using on spot build-ups, especially around baseboards.

Floor Finishes and Sealers

Ultra High Solids—Need fewer coats to achieve a high-gloss appearance.

High Solids—25% solids provide a long-lasting, high-gloss finish.

Brilliant Appearance—Diamond-like brilliance, clarity, and durability. Feature fast cure time, excellent buff response, and reduced marking, scuffing, and scratching.

Zinc-Free—Clean, long-lasting finish for environmental purchasing programs.

Economical—Create a durable finish that reduces the need to strip and refinish.

High Solids UHS—Delivers excellent gloss build and durability.

UHS—Ultra high-speed labor-saving finish delivers a wet look gloss without daily burnishing. No. 11Y634 is fortified with urethane for added durability.

Black Floor—Designed for black plank asphalt floor care programs.

Finish/Sealer—Formulated to work with any maintenance method and equipment of all types of floors.

Sealers—For all finishes used on resilient flooring. Seals pores of flooring and levels the surface.

Premeasured Cleaner Packets

Color-coded for added safety and convenience. 90 packets per recyclable plastic tub, 2 tubs per case.

Neutral Cleaner—Cleans and protects high-gloss, high-solids finishes in high-traffic areas. Won't leave a dulling film, even without rinsing.

All-Purpose Cleaner—Effectively cleans a wide variety of surfaces, including stainless steel, chrome, porcelain, ceramic, terrazzo, and vinyl.

Bowl Cleaner—A blend of enzymes and detergents attacks organic waste, scale, and urinary salts.

Cleaner Degreaser—Use on multiple surfaces including vinyl, asphalt, ceramic tile, quarry tile, stainless steel, linoleum, and concrete.

Neutralizer Conditioner—Neutralizes urine odors on hard floors, grout, and carpeting.

Detergent/Disinfectant—Cleans, deodorizes, and disinfects hard, nonporous surfaces.

Color-Coded Trigger Sprayers

TOUGH GUY

The 360° dual-spray bottle allows you to use all the product in the container by providing a continual spray at every angle including upside down. Offers a constant fine spray with less hand fatigue. Colored bases provide additional safety and organization by helping distinguish between different chemicals. Viton® seals resist most common chemicals and detergents. Feature a level indicator embossed on container; marked in both mL and pints.

GENERAL PURPOSE CARTS

Space-saving carts accommodate common cleaning items and waste collection.

HYGEN™ MICROFIBER MOPPING KIT WITH CHARGING BUCKET

Designed to help reduce cross-contamination when damp mopping in healthcare environments, and help improve dry time. Cleans up to 5000 sq. ft. Bucket is fully-loaded with microfiber pads.

HIGH-CAPACITY MODULAR

Provide 40% more storage than standard janitor carts, in the same footprint, with 30% larger, leakproof, zippered, side-opening waste bags. Accommodate 32- to 55-gal. BRUTE™ containers. Securely hold WaveBrake® Dual water mopping combos or microfiber mop bucket dollies. Include 2 bottle caddies and 5 rubber tool grip handle holders.

Can be used with Microfiber Disinfecting Bucket No. 5NY73, sold separately on page 1534.

High-Security Microfiber, No. 1PBJ9

Locking doors and security hood open on both sides for quick, easy access. Includes waste cover.

JanSan Microfiber, No. 1PBJ8

Features 4 removable, color-coded pails, 4 nonmarking 4" swivel casters, and a folding front platform. Includes two 30-qt. storage bins and mop bucket attachment.

JanSan Microfiber, Nos. 1PBJ7 and 1PBJ6

Include folding front platform and mop bucket attachment.

TOUGH GUY

Barricade Cone System No. 2LEC8

Pedestrian Safety Cones and Barriers

FLOOR SIGNS

Double-sided signs help identify short-term unsafe conditions. Durable 85% LDPE/15% HDPE plastic material. Fold away for easy storage.

SAFETY CONES

Feature black messaging on all 4 sides.

Barricade Cone System—Includes 1 cone, 1 weighted base, and 1 nylon barricade belt. 2 units are required to make complete system.

Accessories—Weighted Base No. 2LED3 helps stabilize 36" safety cones. Flashing Light No. 2LEC9 requires one D battery, not included. Sign Holder No. 2LED2 snaps into the top of 36" cones to hold standard rigid signs. Lock-In Sign Message Board No. 6VKT2 is injection-molded polypropylene and is suitable for high-traffic indoor areas. Message Labels No. 6GJA1 are polypropylene and compatible with safety cones. All are for use in hospital, office, and school applications.

Door and Hallway Barricade No. 2LEB6

Safety Barricade System No. 2LEB5

DOOR AND HALLWAY BARRICADES

Pole Barricade No. 2LEB6 telescopes 42" to 72", and No. 6GJA0 telescopes 30" to 44" to close off areas to foot traffic. Double-locking design with adjustable torsion lock and rubber ends grip the door frame or wall.

No. 2LEB7 yellow plastic Sign Barricade with "Closed" symbol restricts access to doors and hallways.

EXPANDABLE MOBILE SAFETY BARRICADE SYSTEM

Accordion-style barricade expands up to 13 ft. Flexible panels can be manipulated to fit a variety of applications. Folds for convenient storage.

Spill Mop Kits

Be prepared for spills and provide quick cleanup with these spill mop kits. All spill mop pads are compatible with Extendable Spill Mop Handle No. 450Y44.

Nos. 450Y46 and 450Y47—Spill mop kits come with a wall mountable spill mop storage cabinet and telescoping spill mop handle. No. 450Y46 includes 10 spill mop pads, No. 450Y47 includes 10 biohazard spill mop pads.

Nos. 450Y42 and 450Y43—Spill mop pads provide quick spill cleanup where the absorbed liquid turns to a gel and is trapped in the pad to help prevent leaks and drips. No. 450Y42 can hold up to 32 oz. of water per pad, and No. 450Y43 can hold up to 32 oz. of water and 13½ oz. of NaCl 0.9% per pad.

No. 450Y44—Spill mop handle features a collapsible telescoping handle and it can fit in most spaces for quick spill cleanup.

No. 450Y45—Storage cabinet helps you keep spill control items organized and easily accessible. Compact unit can hold a Spill Mop Handle No. 450Y44, and up to 2 packs of Spill Mop Pads No. 450Y44, or Biohazard Spill Mop Pads No. 450Y43, all sold separately. Cabinet includes mounting hardware to help speed installation.

Mop Bucket/Wringer Combos

Rubbermaid Commercial Products

TANDEM™

All-in-one compact design with integrated bucket and wringer provides effective wringing and no lost parts. 31-qt. bucket has a down pressure wringer and accepts up to 24-oz. mops.

NEW GENERATION WAVEBRAKE® BUCKET/WRINGER COMBOS

Patented mop bucket system helps prevent workplace hazards associated with spills and splashes. Color-coding on Bucket/Wringer Combos helps reduce cross-contamination. Organize by function, department, or building area. WaveBrake baffles reduce splashing while mopping and maneuvering for a safer environment. Molded-in pour spout and sink ledge help direct water while emptying the mop bucket. Improved wringer design works with more mop sizes, extra small to extra large (12- to 32-oz.). Built-in steel handle provides a secure grip to lift and carry the bucket. Red handle at back of mop bucket helps lift, carry, and empty the bucket. Structural web-molded plastic construction. No. 493G96 includes a foot-operated drain in front of bucket to empty into floor drains.

NEW GENERATION WAVEBRAKE BUILD YOUR OWN BUCKET COMPONENTS

Individual components and colors are available to build a cleaning system that meets your specific needs. No. 493H16 includes a foot-operated drain for draining into floor drains.The Dirty Water Bucket nests below wringer to keep dirty water separate and help reduce risk of cross-contamination.

Note: New Generation WaveBrake wringers, replacement buckets, and dirty water buckets will not fit on pre-September 2018 mop buckets.

Looped-End Wet Mops

- Stitched tailband
- Multiple colors help avoid cross contamination
- Size is dry weight
- Wet mop handles sold separately on page 1532
- Launderable unless otherwise noted

Cotton/Rayon/Synthetic Blend—Durable mops are 4-ply with open-end spun yarn. Resist unravelling, fraying, and linting. Tailband prevents tangling and improves floor coverage.

Cotton—4-ply mop is more absorbent than other cotton/synthetic blends.

Cotton/Synthetic Blend—Mops are highly absorbent. Looped-end design increases floor coverage and reduces streaks.

Antimicrobial—Mop heads feature 4-ply antimicrobial yarn treated with a silver-based agent.

Rayon/Polyester—6-ply mop contains minimum 50% post-consumer recycled content.

Finish Mops

Nylon—Nonlinting, continuous filament yarn leaves a glossy long-lasting finish. GlossPro™ Flat Finish mop applies finish to 30% more floor area.

Web Foot® Looped-End Rayon—4-ply, looped-end synthetic yarn is designed for a controlled release of floor finish. Tailband is sewn on the inside of mop to help reduce the "drag" patterns common to most finish mops.

Finish Mops

▪ Size is dry weight

Looped-End Nylon—Even application without excessive linting or fraying. Higher liquid release offers more coverage and less chemical waste.

Looped-End Rayon—Economical alternative to nylon. Releases liquid evenly for a smooth, clean finish.

Cut-End Polyester—Economical 4-ply mops have excellent absorbency and release characteristics; ideal for applying floor finishes and disinfectants.

Cut-End Polyester, Screw-On Style—Provide easy mop head changes and have excellent liquid release properties; ideal for economical floor finishing, disinfecting, and general-purpose cleaning. Noncorrosive screw and header allows mops to lay flat for easy cleaning under furniture and cabinets. Use handle No. 1TZA6, sold separately on page 1532.

3M Easy Scrub Mopping Systems

No. 30XJ20

EASY SCRUB FLAT MOP SYSTEM

- Mop handle holds 15 oz. of solution
- 54" standard handle

Push-button and squeeze bottle systems provide liquid on-demand. Common applications include patient rooms, classrooms, stairwells, restrooms, and spot mopping.

Buddy Jug—2½ gal. dispensing container. Safe with general disinfectant cleaners with pH from 7 to 10.

EASY SCRUB EXPRESS FLAT MOP SYSTEM

- 38" to 59½" aluminum handle

Quickly and easily change out chemicals. Swivel head.

Express Mop Tool and Starter Kit—No. 1EKB2 includes an aluminum telescopic handle/pole and 16" mop pad holder. Simple press of a button dispenses cleaning solution. No. 30XJ20 includes flat mop tool, 12 (11 oz.) bottles, caddy, two 18" flat microfiber mops, ½ gal. pour jug, three blank sheets, and label CD.

Express Bottles—Squeezable bottles hold 11½ oz. of cleaning solution and fit in mop handle.

Express Bottle Caddy—Portable, holds up to twelve 11½ oz. Express bottles (No. 1EKB4).

MICROFIBER FLAT MOPS

Clean and remove stuck on dirt and debris. Polypropylene scrub stripes are intertwined with absorbent microfibers. Washable. Color-coded borders help reduce cross-contamination. Red for restroom floors. Blue for operating and emergency rooms. Green for kitchen floors. White for general floors and dining floors in facilities, or patient rooms and public areas in healthcare facilities. Use No. 1CPH4 for textured surfaces such as ceramic tile, quarry tile, natural stone, etc.

Scotchgard™ Hard Floor Protectors

No. 45CT68

No. 402F14

Ready-to-use floor protectors are certified by the National Floor Safety Institute as providing "high traction". 2 coats produce a clean, shiny floor that is less susceptible to scuffs, black marks, stains, and scratches. Can be maintained with standard speed, high speed, or ultra high speed equipment and pads.

Scotchgard™ Resilient Floor Protector No. 45CT68 is a high-performance product for linoleum vinyl tile and sheet vinyl floor that will last up to a year with minimal maintenance. Scotchgard™ Stone Protector No. 402F14 is suitable for concrete, marble, terrazzo, and other porous stone surfaces. Applicator Pad No. 6CTP9 works with both floor protectors.

Microfiber Mop Bucket Systems

Used with microfiber mops up to 18" long and fit onto Rubbermaid Janitorial Carts on page 1526. Microfiber mops available on page 1532.

PRESS-SIEVE WRINGER FINISH BUCKET

Press sieve removes solution from mops with little effort. Holds multiple microfiber mops. Stores unused floor finish with an airtight lid. Holds microfiber finish pads on this page.

TOP DOWN CHARGING BUCKET

Watertight, snap-on lid. Holds 15 to 20 microfiber wet pads.

TOP DOWN CHARGING BUCKET WITH SIEVE

Effectively and ergonomically moistens mops. Reduces cross-transmission when a finish mop is used for each room. Safe for MRI rooms.

Microfiber Cloths

- Launderable and reusable

Small fibers trap dirt and moisture, cleaning surfaces without leaving a sticky residue or spreading dirt. Microfiber cloths are more absorbent than standard cotton cloths and don't require cleaners or chemicals. Use for general-purpose cleaning, tough jobs, and delicate surfaces. Leave no residual lint, streaks, or scratches. HYGEN™ medium-duty cloths, Nos. 3CCZ4 and 3CCZ3, withstand up to 500 launderings and up to 200 with bleach. Patented zig-zag scrubbers make cleanup quick and easy.

Retractable Poly Wool Duster No. 6DMY4

Dusting Tools

OVERHEAD DUSTERS

Microfiber Dusters— Microfiber duster and sleeve attract dirt. High-pile design gets into small cracks and crevices. Features include a universally adjustable head and telescoping pole. Launderable sleeve ties onto head, with reinforcing rivets to prevent sleeve from backing off.

Poly Wool Dusters—Perfect for cleaning hard-to-reach places. Nonallergenic and washable. No. 6DMY4 handle extends 52" to 84."

Duster Mitt—High-pile cotton/poly blend sleeve can be used over worker's hand. Ideal for heavy dusting and dusting pipes.

Overhead Duster—Dusting tools feature 54" plastic handles, and are compatible with Poly/Cotton Sleeve No. 1MYF8. No. 1MYF4 has a regular head; No. 1MYF6 has an angled head.

OVERHEAD DUSTER WAND

Flexible head for hard-to-reach places. 20" plastic handle. High-pile, cotton blend microfiber sleeve is replaceable and launderable. Additional sleeves sold separately.

FEATHER AND LAMBSWOOL DUSTERS

Ostrich Feather—Washable dusters will not scratch surfaces. Designed for use on furniture, office equipment, and blinds. Nos. 1MYG3 and 1MYG5 have premium ostrich feathers.

Lambswool—Designed for wide, flat surfaces such as tabletops and desktops.

Polypropylene	Plastic	18"	Blue	2" to 2⅜"	**1YTH5**
Polypropylene	Plastic	24"	Blue	2" to 2⅜"	**1YTH6**

Contractor Brooms

Synthetic fibers provide extra strength and durability. Can be used in wet and dry applications and with detergent and water. Acid- and fungus-resistant fibers last longer than traditional brooms. For use with contractor bolt-on handle No. 4GU69, see page 1541.

Silver and Black/Gray Plastic Fill—For sweeping up fine dust and dirt on smooth surfaces.

Black/Gray Flagged Synthetic Fill—For picking up heavy dirt and the fine dirt left behind. Includes a heavy-duty, wide-leg brace.

Maroon Plastic Fill—For sweeping up heavy dirt and debris on very rough surfaces.

Blue Plastic Fill—Stiff bristles are able to sweep heavily caked dirt and debris on very rough surfaces.

Black/Brown Palmyra Fill—For sweeping heavy debris. Broom comes with a heavy-duty brace.

Sweeping Compound

TOUGH GUY®

Instantly attracts dust and dirt, holding dirt to the ground while area is being swept. Keeps particles from rising into the air and diminishes the inhalation of harmful dust. Oil-based compound with grit contains sand which acts as an abrasive to loosen dirt and grime from work floors. For use in the construction industry, warehouses, boat yards, factories, garages, and more.

ZEP® PROFESSIONAL

Soy-based, all-purpose, nonpetroleum formula captures dust and debris on hard floors. Made with renewable soy-based oils.

Color-Coded Brushes

Promote safe food handling practices and help minimize the risk of cross-contamination between work zones using color-coded brushes.

UTILITY SCRUB

General-purpose, with a white plastic block and 1⅝" polyester fill.

HAND SCRUB

Ergonomic design with curved back and flared, crimped bristles to hold solutions and clean along edges and corners. Contoured plastic blocks are 2½"W. Fill is 1⅜".

BENCH

Remove powder and other residues. Polyester fill is 2½".

PIPE HOOK

Circular clean-in-place brushes are ideal for cleaning curved drains, tubes, pipes, and equipment. Polyester bristles are twisted into galvanized steel wire.

WAND

Radiator-style brushes feature a long, narrow shape to clean countertops, refrigerator coils, conveyor belts, and other hard-to-reach spots. Slip-resistant, durable plastic handle will not crack or splinter.

BOTTLE AND GALLON

Wirewound brushes feature smaller diameter handles and softer bristles for cleaning containers with smaller openings. Nos. 1YTP3 and 1YTP4 are specially designed to easily slip into bottle necks.

MULTIPURPOSE VALVE AND FITTING

Medium stiff bristles provide aggressive cleaning, and rounded heads and ends protect against scratching.

Color-Coded Squeegees, Floor Brushes, and Cleaning Supplies

Protect against microbial cross-contamination by assigning specific colors to each potential area of contamination.

Color-coded supplies allow certain colors for specific cleaning purposes. This system is easy to understand and prevents cross-contamination for better sanitation.

SQUEEGEES

Hygiene—1-pc. design inhibits growth of bacteria by eliminating openings for dirt to accumulate. Soft thermoplastic elastomer blade contours easily to uneven surfaces. Frame is designed to help prevent fluids from splashing over squeegee frame. 12" squeegee includes a 6½" handle.

Foam—For cleaning liquid spills from floor surfaces. Double foam rubber blades conform to most surfaces, including tile and marble. Durable plastic frames will not rust or spark.

FLOOR SCRUB BRUSHES

Dual-angle plastic block and crimped polypropylene filament hold liquid for scrubbing at high and low angles. Threaded handle hole; order handle separately on page 1541. 1¾" trim length. Overall length: 10".

ANGLE BROOMS

Designed for extended use; ergonomic shape prevents uneven wear. 1"-dia., fiberglass handle. Sanitary, unflagged polypropylene bristles. Self-locking Flex-Tip™. 12" sweep face; 5½" to 7" trim length. Overall length: 54".

FLOOR SWEEPS

Hygienic, nonabsorbent plastic block with angled synthetic bristles. Short, heavy-duty bristles up front help sweep heavier debris. Long, fine bristles in back sweep fine dust and can be used with sweeping compound. 2⅓" trim length. Block size: 24".

HANDLES

1"-dia. handles for use with a variety of bench and floor squeegees and brushes. Short 6½" polypropylene handles feature ACME threads and are ideal for use with bench squeegees and brushes. 60"L fiberglass handles are self-locking.

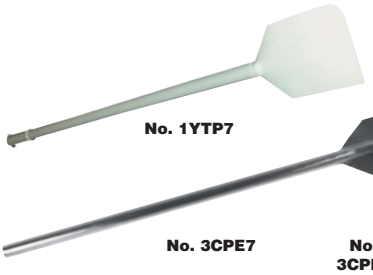
Food Service Brushes

Glass Washer—Glasses of almost any style can be cleaned thoroughly and safely with this brush. Heavy-duty polyester bristles with a densely filled dome top hold up to extreme use. Threaded white plastic stems help prevent chipped or broken glasses. Brush features a molded plastic base with positive suction for a tight grip in sinks and on countertops.



Oven and Grill—Wire bushes and metal scrapers quickly and easily remove heavy carbon deposits, rust, and burnt-on food buildup.

Note: Equipment must be turned off prior to brush use.

Grill Cleaning System—Specifically designed to clean hot surfaces without clogging. No. 2NTJ7 must be used with grill pad and holder. No. 2NTJ6 cleans without scratching or lifting surface cure.

Hot Beverage—Polyester fill brushes quickly and easily clean coffee decanters, makers, urns, creamers, and percolators.

Food Service Scrapers

Scrapers are ideal for general mixing and stirring. Scrapers made of nylon (300°F) or flexible polyethylene (150°F) will sharpen and contour to a specific use. Smooth finish, with waterproof construction for easy cleanup. Use Paddle Scraper No. 1YTP7 for greater stirring and cleaning of large kettles. Stainless steel scraper is NSF Listed with chisel point blade and tapered side for improved scraping action. Threaded handle is fully sealed to eliminate bacteria and has plastic grip for comfort and heat resistance in high-temperature and high-viscosity applications.

SCOURING PADS

Nonabrasive—Cleans without scratching.

Medium-Abrasive—For most daily cleaning jobs.

Blue—Abrasive, open-weave pad cleans baked-on surfaces and crusted build-up on equipment.

Green—Flexible, heavy-duty abrasive pad.

White and Yellow—Yellow cellulose sponge backed with white, lightly abrasive scouring pad.

Green and Yellow—Yellow cellulose sponge backed with medium-abrasive green scouring pad. Premoistened and individually wrapped.

Blue and Yellow—Contour-cut sponge backed with blue antimicrobial scratchless scouring pad.

Antimicrobial—Green pad with antimicrobial treatment.

PADS

Nylon Soap—2 scrubbing surfaces and a foam center filled with concentrated liquid detergent.

Steel Wool—Steel wool is fully saturated with high-sudsing cleaning formula.

SCRUBBERS

Brass—Soft brass wire for use where scratching is an issue.

Stainless Steel—Wideband construction for full-coverage cleaning.

Plastic Mesh—Durable high-strength filament with overlap construction. For sensitive surfaces.

MICROFIBER SCRUBBERS

Blue—Sponge covered with microfiber for lint- and streak-free cleaning.

Scouring Pads and Scrubbing Sponges

SCOURING PADS

Cleansing No. 98—For sensitive surfaces such as stainless steel, chrome, porcelain, and ceramic.

General Purpose No. 96—Synthetic scouring pad.

General Purpose Green No. 9650—Thicker hand-size version of scouring pad No. 96 eliminates cutting or folding of pad for a better grip.

Heavy-Duty No. 86—For heavily baked-on foods.

Pot 'n Pan No. 88—Synthetic material won't splinter or rust.

Power Pad No. 2000—Scours 2 to 4 times faster with 2 to 8 times less scratching than conventional scouring pads. Ideal for stainless steel.

Cleaning Pad No. 9000—Cleans most types of surfaces, including porcelain and nonstick cookware, without scratching.

Purple Scour Pad No. 2020—Fast scouring and low scratching.

Scour Pad No. 220—Heavy-duty, tough cleaning.

Multipurpose No. 622—For no-scratch scouring.

Dobie® All Purpose Pad No. 720—Hand-size, no-scratch pad constructed of mesh-wrapped urethane sponge.

Grill Scrubber No. 7721—Mineral-coated to remove burnt-on food and grease.

Natural Fiber—Made from 50% plant-based materials. One sponge does the work of 30 paper towels.

SCRUBBING SPONGES

Power Sponge No. 3000—Power Pad No. 2000 is combined with an antimicrobial sponge.

Scrub Sponge No. 74—Features No. 96 pad on one side for medium-abrasive scrubbing.

Scrub Sponge No. 63—Light-duty cleaning without scratching.

Sponge Cloth—Offers the absorbency of a sponge with the coverage of a wipe.

Copper-Coated—Long-lasting copper edges cut through tough soil.

Stainless Steel—Removes baked-on food from cooking equipment.

Scotch-Brite

FLOOR SCRUBBER

No-Scratch Floor Scrubber No. 7722—Removes heel marks and wax buildup.

Trash Bags for Wood, Metal, Concrete

- Super Hexene HAO

For heavy-duty and industrial applications that require maximum strength and resistance to punctures and tearing. They are often used by contractors on construction sites, in lumber yards, and in brickwork applications to hold heavy or sharp waste.

Pest- and Rodent-Repellent Trash Bags

Bags have natural mint fragrance added to repel rats, raccoons, and other rodents while remaining safe for humans. HDPE bags are lightweight and moisture-resistant for collecting soft refuse such as paper towels, paper, and linen. LLDPE bags are tear- and puncture-resistant for collecting heavy refuse and items with sharp corners, such as cardboard in kitchens.

General Purpose Corded Shop Vacuums

- Wet/Dry pickup

Roll shop vacuums to a cleanup site and plug into a nearby electrical outlet to vacuum up liquid spills or dirt and debris. They're ready for use without having to wait for a battery pack to recharge. Standard vacuums filter the outgoing air through the vacuum bag. The HEPA filter vacuum forces air through a fine mesh that traps harmful particles such as pollen, pet dander, dust mites, and tobacco smoke. These vacuums are commonly used at workshops, auto shops, car washes, and construction sites. Search General Purpose Corded Shop Vacuums on Grainger.com® for a complete list of vacuum contents.

Portable Corded Shop Vacuums

- Wet/Dry pickup

Vacuums are lightweight, compact units that can be carried around the jobsite to clean up liquid spills or dirt and debris. They plug into a nearby electric outlet, so they're ready for use without having to wait for a battery pack to recharge. These vacuums take up less storage space than a full-size shop vacuum. All vacuums include efficient, single-stage bypass motors for powerful pick-up.

Portable Cordless Shop Vacuums

Makita Milwaukee DEWALT

Shop vacuums allow the cleanup of wet or dry spills while eliminating the trip hazard of a cord and the need to work near an electrical outlet. They're powered by rechargeable batteries to allow use in remote areas where electric power is unavailable. These vacuums are lightweight for transport and compact to save space in storage.

Commercial Cleaning Corded Shop Vacuums

- Wet/Dry pickup

Commercial vacuums have a single-stage or 2-stage motor that allows more frequent use than general purpose shop vacuums. They are used for cleaning up liquid spills or dirt and debris and are commonly paired with attachments suited for professional office, school, or retail cleaning applications. Standard vacuums filter the outgoing air through the vacuum bag. HEPA filter vacuums force air through a fine mesh that traps harmful particles such as pollen, pet dander, dust mites, and tobacco smoke.

Industrial Corded Shop Vacuums

Industrial vacuums provide greater suction than general purpose or commercial-cleaning shop vacuums to pick up heavier particles and liquids. Their 2-stage or 3-stage motor allows high-frequency use for heavy-duty cleanups of dust and dirt or liquid spills. Standard vacuums filter the outgoing air through the vacuum bag. HEPA filter vacuums force air through a fine mesh that traps harmful particles such as pollen, pet dander, dust mites, and tobacco smoke. Vacuums plug into an electrical outlet to generate suction and have a large tank for holding vacuumed debris or liquids. These vacuums withstand frequent use at manufacturing facilities and building or construction sites.

Pneumatic Industrial Drum Vacuums

Drum vacuums operate on a compressed-air supply to suction dust and dirt or liquid spills into their drum for disposal. They withstand high-frequency use and reduce the risk of downtime since they have no electric motor to burn out. These air-powered vacuums are commonly connected to air compressors at construction sites or pneumatic hoses in manufacturing facilities.

Static-Conductive Pneumatic Drum Vacuums

- **Wet/Dry pickup**

Drum vacuums with static-conductive components suppress the buildup of electrical charges, which can cause nuisance shocks. They're ideal for vacuuming talc, powders, and other substances that can generate static electricity. They operate on a compressed-air supply to suction dust and dirt or liquid spills into their drum for disposal. These air-powered vacuums withstand high-frequency use and reduce the risk of downtime since they have no electric motor to burn out. They're commonly powered by air compressors at construction sites or pneumatic hoses in manufacturing facilities.

Wall-Mount Shop Vacuums

Dayton

- Wet/Dry pickup

Vacuums attach to a wall in garages, shops, and other areas that require frequent cleanup of dust or liquid spills. They're accessible while conserving floor and storage space. Vacuums plug in to a standard wall outlet and can be detached from the wall to empty collected waste.

Built-In-Pump Vacuums

DRIEAZ Nilfisk Dayton

Combine a wet/dry vacuum for cleaning up dust, dirt, or liquid spills and a pump for transferring large volumes of water. They can suction debris or liquids into the tank like a standard shop vacuum or can connect to a garden hose to pump water through the hose as it's suctioned into the vacuum. This pumping feature eliminates the need to empty the tank when clearing water from flooded basements or broken pipes.

No. 39C364 quickly removes water from flooded structures. **No. 10W854** operates in three modes: vacuum only, pump only, or vacuum and pump. **No. 4TB87** easily converts from wet/dry vacuum to pump operation.

Note: No. 4TB87 is not intended for use as a continuous running pump.

Detachable Blower Vacuum

- Wet/Dry pickup

Vacuum is equipped with a removable motor unit that doubles as a handheld blower. Picks up dust and dirt or liquid spills when used as a vacuum and move leaves, yard clippings, and other debris when used as a blower. Standard collection bag traps fine dust. The rustproof, dent-resistant tank withstands heavy-duty use and resists damage during transport.

Standard	18 gal	Plastic	2 ½ in	105 cfm	6 ½	**3VE22**

Dayton

2-In-1 Vacuum

- Wet/Dry pickup

Features a large vacuum tank for big cleanups and a portable vacuum unit that detaches from the tank for small cleanups. It adjusts to the size of the job, so there's no need to have separate full-size and portable shop vacuums. This wet/dry vacuum picks up dust and dirt or liquid spills. Its filter traps dust and contaminants to prevent them from recirculating during vacuuming.

Pneumatic Personnel Cleaning Stations

- Wet/Dry pickup

Vacuum dust, powders, and chips from workers' clothing and skin. Stations provide an alternative to dusting off with air guns, which generate potentially dangerous pressures that could cause eye or ear injuries. Powered by compressed air and have a brush attachment to loosen particles so they can be suctioned into the attached tank. Nonelectrical discharge (NED) protection suppresses static-charge buildup to allow use with combustible materials such as metal or coal dust, flour, grain, and sugar.

Bagless, Corded Upright Vacuums

- Dry pickup

Bagless, corded upright vacuums collect dirt, dust, and debris in their dirt cup or chamber for disposal. The see-through chamber shows the level of debris, so it can be cleared out when full to prevent reduced suction or an overheated motor. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor.

Bagged, Corded Upright Vacuums

- Dry pickup

Corded upright vacuums plug into an electrical outlet to lift dirt from carpet fibers. Reusable bags collect dirt, dust, and debris in bags that can be emptied and reused making it easy to recover small items (such as jewelry and toys). Disposable bags collect dirt, dust, and allergens in replaceable bags that are discarded when full. They minimize contact with collected debris since their disposable bags don't need to be shaken out like reusable bags or cleaned out like a dirt cup. Both types of bags act as filters to trap dust and allergens.

Bagless, Cordless Upright Vacuums

- Dry pickup

Operate without the limitations of a power cord to collect dirt and debris in their dirt cup or chamber for disposal. They typically have a see-through chamber that shows the level of debris, so it can be cleared out when full to prevent reduced suction or an overheated motor. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor.

Makita Vacuums—2-stage filtration system. Floor nozzle aids in maneuverability and debris collection.

Hoover No. 24Z198—Patented WindTunnel® technology helps lift and remove dirt from carpets. Micro filtration system plus extra-wide cleaning path.

Stick Sweepers

Floor sweepers pick up dust and debris from carpeting as well as hardwood, tile, or vinyl flooring. They have a slim cleaning head and a pivoting handle for cleaning under furniture and machinery. Their quiet operation makes them suitable for use in hotels and hospitality environments.

Rubbermaid Sweepers—Corner brushes help clean tight spots. **No. 5M865** cleans bare floors and low-pile carpets. **No. 5M867** has a low profile for cleaning under furniture on a variety of floor surfaces. **No. 4HC27** includes soft bumpers to product furniture on bare floors or low-pile carpets.

Bissell Sweepers—Nos. 36RE54–36RE56 include dual-debris canisters, plus corner brushes for hard-to-reach areas on bare floors and low-pile carpets. **No. 36RE53** is battery-operated with a 90-min. run time. Roller brush sweeps dirt into its dustpan.

Bagged, Corded Canister Vacuums

- Dry pickup

Vacuums trap dirt, dust, and allergens in replaceable bags that are discarded when full. They keep debris contained for disposal to help prevent recirculation of dust and allergens, making them a common choice for vacuuming in healthcare and educational settings. These vacuums have a lightweight wand for cleaning and a canister that houses the electric-powered motor and holds the collected debris.

No. 30RR52 cleans hard surfaces, carpet, furniture, and above-floor areas. **No. 33KE24** has a large filter capacity to allow users to clean with less downtime. **No. 48ME63** is compact for increased portability and maneuverability. **No. 33KE28** includes a restaurant tool kit for cleaning up food scraps and dining room debris. **No. 9RY02** has a large capacity for mold, lead, or asbestos remediation. **No. 566G94** is HEPA safe for immediate containment in hazardous particulate applications. **No. 36RE57** comes with on-board cleaning tools for carpets, upholstery, and more.

Bagless, Corded Canister Vacuums

- Dry pickup

Collect dirt, dust, and debris in their dirt cup or chamber for disposal. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor. They have a lightweight wand for cleaning and a canister that houses the electric-powered motor and holds the collected debris.

Nos. 55EX49 and **55EX50** quietly clean carpets and hard floors and prevent dust using three-stage standard filtration system. **No. 36RE58** is a handheld canister with maneuverable wheels that is both portable and powerful. **No. 55EX51** has a larger capacity, speed control, and a full bag indicator light.

Bagless, Cordless Canister Vacuum

Makita

- Dry pickup

Collects dirt, dust, and debris in its dirt cup or chamber for disposal. This bagless vacuum eliminates the need for replacement bags and relies on filters to trap dust and allergens and keep debris from entering the motor. Lightweight wand for cleaning. Canister houses the battery-powered motor and holds the collected debris. Delivers up to 64 min. of continuous operation. Requires No. 52YW51 Battery and Charger Kit, sold separately.

Computer/Electronics/Data Vacuums

METROVAC ATRIX

No. 9TF54

No. 1VHH4

- Dry pickup

Remove dust and dirt buildup from computers, data equipment, and office machines to prevent damage or overheating. They provide an alternative to canned-air dusters for cleaning out keyboards and clearing dust from equipment-cooling fans. Include micro-cleaning attachments for adapting to different cleaning angles and getting into tight spaces.

DataVac® Pro Series are all-steel, high-tech vacuums/blowers that keep computers, printers, and office equipment functioning properly. **Express** is an ESD-safe vacuum for servicing and cleaning static-sensitive equipment. **Omega Supreme** is also ESD-safe and can be used for collecting hazardous debris such as lead dust, silica dust, and mold. Accessories store on lid.

ESD-Safe Vacuums

METROVAC Nilfisk ATRIX

No. 4RXY7

No. 2FTK2

- Dry pickup

Vacuums dissipate static electricity to avoid damaging sensitive electronic equipment during cleaning. Also known as antistatic vacuums, they create a path for grounding static electricity to prevent discharges that could cause interruptions or failures of computers, printers, data equipment, robotic devices, and other electronics.

Use **No. 45RK33** as a vacuum/blower to remove dust, lint, hair, debris, and paper shreds from electronics. **No. 4RXY7** can be used in both portable and stationary applications with a 4-stage filtration system. **No. 2TUX8** is a complete antistatic vacuum, blower, and dusting system for electronics. **No. 2FTK2** has a bagless filter canister that is resealable and disposable. Captures large volumes of debris and particulate.

Cleanroom Vacuums

Nilfisk

No. 4NFP9

- Dry pickup

Disposable bag vacuums provide multiple stages of filtration for collecting fine dust and powders in cleanrooms, labs, and other controlled environments. They remove contaminants and other airborne particles to meet specific cleanroom standards. Capture the largest particles during the first stage of filtration and capture finer particles during the following stages. Their final filtration stage traps ultra-fine particles and prevents them from recirculating.

No. 4NFP9 has an extra-large filter, plus a thermal protection device to keep motor from overheating. Hose provides ESD protection. **Nos. 4RXY8** and **4RXY9** are compact and wheels make them easy to maneuver. **No. 4RXY8** can safely collect and contain potent compounds for disposal.

Explosion-Proof Vacuums

Nilfisk

No. 54ZH11

These bagless vacuums are made of nonsparking materials to help prevent the ignition of combustible dust. They allow cleaning in areas where dry goods and other potential ignition sources are stored or processed. They're commonly used around products such as flour, starch, animal feed, light metals, coal, plastics, and textiles. All-in-one design safely collects and renders inert Group E metal dusts including aluminum, magnesium, and other commercial alloys.

Pneumatic Drum-Top Vacuum Heads

Drum-top vacuum heads operate on a compressed-air supply, so they have no electric motor to burn out and no moving parts to wear out. They're commonly used in wet environments where an electric-powered vacuum could be hazardous. These vacuum heads generate strong suction to draw wet or dry materials into an attached 55-gallon drum. Designed for flood control, sludge pickup, and cleaning of sumps and coolant tanks.

Note: All air vacuums come with a 3⁄16" jet installed. 7⁄32" and ¼" jets are also supplied.

No. 3PXN9

Bagless, Cordless Handheld Vacuums

Vacuums operate without power cord restrictions to collect dust and debris from small cleaning jobs in their dirt cup for disposal. The dirt cup can be cleared out when full to prevent reduced suction or an overheated motor and also allows small items to be recovered from the collected debris. These bagless vacuums eliminate the need for replacement bags and rely on filters to trap dust and allergens and keep debris from entering the motor.

Vacuum Bags

Collect vacuumed dust and debris for disposal and help filter out allergens and dust particles to prevent them from recirculating in the air. New or empty bags help prevent clogs, suction loss, and motor burnout. Disposable bags are discarded when full and replaced with a new bag to minimize contact with collected dirt. Reusable bags are shaken out when full and used again to reduce waste.

Vacuum Filters

Dayton

- Reusable

Trap dust and allergens to keep them from recirculating in the air or entering the vacuum's motor. Filters are usually found near the vacuum's exhaust port to catch fine particles that haven't been collected in the vacuum bag or dirt cup. These filters are used for regularly replacing old filters to maintain suction and avoid motor burnout, and to change out clogged or damaged filters. Filters typically fit specific vacuum cleaner brands or models.

Vacuum Hoses

Tennant | Makita | Dayton | GUARDAIR | ATRIX

- Plastic

Hoses attach to a vacuum cleaner's intake port to draw in dirt and debris. They connect with compatible attachments to extend their length or adapt to specialized jobs, such as cleaning crevices and upholstery. These vacuum cleaner hoses are used as replacements for hoses that are worn, damaged, or no longer maintain suction.

Carpet Extractors

STRIVE® SERIES WITH READYSPACE®

ReadySpace® technology allows carpets to dry and be ready for foot traffic in 30 min. or less. Rollers and deep cleaning brushes can perform interim and restorative carpet cleaning.

SELF-CONTAINED EXTRACTORS

EX-SC-1020P—10-gal. push extractor cleans an average of 3500 sq. ft. per hr. Features large nonmarking wheels, drop-down drain hose for quick emptying, and 5 spray jets.

EX-SC-1020—Extractors have a drop-down hose for easy emptying, a solenoid valve that helps prevent drips, and simple controls for ease of use.

EX-SC-412—Cleans 1400 sq. ft. per hr. Has a lift-off recovery tank and an adjustable folding handle. Includes trigger grips for solution dispersal, 2 spray jets that evenly dispense solution and require no tools to remove, and a floating brush head that requires no manual adjustment.

Speed EX™ Compact—Electric extractor features lift-off solution and recovery tanks for easy cleaning and filling. Noncorrosive aluminum scrub head and rotomolded tanks for durability. Handle is adjustable for ease of use and folds down for storage.

Falcon™ 2800 Plus—Self-propelled extractor has a 75-ft. power cord and electronic speed control for greater efficiency. Rear-mounted pivoting head provides greater solution recovery for faster drying time. Includes a prespray wand for cleaning heavily soiled areas.

Falcon™ Ultra Battery—Self-propelled front-mounted head allows for easy maneuvering around corners and narrow aisles. 6 spray heads with 100 psi for enhanced solution dispersal and better cleaning performance. Runs up to 4 hr. on a single charge.

PORTABLE EXTRACTORS

EX-SPOT Spotter Extractors—Ideal for small stains and soil concentrations. Easy to transport, weigh only 18 lb. Recover water easily with the 1.12-HP vacuum motor. No. 4VDV6 includes a cart.

Compact Carpet Extractors

- ETL Listed

Easy-to-use design with a large capacity 15-gal. tank increases productivity by letting you run the machine longer before you need to add more solution. Include a long 15-ft. hose, easy-grip handles, and a sturdy carpet wand for increased maneuverability and access to hard-to-reach spaces. Easy-access fill port reduces spills and keeps you in an ergonomic position during fill ups. Roto-mold double-walled construction increases extractor life and performance.

Nos. 19XZ88 to 19XZ94 come with a heating element and are ideal for cleaning jobs where a more aggressive approach is needed.

Floor Sweepers

- Adjustable main and side brooms
- Easy-to-empty hopper

Battery-Powered Sweeper—Compact machine easily cleans most indoor and outdoor surfaces in a single pass. Quiet, 62 dBA sound level lets you sweep anytime, even in noise-sensitive environments. 0.3 micron filtration. Runs on a maintenance-free rechargeable 12V battery. Includes brushes, battery, and onboard charger.

Push Sweepers—Lightweight, durable sweepers are easy to maneuver for cleaning dirt, dust, and litter from hard surfaces such as asphalt, wood, or cement. Rotary side broom sweeps debris into the path of the main broom, which feeds the large hopper. Dent- and rust-resistant construction stands up to rough use. No. 21ML62 can also be used on carpeting.

Mid-Size Walk-Behind Floor Scrubbers and Brushes

Large drive wheels and tight wheel base coupled with a parabolic squeegee provides maneuverability and easy water pick up on turns. Constructed with noncorroding scrub deck and roto-molded tanks; built for commercial and light industrial use. Ideal for noise-sensitive environments. Feature 1-button, quick-train controls and no-tool squeegee change for easy operator training. Cleans up to 20,000 sq. ft. per hr. Console is height adjustable and the onboard charger allows the unit to be easily stored.

Cylindrical Deck—Operates at 68 dB.

Disc-Style Deck—Operates at 67 dB.

Replacement Floor Scrubber Rotary Brushes

No. 1MEH6 Clutch Plate sold below. More sizes and styles available on Grainger.com®.

POLY GENERAL SCRUBBING BRUSH

Polypropylene 0.028" bristles for general scrubbing of most floor types.

NYLON GENERAL SCRUBBING BRUSH

Nylon 0.028" bristles for general scrubbing of most floor types.

LIGHT SCRUBBING BRUSHES

Nylon 0.018" fibers with 500-grit silicon carbide for light-to-medium scrubbing of vinyl, sealed concrete, terrazzo, slate, and marble floors.

MEDIUM SCRUBBING BRUSHES

Nylon 0.022" fibers with 320-grit silicon carbide for medium to mildly aggressive scrubbing of resilient floors, nonslip flooring, terrazzo, quarry tile, and concrete. Asymmetrical bristles for effective cleaning on uneven surfaces.

STRIPPING BRUSHES

Nylon 0.050" fibers with 80-grit silicon carbide for aggressive scrubbing of concrete and stripping of resilient floors, terrazzo, and tile. Constructed with bristles of different lengths that work well on uneven surfaces.

HEAVY-DUTY STRIPPING BRUSHES

Nylon 0.060" fibers with 46-grit silicon carbide for aggressive scrubbing of concrete surfaces and aggressive stripping of resilient floors. Irregular bristle length assures cleaning on uneven surf aces.

CARPET CLEANING BRUSHES

Polyester bristles scrub carpet while glide plate supports the weight of the machine.

SANDING DISCS

For aggressive and effective sanding of wood floors.

CLUTCH PLATE

For brushes and pad drivers with 5" dia. center holes. Cast of durable zinc alloy.

Carpet Bonnets

Extend carpet life and enhance appearance when used for interim carpet maintenance. Double edge stitching extends bonnet life.

Low-Profile Bonnets—Provide improved operator control on rotary floor machines from 175 to 300 rpm.

Low-Profile With Scrubbing Strips—Deliver extra scrubbing action for improved cleaning performance.

Standard Thickness Bonnets—Work well with shampoo or solvent-based chemicals. Use with standard 175 rpm rotary floor machines for intensive carpet maintenance.

Microfiber Bonnets—Offer better cleaning power and longer product life. Can withstand over 100 launderings and has double the durability of standard blend bonnets.

Scotch-Brite™

Floor Surface Preparation Pads

No. 1EKC3

Use with rotary or automatic floor machines. These environmentally preferable floor pads require only a neutral cleaner or water, reducing the use of chemicals. Nonwoven mineral floor pad construction enables pad to remove floor finish from a variety of hard floor surfaces, including vinyl tile, marble, terrazzo, concrete, and wood floors. Compatible with water-based or solvent-based finishes.

Stripping, Scrubbing, and Buffing/Cleaning Pads

Environmentally sustainable pads are washable and reusable.

STRIPPING PADS

For rotary and automatic floor machines.

High-Productivity Black 7300
Remove old finish, dirt, and buildup. Increase pad-to-floor contact for more efficient stripping. Use to strip heavy buildup or for quick stripping.

Black 7200
Wet strip floors, maintaining consistent performance throughout the pad life.

Brown 7100
Resilient pads can be used for wet or dry stripping on uneven floors. Quickly and easily cut through old finish to prepare floors for refinishing.

SCRUBBING PADS

Use with rotary and automatic floor machines.

Blue 5300
Remove dirt, spills and scuffs, leaving a clean surface ready for recoating. For heavy-duty scrubbing prior to recoating.

BUFFING/CLEANING PADS

Red 5100
Clean when damp, buff when dry. Use for light scrubbing without dulling the finish. For rotary and automatic floor machines.

White Super Polish 4100
Pad buffs very soft finishes and lower-traffic areas; or use for polishing soft waxes on wood floors. For rotary floor machines.

Preburnishing and Burnishing Pads

Environmentally sustainable pads are washable and reusable.

PREBURNISHING PADS

TopLine Autoscrubber Green 5000
For light scrubbing of floors before burnishing with minimal finish removal. For rotary or automatic floor machines.

BURNISHING PADS

For ultra high-speed floor machines.

Sky Blue Hi-Performance 3050
Restore gloss to dull floors. Great for frequent burnishing with less dust, point build up, and burning.

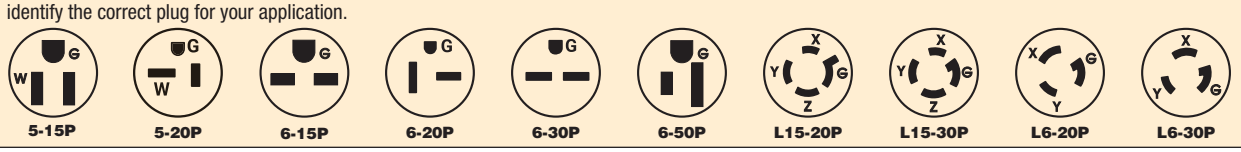
Aqua 3100
Produce a brilliant gloss on softer finishes or in lower traffic areas. Exceptional durability.

TopLine Peach 3200
Pads restore gloss to dull floors in a single pass. For use on floors with good base coat. Minimal finish removal.

Natural Blend White 3300
Use natural hair and synthetic fiber pads for outstanding results on a wide variety of finishes and traffic conditions. Provide high gloss while minimizing swirl marks.

Tan 3400
Provide a brilliant "wet-look" finish on harder finishes or high-traffic areas. Best choice for scratch and scuff removal.

Natural Blend Tan 3500
Natural hair and synthetic fiber pads provide excellent results on harder finishes and high-traffic areas. Remove marks and scuffs while polishing.



Eraser™ Pink 3600
For optimum results on harder finishes and heavy-traffic floors. Remove black marks, restore excellent gloss and image clarity.

NEMA Plug Configurations

Standardized NEMA configurations were created to minimize the possibility of unsafe mating of unmatched voltages and amperages. Use the figures to help identify the correct plug for your application.

Cold Water Pressure Washers, Electric/Direct-Drive

NORTH AMERICA
First Choice When Quality Matters

- 3 piston axial pump
- Tempered stainless steel plungers
- GFCI protected

All models, except No. 5RCC2, feature a TSS motor (Total System Shutdown) which turns on and off when spray gun is activated and has an automatic safety valve with pressure shutoff at the head. Units include an adjustable high-pressure nozzle. All units include either foam bottle or chemical injector. Nos. 5RCC2 and 5RCC3 also come with a ceramic plunger and crank shaft pump. Nos. 20JZ25 to 20JZ27 include a turbo nozzle/lance. No. 468C08 has a quick-connect soap nozzle.

Cold Water Pressure Washers, Electric Motor

Mi-T-M
Performance Under Pressure.

- Crankshaft pump
- Solid ceramic pistons
- Downstream, low-pressure chemical injection
- Thermal relief valve prevents pump damage

Quiet operation and no engine exhaust make them ideal for indoor use.

DIRECT-DRIVE

35-ft. cord has ground fault circuit interrupter (except No. 3WB89). Include 36" insulated wand with 0° to 60° spray nozzle except Nos. 3WB88 and 3WB89 which are equipped with 15° and 25° high-pressure/chemical nozzle. Cart Style units include solid steel axles and tubed pneumatic tires. Max. intake water temp.: 125°F.

BELT-DRIVE

Stationary Style

Nos. 3WB73 and 3WB74 are designed for hot water use without any exhaust. Feature 4-ft. cord with ground fault circuit interrupter, user-adjustable time delay auto shutdown, and thermal overload protection. Industrial-duty motor is enclosed in an easy-to-access stainless steel cabinet. Max. intake water temp.: 180°F. Include 36" wand with 0°, 15°, 25°, and 40° quick-connect nozzles.

Cart Style

No. 20KC14 features thermal overload protection, external bypass system, and totally enclosed powder-coated belt guard. Includes 50-ft. ⅜" nonmarking hose, insulated lance and trigger gun with safety lock, and 10-ft. power cord.

Cold Water Pressure Washers, Electric Motor

- Solid ceramic pistons
- Crankshaft pumps

These washers generate fluid pressure with a lightweight electric motor that provides cleaner and quieter operation than gas-powered engines. They remove mud, dirt, and debris and more from a variety of surfaces. All except Nos. 486Z79 and 52PF29 feature a built-in chemical detergent injector to apply cleaning agents and eliminate the need to scrub by hand. Available in cart-style and carry-style. Carry-style washers are lightweight and portable and can be used just about anywhere. CSA Certified.

ChoreMaster®

Cold Water Pressure Washers, Portable Gas or Diesel Engine

- Downstream, low-pressure chemical injection
- Thermal relief valve
- Solid steel frames

DIRECT-DRIVE

High pressure rating and compact design make these washers great for light- to medium-duty use. Include 36" wand, solid steel axles, and pneumatic tires.

Mi-T-M® Models—Feature low oil shutdown, except No. 3WB97. Quick-connect nozzles: 0°, 15°, 25°, and chemical, except No. 3WB97 has 15°, 25°, and chemical only.

ChoreMaster®—Feature fold-down steel handles and inline water strainer. Quick-connect nozzles: 15°, 25°, and chemical.

BELT-DRIVE

Provide less wear and longer life than direct-drive pumps. Ideal for heavy-duty use. Include external vibration- and heat-reducing bypass system and low-oil motor protection. Include 36" wand and 0°, 15°, 25°, 40°, and chemical quick-connect nozzles. Nos. 6CGP0 and 6CGP1 come with a 48" wand.

23-HP Electric Start—Large fuel tank allows 8-hr. run time. Dry battery included. Has a roll cage frame and lifting hook.

Performance Under Pressure.

Hot Water Pressure Washers, Electric Motor

- Crankshaft pump
- Solid ceramic pistons
- High-pressure chemical injection
- Output water temp.: 190° to 200°F (pressure washers); 250° to 300°F (steam cleaners)

Mounted on sturdy rolling frames with tubed pneumatic tires and solid steel axles. Feature enclosed fan-cooled industrial motors. Thermal relief valve helps prevent pump damage and an easy-access coil drain helps prevents freezing. Include ⅜" x 50-ft. hoses, 36" wand with 15° and chemical quick-connect nozzles, and 35-ft. electrical cord with GFCI, except Nos.48UH46 and 48UH47.

DIESEL OR KEROSENE

Top-fired oil burner enhances fuel efficiency and servicing. Burn #1 or #2 diesel fuel or kerosene. Solid state electronic ignition. Heavy-duty frame, roll cage, and lifting hook. No. 3WB94 and 2GXK5 include 0°, 15°, 25°, 40°, and chemical quick-connect nozzles.

ELECTRIC BURNER

Eliminates exhaust fumes for interior cleaning applications. Heat exchanger cartridges provide consistent on-demand hot water.

Hot Water Pressure Washers, Diesel or Kerosene Engine

- Crankshaft pump
- Solid ceramic pistons
- Low-pressure chemical injector
- Thermal relief valve

Electro Magnetic Firing (EMF) system requires no battery, generator, motor, or transformer. Top-fired burner assembly. Units burn #1 or #2 diesel fuel or kerosene. Include pneumatic tires and solid steel axles. Feature easy-access coil drain and overpressure protection. Dual 36" wand with fixed chemical nozzle and 0°, 15°, 25°, and 40° quick-connect nozzles. Electric start models include dry battery. Wrapped frame with lifting hook. Hood cover tilts for easy burner access. Skid-mount is heavy-duty powder-coated steel square tube frame. ½" schedule 80-coil with stainless steel wrap heat exchanger. Polyethylene burner and engine fuel tanks. Temperature rise is 150°F/66°C above ambient; max. outlet temperature is 200°F. Quick-connect nozzles: 0°, 15°, 25°, and 40°, 10-gal. fuel tank capacity. Oversized crankshaft pump with upgraded bearings.

Note: Additional kerosene pressure washer models are available on Grainger.com®

Telescoping Wands

GA GRAINGER APPROVED

- Feature internal high-pressure hoses
- Pole tips fit standard quick-connect nozzles

Feature removable angled spray head. Compatible with quick-connect-style nozzles. Ideal as an accessory for pressure washers, for cleaning home siding, industrial buildings, and trailers. Twist collar to extend and retract the wand.

WAND SUPPORT BELT

- Nylon belt with adjustable hook-and-loop closure
- Supports 18- and 24-ft. telescoping wands

Wand clamps to the belt for greater support and comfort during long cleaning jobs.

Nozzles and Filters

GA GRAINGER APPROVED

TURBO ROTARY SPRAY NOZZLES

Improve washer's efficiency and provide the blasting power of a 0° nozzle over a wide 20° cleaning stream area. Solid brass body with ceramic orifice. Rubber housing protects against impact. Max. fluid temp. is 195°F (200°F for Nos. 35XH58 and 35XH59). ¼" (F) NPT inlet.

Note: The operation of the turbo nozzle may cause damage to the surface being sprayed. Test on a small area before using on intended application.

SPECIALTY NOZZLES

No physical nozzle change necessary between high pressure and soap nozzles. Max. fluid temp. is 300°F; inlet and outlet ports are ¼" (F). No. 5RCC4 Long-Range Soap Nozzle quick connects to pressure washer wand and projects chemicals 15 to 20 ft. Adjusts from fan spray to stream. No assembly required.

TURBO NOZZLE INLET FILTERS

Filters prevent turbo nozzles from clogging by trapping fine debris particles. Install easily between the end of the lance and turbo nozzle. Max. flow is 8 gpm; max. fluid temp. is 200°F. No. 5JKN1 is for use with No. 5JKN3, see page 1591, and includes filler and quick connect.

Sewer Cleaning Pressure Washer Accessories

GA GRAINGER APPROVED

Use to convert pressure washers to jetting machines, or to clean sewer drain lines.

SEWER AND ROTATING NOZZLES

Stainless steel, bull-nose nozzle slides easily into drain pipes and sewer lines to flush debris or clear frozen pipes while attached to sewer hose.

SEWER HOSE

Flexible hose for use with sewer nozzles. Max. temp.: 160°F.

FOOT-ACTUATED VALVES

Foot-controlled valves allow both hands to be free to control the sewer hose. ¼" FNPT outlet.

PUMP DISABLER VALVES

Jetter valves convert standard triplex plunger pumps into sewer cleaning pumps. Disabler pulse valves have adjustable levers to change pump to either configuration by turning the handle on the valve.

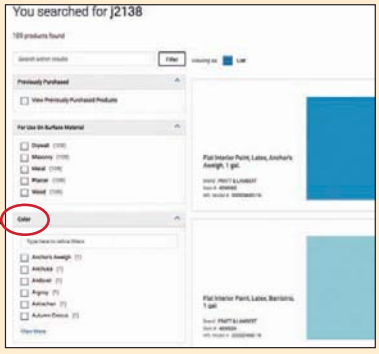
** S=Swivel*

Looking for a Specific Color? Here's How:



STEP 1
Identify the color type under the "Color Family" column.
Example: Blues.

STEP 2
Decide what size and finish you'll need. Then locate the item number in the table under the finish and "Item No." column. **Example:** No. J2138 – FLAT, 1 gal.

STEP 3
Search for the Item number on Grainger.com®. Once on that page, you will see all of the available colors.

Color Family	FLAT 1 gal. Item No.	FLAT 5 gal. Item No.
Blues	J2138	J2146
Greens	J2139	J2147
Neutrals	J2140	J2148

Architectural Paint

Accolade® Paint
The finest-quality paint and primer in one is 100% acrylic waterborne and features a low-VOC formula.

Fresh Spec™ Zero VOC Paint
Premium quality, professional low-VOC coating is GREENGUARD GOLD certified. It offers high hide, smooth application, and makes touch ups easy.

Pro-Hide® Gold Ultra Paint
Best professional quality product is ideal for both residential and commercial applications.

Pro-Hide® Silver 5000 Paint
Proven performance for professionals on a budget.

Economy Paint
A quality, general-use paint for high-turnover jobs.

Paint Finish Types

FLAT
Minimally reflective finish free from gloss or sheen. Meant to absorb light in order to hide imperfections.

VELVET
Soft, stain-resistant finish has low light reflectivity. Minimizes imperfections and maintains uniformity.

EGGSHELL
Low luster that noticeably reflects light.

MID-SHEEN
Very versatile with subtle gloss and average light reflectivity. Washable, scrubbable finish is burnish-resistant.

SATIN
Low luster appearance is ideal for higher traffic areas.

SEMI-GLOSS
Moderate glossy finish provides great reflectivity. Shiny finish is washable and scrubbable with excellent stain resistance.

DAP®

Drywall Repair

Use with gypsum, drywall, nailheads, corner beads, wood, plastic, brick, plaster, metal, stucco, masonry, and concrete.

COMPOUNDS

DryDex® Premium Lightweight Joint Compound—Features dry time indicator. Compound goes on pink, dries white.

Lightweight Wallboard Joint Compound—Ready-mixed lightweight formula.

DAP® FASTPATCH™ 30 Patching Compound Powder—Multipurpose formula resists impacts, shrinking, and cracking. Can be painted without priming.

SPACKLING

DryDex® Spackling—Dry-time indicator goes on pink and dries white.

Vinyl Interior Spackling—Resists cracking and crumbling.

Fast n' Final® Lightweight Spackling - Interior/Exterior—1-step interior/exterior formula requires no sanding. White color. Lightweight.

PATCHING

ElastoPatch® Flexible Patching Compound—Permanently eliminates recurring cracks.

Presto Patch® Ready-Mixed Multi-Purpose Patching Compound—Ready mixed patching compound for filling, leveling, and patching holes.

Wall Repair Patch—Self-adhesive.

All-Purpose Stucco Patch—Blends naturally with existing stucco. Interior and exterior use.

Wood Filler—Fills small holes and cracks in interior and exterior surfaces. Adheres to stucco, plaster, drywall, and wood.

Plaster of Paris—For patching and repairing large holes in interior plaster or wallboard.

Patching Plaster—For major repairs on interior plaster or wallboard surfaces.

Rust Tough® and Rust Tough® 250 Primer and Paint

- VOC content: < 250 g/L

Corrosion-resistant, direct-to-metal alkyd enamel. Protects against mild chemicals, fumes, oil, and grease stains. Excellent hide, color, and gloss retention. Superior chip, crack, and peel resistance. Rust Tough® 250 performs like a traditional alkyd enamel. For use in moderate to severe industrial environments and is acceptable for use in federally inspected meat and poultry plants.

Industrial Primer

Heavy-duty primer offers good protection for steel in normal industrial environments. Industrial Primer is for interior and exterior use. Easy to apply by spray. Fast drying. Can be topcoated with alkyd and latex coatings. Weld-Thru Primer is rust inhibitive and designed for shop-priming structural steel. Excellent choice for where harsh environments put heavy performance demands on a shop-applied primer. May be welded through with no effect on the weld's integrity.

Sierra Performance™ Water-Based Epoxy Maintenance Coating Kits

RUST-OLEUM INDUSTRIAL BRANDS

GREEN SEAL CERTIFIED

- S60 system
- Dry time: 1 to 3 hr.
- Coverage: 230 to 340 sq. ft./gal.
- 2 component system
- VOC content: VOC free

Apply versatile coating to concrete, masonry, and wood. VOC-free formula creates a high-gloss finish.

Color	Size	Item No.
OSHA Safety Yellow	1 gal.	4DNA5
OSHA Safety Blue	1 gal.	4DNA8

RUST-OLEUM INDUSTRIAL BRANDS

Noxyde® Water-Based Acrylic Elastomeric Coating

- Dry time: 2 to 4 hr.
- Coverage: 110 sq. ft./gal.
- VOC content: <15 g/L

Provide long-term corrosion protection in most aggressive environments. Designed for minimally prepared sound-rusted or clean steel. Spray application only.

▶CHOOSE: Color	Size	Item No.
Beige Gray, Black, Blue Gray, Brown, English Red, Gravel Gray, Gray Green, Off White, Reseda Green, White	5 gal.	J0583

RUST-OLEUM INDUSTRIAL BRANDS

High Performance Acrylic Polyester Urethane

- 9700 system
- 2-component system
- Dry time: 3 to 6 hr.
- Coverage: 360 to 860 sq. ft./gal.
- VOC content: <250 g/L

High-solids, thin-film coatings provide outstanding color and gloss retention with a low VOC formula.

SURFACES: Concrete, metal, and galvanized steel

No. 7AK71

Color	Item No.
Includes Paint Activator to Make 1 Complete Gallon	
White	7AK71
Crystal Clear	7AK72

RUST-OLEUM INDUSTRIAL BRANDS

High Performance High-Heat Coating

- VOC content: <420 g/L
- 1-gal.

Provide long-term corrosion protection on metal exposed to extremely high temperatures. Excellent resistance to thermal shock.

No. 36ND74

Color	Dry Time	Coverage	Item No.
General Purpose, Up to 400°F			
Aluminum	1 to 2 hr.	250 to 540 sq. ft.	36ND74

Aluminum	1 to 2 hr.	250 to 560 sq. ft.	36ND78
Black	1 to 2 hr.	250 to 560 sq. ft.	36ND79

RUST-OLEUM INDUSTRIAL BRANDS

Commercial Acrylic Aliphatic Urethane

- 3300 system
- 2-component system
- Dry time: 7 to 9 hr.
- Coverage: 355 to 770 sq. ft./gal.
- VOC content: <250 g/L

Interior/Exterior paint for moderate to severe industrial environments. High durability with good chemical resistance. Ideal for outdoor equipment.

No. 36ND70

Color	Size	Item No.
Urethane Paint		
Safety Yellow	1 gal.	36ND70

RUST-OLEUM INDUSTRIAL BRANDS

Peganox® Water-Based Acrylic Elastomeric Coating

- Dry time: 2 to 3 hr.
- Coverage: 220 sq. ft./gal.
- VOC content: <100 g/L

Maintenance coating are designed for high protection, adhesion, and elasticity and provide long-term corrosion protection. Require minimal surface preparation.

Color	Size	Item No.
Black	5 gal.	35YJ76

RUST-OLEUM INDUSTRIAL BRANDS

High Performance Direct-to-Metal Urethane Mastic

- 9800 system
- 2-component system
- Dry time: 6 to 9 hr.
- Coverage: 160 to 280 sq. ft./gal.
- VOC content: <340 g/L

High-solids, high-build urethane mastic is a direct-to-metal aliphatic acrylic polyurethane. Provides corrosion protection of steel in moderate to severe environments. Formulated for minimally prepared, tightly adhered rusted steel. 1-coat hide. No primer needed.

SURFACES: Concrete, metal, and galvanized steel

No. 7AK73

Color	Item No.
Includes Paint Activator to Make 1 Complete Gallon	
Aluminum	7AK73
Black	7AK79

RUST-OLEUM INDUSTRIAL BRANDS

High Performance Cold Galvanizing Compound

- 7000 system
- Dry time: 1 to 2 hr.
- Coverage: 310 to 440 sq. ft./gal.
- VOC content: <500 g/L

Contains 95% pure zinc for ultimate galvanic protection. Excellent adhesion to galvanized metal for maximum corrosion protection.

SURFACES: Bare sheet metal, production welds, galvanized metal

No. 3BU16

Color	Size	Item No.
Gray	1 qt.	3BU17
Gray	1 gal.	3BU16

RUST-OLEUM INDUSTRIAL BRANDS

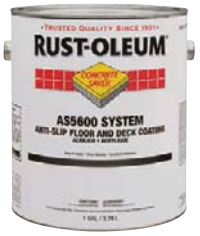
Antislip High-Performance Epoxy Kit

- AS9100 system
- 2-component system
- Dry time: 72 hr.
- Coverage: 40 to 60 sq. ft./gal.
- VOC content: <250 g/L

Offers maximum protection against heavy vehicle equipment, chemical spills, and power cleaning. Base and activator included.

▶CHOOSE: Color	Item No.
Safety Yellow, Tile Red, Dunes Tan, Silver Gray, Navy Gray	H7194

INSL-X



Antislip Paint

- Dry time: 1 to 2 hr.
- Coverage: 80 to 100 sq. ft./gal.
- VOC content: <250 g/L

Acrylic coating with special aggregate provides a skid-resistant surface for interior and exterior concrete or asphalt.

▶CHOOSE: Color	Item No.
Clear, Desert Sand, Gray Pearl, Light Gray, Pine Green, Saddle Brown, Tile Red, White	J4599

RUST-OLEUM INDUSTRIAL BRANDS

Antislip Floor and Deck Coating

- AS5600 system
- Dry time: 4 hr.
- Coverage: 60 to 70 sq. ft./gal.
- VOC content: <100 g/L

Flexible acrylic coating can be used on interior or exterior concrete, asphalt, wood or metal.

▶CHOOSE: Color	Item No.
Yellow, Black, Gray	H7191

RUST-OLEUM INDUSTRIAL BRANDS

Antislip Spray Paint

- AS2100 system
- Dry time: 24 to 48 hr.
- Coverage: 14 sq. ft.

Create a slip-resistant surface in minutes that resists cracking, peeling, and mild chemicals. Ideal for use on stairs, pool decks, ramps, and walkways.

▶CHOOSE: Color	Net Wt.	Item No.
Safety Yellow, Black, Clear	17 oz.	H7167

RUST-OLEUM INDUSTRIAL BRANDS

Antislip 100% Solids Epoxy

- AS6500 system
- 2-component system
- Dry time: 48 hr.
- Coverage: 25 to 35 sq. ft./gal.
- VOC content: 30 g/L

For use in food processing areas. Low odor.

Color	Item No.
Navy Gray	4CJ55

SUPPLIER DIVERSITY

WOOSTER PRODUCTS, INC.

Safe-Stride® Antislip Paint

No. 3JW47

- Dry time: 2 - 4 hr.
- Coverage: 100 - 125 sq. ft./gal.
- VOC content: low

Acrylic paint provides safe traction for pedestrian traffic. Surface installation is between 12 and 16 mil. For use on bare wood, concrete, primed metal, asphalt, marble, stone, and other surfaces.

Color	Item No.
Gray	3JW47
Black	1AJZ3
Safety Yellow	2TVC5

RUST-OLEUM INDUSTRIAL BRANDS

Antislip 1-Step Epoxy

- AS5400 system
- Dry time: 24 hr.
- Coverage: 50 sq. ft./gal.
- VOC content: <340 g/L

Provides a safety finish for pedestrian traffic. For use on aisles, entrances, exits, and stairs.

SURFACES: Concrete and metal (prime metal with 9100 System with 9101 Activator)

▶CHOOSE: Color	Item No.
Black, Dunes Tan, Navy Gray, Safety Yellow, Silver Gray, Tile Red	H7192

RUST-OLEUM INDUSTRIAL BRANDS

KRYLON

Special Purpose Spray Paint

Specially-formulated for unique applications and environments.

APPLIANCE EPOXY
Chemical and stain-resistant epoxy is durable, scrubbable, and colorfast.

OSHA PAINT
High-visibility safety colors. Approved by the Occupational Safety and Health Act governing board.

METALLIC PAINT
Dries quickly for a brilliant metallic-like finish.

HIGH-HEAT PAINT
Withstands temperatures up to 1200°F intermittently, up to 600°F continuously.

FLUORESCENT PAINT
Bright, bold neon colors for maximum visibility and safety. Increase brilliance by 200% to 400%.

CRYSTAL CLEAR
Provides a tough, long-lasting protective coating.

CHALKBOARD PAINT
Creates a slate-like chalkboard surface. Durable, long-lasting finish.

FARM AND IMPLEMENT
Meets manufacturers' specs for farm, vehicle, maintenance, and lawn and garden equipment.

CAMOUFLAGE
Bonds to most plastics. No sanding or priming required.

WORKABLE FIXATIVE
Eliminates smudging, wrinkling, and gloss on paper, posters, signs. Dries in seconds to a clear, durable finish.

TRUE SEAL™ PROTECTIVE RUBBERIZED COATING
Dries to a flexible, rubberized seal. Stops leaks by filling cracks in openings.

NONSKID
Durable, skid-resistant paint makes surfaces safer.

GLOWZ® GLOW-IN-THE-DARK
Finish recharges with exposure to light.

Clear Floor Markings for Safer Facility

Clearly mark your facility with Marking tape and floor marking paints, to designate safe pathways for workers and call attention to potentially hazardous areas.

Create separate lanes for motorized vehicles and foot traffic; mark off safe distances from dangerous machinery; and even call out high-light, high-noise, and other hazardous areas.

Grainger has the marking paints, tapes, and tools that you need to help keep your workers safe, and your business in compliance. See our full selection at Grainger.com®.

Traffic and Zone Marking Paint

Low VOC solvent-based marking paints are made with acetone. For striping and re-striping new or old asphalt, concrete, and brick.

APPLICATION METHOD: Brush, roller or spray machine

SURFACES: Asphalt, concrete, and brick

USES: For parking lots, fire lanes, centerlines, crosswalks, warehouse aisles, bike lanes, curbs and medians, roads and highways, handicap parking, airport runways, running tracks, and arrows and markings

ALKYD

Heavy-duty, high-viscosity coating is similar to chlorinated without the added rubber.

CHLORINATED RUBBER

Made with real rubber for superior wear resistance.

FAST-DRY LATEX ACRYLIC

Provide quick turnaround and drive-on time.

LATEX ACRYLIC

Water-based formula for easy cleanup with mild soap and water. Safe for freshly seal-coated surfaces, new or old asphalt, and concrete.

CLEAR ACRYLIC LATEX SEALER

Waterborne base sealer with semi-gloss finish, extends life of painted lines and can be used to seal new and old concrete. Low voc.

TOLUENE SOLVENT PAINT THINNER

For use with alkyd and chlorinated-based zone marking paints.

Paint Removers

Water-based formula.

Peel Away® 1—Heavy-duty remover safely removes up to 30 coats of oil-based lead paints in a single application. Nonflammable and nontoxic. For wood, brick, stone, and metal.

Laminated Peel Away® Paper—Controls lead-dust dispersal on historic restoration and lead remediation projects by adding containment of lead-based paints and hazardous materials.

Citri-Lize™—Reduces the pH of surface being stripped for good adhesion of primer/paint.

pH Surface Test Kit—After surface has been stripped, rinsed, and neutralized, it should be left to dry for a week. When the surface is ready, use this kit to test pH levels. 4 easy steps.

Complete Paint Removal Test Kit—Includes 4 sample pints, 3 chip brushes, 3" plastic scraper and 3 sheets of laminated paper.

Smart Strip™—Advanced remover can remove up to 15 coats of virtually any coating from interior and exterior surfaces. Formulated without methylene chloride and is noncarcinogenic, nontoxic, and noncaustic. Odor-free, 100% biodegradable with pH neutral and has zero VOCs.

Smart Strip™ Pro—Effectively removes multiple coatings of oil-based, water-based, acrylics, varnishes, epoxies, urethanes, elastomerics, and lead paint from any interior or exterior surface. Formulated without methylene chloride and is noncarcinogenic, noncaustic, and nonflammable. Low odor and VOC.

VALVE ACTION®

Markal® Paint Markers

Permanent liquid paint markers. To choose your "Marking Tool Surface Material" go to Grainger.com®, enter "Item No." and use the filter on the left side.

PRO-LINE® Fine—Marks on small surfaces and and has a valve-actuated tip.

PRO-LINE® HP—Penetrates through oils and greases to dry quickly and leaves a bold mark.

PRO-LINE® HT—Fast-drying paint locks in colors and retains some colors that can reach high temperatures, providing legible marks up to 2,200°F.

PRO-LINE® WP—Fast-drying formula resists spreading and running when in contact with water or water-based fluids to leave a bright mark.

PRO-LINE® XT—Marks on rusty, rough, and dirty surfaces.

PRO-MAX®—Formula dries quickly and leaves bold marks.

Valve Action®—Low chloride and xylene-free formula.

Purdy Paint Roller Covers

- Polypropylene core
- For use with water- and oil-based paints

White Dove™ - Features a high-density woven cover for a high quality, smooth, lint-free finish.

Marathon™ - High-density nylon polyester cover material. Durable roller cover for maintained performance over time. Last longer, paints further, and provides a smoother finish with less lint.

Contractor First™ - Medium-density nylon polyester cover material. Solid paint pick-up and release. Made of 100% medium-density material for good production and quick clean-up. Great for rolling many of today's higher viscosity oil-based finishes.

Wooster Paint Roller Covers

Super/Fab® Knit - Provides exceptional capacity with all flat or satin paints, stains, and waterproofing. Resists matting for complete coverage and smooth results. Polypropylene core resists water, solvent, and cracking.

Pro/Doo-Z® Woven - Shed- resistant for all paints, enamels, primers, urethanes and epoxies. High-density white fabric stays resilient, resists matting for a smooth, professional finish. Double-thick polypropylene core resists water, solvents and cracking.

Mohair Blend™ - Shed-resistant mohair fabric for enamels, varnishes, urethanes, epoxies, and floor coatings. Minimizes directional fabric qualities and provides good production and coverage. Polypropylene core resists water, solvents and cracking.

Micro Plush™ - Professional white microfiber fabric, for all paints and enamels, delivers a very uniform, even finish. Double-thick polypropylene core resists water, solvents, and cracking.

Roller Covers

STANDARD ROLLER COVERS

General Purpose - Quality polyester fabric with polypropylene core withstands water and solvents. Use with all paints and surfaces.

Woven-Pro® - Fine blend of woven fabric provides maximum protection against shedding. Lint-free finish on smooth, semi-smooth and semi-rough surfaces with all paints, enamels, and varnishes. Woven fabric is designed for maximum paint pick-up and release. Heavy-duty polypropylene core withstands water and solvents.

Kodawool® - Blend of polyester and knitted wool designed for maximum paint pick-up and release. One-coat coverage with oil as well as latex paints. Ideal for paints, stains, urethanes and cements. Heavy-duty polypropylene core withstands water and solvents.

MINI ROLLER COVERS

White-Woven® - Shed-resistant for a lint free application and minimal splatter.

High-Density Domed Foam - Provide an extremely smooth finish with all paints, urethanes, adhesives, varnishes, enamels and stains.

Plasticover SURFACE SHIELDS TRIMACO

Surface Protectors

Surface Protection, Film—
A. Self-adhesive film applies quickly and removes easily. Nonslip surface grips carpet firmly. Tear- and puncture-resistant.

B. Clear, self-adhering protective film for all types of carpeting.

C. Reverse-wound nonskid film is easy to apply and protects against spills, dirt, and foot traffic. Removes with no residue.

D. Great for painting and staining. The cloth side absorbs while the coated side is leak-resistant.

E. Heavy-duty, absorbent, slip-resistant, and reusable. Long-lasting and easy-to-clean.

F. Fire-retardant, leakproof, durable, and reusable.

G. Pre-taped along one edge of high-density masking film. Perfect for use in areas when painting.

H. Protective film for HVAC ducts. Helps to meet SMACNA guidelines.

I. Reusable cover holds in place with elastic and fits most standard toilets.

Surface Protection, Paper—
J. Features liquid shield technology that defends floors and other hard surfaces from water, paint, and mud.

K. Economical kraft construction paper, in easy-to-handle rolls, is large enough for several projects.

L. Construction-grade paper protects flooring, cabinets, and counter tops from foot traffic, paint, and spills.

M. Breathable to allow floors to continue the curing process.

Window Shield Self-Adhesive Film—Provide protection to windows and glass.

Carpet Film Applicator—Features a roller design that allows for fast application. Steel construction adjusts to fit 24", 36", and 48" rolls.

Shoe Cover Dispenser and Refill—Simply step, pull, and tear. Dispenser includes 1 pod and 1 roll. Up to 250 pairs per roll.

Dust Containment Pole—Use with plastic sheeting to keep debris and dust contained to the work area.

Drop Cloths

TRIMACO GA GRAINGER APPROVED

Trimaco—Aqua Shield™ is fire retardant, leakproof, and durable. Eliminator™ is a durable professional-grade butyl drop. One Tuff ™ drop features a cloth side that absorbs while the coated side is leak-resistant. Stay Put™ canvas is 300% more slip-resistant than canvas. SuperTuff™ Double Guard is absorbent paper with a leak-resistant bottom. SuperTuff™ Leakproof is heavy-duty and absorbent.

GA—Washable, heavy-duty 8-oz. canvas. Double-stitched with mildew-resistant thread. Finished hems and seams. Great for indoor and outdoor painting projects.

Dirt Trap Surface Protection System

- White color

Adhesive-backed, non-woven protection material protects paint booth walls and floor, traps dust, dirt, and overspray, and brightens work areas.

Flame-Retardant Floor Paper

Spray Booth Paper and Filters

BINKS GFS

RECEPTOR FILTER

Superior overspray holding capacity results in fewer filter changes. Green layer is made from 100% recycled PET green soda bottles.

1" INTAKE AIR FILTER PAD

Tacky pressure sensitive adhesive filter panel is great for mixing rooms and cross-draft and semi-downdraft spray booths.

2" INTAKE FILTER PAD

Filter removes 100% of visible dust and micron particles. UL Listed, Class 2923X for flammability.

AIR FILTER PAD

Designed to help reduce operating costs and for virtually all spray applied industrial coatings. Biodegradable and can be incinerated. Ideal for adhesives, clear coats, epoxies, fiberglass, sealers, stains, and urethanes. Meets UL Class 2 Standards for Flammability.

GFS WAVE® EXHAUST FILTERS

Provide full-depth loading with low runoff and exceptional paint holding capacity. Minimal particulate emissions and high paint removal of all coating types, including clear and waterborne. No. 6TWA3 comes in a roll. Filter material complies with UL 900, NFPA, and OSHA requirements.

FLAME-RETARDANT FLOOR PAPER

Eliminates scraping, stripping, and scrubbing to improve plant efficiency and assure compliance with OSHA requirements for safe cleaning and residue removal. Antislip surface; bright white color improves booth visibility.

Spray Booth Coatings

BINKS

- Applies with airless, HVLP, or conventional spray equipment
- Environmentally friendly formula is VOC < 164g/l

Nonflammable, water-based coatings protect against hazardous overspray accumulation. Dries quickly to form a flexible film that can be cleaned of overspray with just soap and water.

3M

3M™ PPS™ Series 2.0 Spray Cup System Kits

Allows painters a more efficient method of mixing/measuring, filtering, and spraying; applying paint that is faster, easier, and cleaner. This disposable system provides a new cup in every lid and liner kit, prohibiting paint build-up. 4-pt. connection with quarter-turn lid locking system comes with every lid. Domed lid with full diameter filter helps reduce spitting, improving flow and consistency.

Line Stripers and Accessories

TITAN

Clutch-driven piston line striper. Stainless steel rotating ball valves keep debris from sticking. Feature self-adjusting, 1-pc. static packing with wiper lip for longer life. Subaru gas engines operate quietly and start easily. Carry 5-gal. paint pail (not included). For a complete selection of striping paint, see page 1612.

POWRLINER™ 850
- Max. gpm: 0.33
- Max. psi: 3000

Unit features a reversible gun mount to stripe off either front or rear tire. Designed with folding handle and poly tires for smooth operation.

POWRLINER™ 3500
- Max. gpm: 0.92
- Max. psi: 3300
- Honda motor

Delivers a perfect line on difficult applications like smooth concrete and field and pavement marking. No piston or packings, cylinder or clutch to wear or burn out. Features the Sureflo™ pusher valve that makes priming easy. Perfect for spraying coatings prone to shearing.

Atomizing Spray Nozzles

No-drip nozzles positively stop liquid flow when the compressed air is shut off, saving costly liquids.

INTERNAL MIX

Mix the liquid and air inside the air cap for the finest atomization. Can be used on liquids with a viscosity up to 300 cp. Both air and liquid side are pressure fed.

EXTERNAL MIX

Designed for the highest flow rates. Allow the air and liquid flows to be adjusted independently. Ideal for where precise liquid flow is needed. Can be used on liquids with a viscosity above 300 cp. Both air and liquid sides are pressure fed.

SIPHON FED

Require no liquid pressure and can be used with gravity fed liquids or lift liquids from a 36-in. siphon height. Can be used on liquids with a viscosity up to 200 cp.

No. 40P310

Henry
#1 CHOICE OF PROFESSIONALS®

Sealants and Roof Coatings

Adhesive and Primer—Premium brush or squeegee grade, waterproof adhesive made from asphalt, solvents, and organic fibers.

Mastics and Cements—Flashmaster® assures resistance to weathering while providing ease of application by trowel. Wet Patch® Roof Leak Repair has a high resistance to weathering and provides excellent durability against the stresses and wear to which such mastics are normally exposed. Plastic Roof Cement is a premium trowel-grade sealant for dry surfaces.

Roof Sealants—Rubberized Wet Patch™ seals leaks around chimneys, vents, and skylights in wet or dry weather. Extreme Wet Patch™ is a rubber-modified roof sealant with excellent adhesion, especially at moving joints. Neoprene Flashing Sealant is a flashing grade, rubber-based sealant for high stress applications is nonflammable and nonasphaltic. Roofing Sealant helps prevent roof leaks prior to coating with an acrylic reflective coating. Roof Coating Repair Fiberglass Fabric is a woven mesh fabric that will not decay or rot. Coating on fabric reduces distortion and is acid and heat resistant. Solarflex® Elastotape® is a lightweight, nonwoven mat which is heat set. Excellent for new and old construction.

Asphalt Emulsion Roof Coating—Protective coating is nonflammable while wet, corrosion-resistant and waterproof when dry. Base coat for energy saving reflecting coatings.

Reflective Coating—Adds years of service and reflectivity to a roof surface.

Water-Based Acrylic Roof Coatings—Elastomeric and Solar-Flex® protective coatings are resistant to discoloration, disbanding, chalking, mildew, and fungi. They reflect the sun's heat and UV rays. Enviro Elastomeric helps prevent dust and dirt buildup and reflect UV rays. Dura-Brite Elastomeric is a high solids formula that expands and contracts without cracking. Ponding water-resistant.

KOOLSEAL
REFLECTIVE ROOF COATINGS

Roof Coatings, Patching, and Repair Products

No. 4FJK8

Snow Roof® Premium Roof Coating—Goes on blue and dries to a bright white. Elastomeric reflects up to 90% of the sun's rays.

Kool Seal® Elastomeric Roof Coating—Stops leaks while extending the life of existing roofs. Reflects sunlight to save energy costs. No. 36MV74 is formulated using a 100% acrylic polymer.

Kool™ Lastik Primer—Use as a base to convert black surfaces to white reflective ones.

Storm Patch® All-Weather Rubberized Cements—Displace water from wet surfaces and create a tight seal. No. 36MV75 is made of asphalt-based cement with premium-grade aluminum pigment for a reflective finish. Seals quickly and will not pull apart or lose its bone. Remains soft and pliable. Nos. 36MV77 and 36MV78 have an aerosol formula that bonds and seals instantly to clean, dry surfaces.

Kool Seal® Acrylic Patching Cement—Stops leaks on damp or dry surfaces. Blends in on existing white roofs.

Flexx Sealer™ Permanent Leak Repair—Bonds immediately, seals instantly to clean dry surface. Never hardens, cracks, peels or shrinks.

Tundra™ Silicone Roof Coating—Provides ponding water resistance and superior finish with excellent flow and leveling. Adheres to most roofing material.

GreenPatch® No. 39F847

Asphalt Patch Paving Material

Sakrete®—No. 21HC48 tube fills cracks up to ½" wide. Not to be used in areas of prolonged contact with water. No. 21HC47 is a liquid formula used to fill cracks up to ½" wide. Accepts traffic after 5 days. No. 39UV47 has a full cure time of 2 days.

Perma-Patch®—Patches potholes, utility cuts, and cracks. Bonds permanently to asphalt, concrete, steel, and wood. Apply in any weather condition. No mixing. Dries immediately; cures faster under greater volumes of traffic. Compaction can be accomplished by hand tamping.

GreenPatch®—Ready-to-use VOC-compliant formula contains recycled asphalt and permanently repairs potholes and cracks in pavement. Workable in all weather and can be installed in standing water. Accepts traffic immediately after application.

Rust-Oleum®—Concrete Patch and Repair is a 2-part, industrial-strength epoxy that permanently bonds concrete, won't shrink or crack, and creates a surface stronger than concrete. For indoor/outdoor use. Fast curing; paintable in 8 hours. Easy mixing, low odor, no solvents.

Concrete Mixes

- 50 lb. pail

Formulated with sand, gravel, and cement for repair and building jobs where concrete is more than 2" thick.

No. 21HC53 sets posts and poles easily without blending. Sets in 30 min.

No. 21HC52 includes fibers that help resist cracking due to shrinkage.

No. 21HC54 achieves 5000 psi strength. Also good for use in concrete countertops.

No. 21HC55 is a general purpose concrete mix with a strength of 4000 psi.

Driveway Asphalt and Coating

No. 40P317

Asphalt Resurfacer—Fills and seals rough surfaces and cracks in asphalt driveways. Features a 7x rubberized formulation for long life and durability. Stir gel formula applies easily, dries quickly, and reduces tracking.

E-Z Stir Asphalt Filler/Sealer—Do-it-yourself, easy-to-use formula stirs and applies easily. Reinforced for improved traction and durability.

Top-Kote Asphalt Coating—Smooths, preserves, and protects weathered asphalt driveways. Renews and gives a black appearance to surfaces.

Asphalt Pothole Patch—Use this solvent-based asphalt and aggregate compound to fill larger cracks and potholes. All-weather formula requires no mixing.

Asphalt Coating—Brush-applied sealcoat is ideal for home use. Stirs and applies easily.

Hard Hat ANSI Classifications

ANSI/ISEA-Z89.1-2014
Describes the impact-resistance and electrical-insulation properties of the hard hat.

Impact and Electrical-Insulation Classifications
Type I: Reduces the force of impact caused by a blow to the top of the head only.
Type II: Reduces the force of impact from a blow to the top and side of the head.

Class C-Conductive: Provides no protection from electrical hazards.
Class G-General: Provides low-voltage protection up to 2.2KV.
Class E-Electrical: Provides high-voltage protection up to 20KV.

Hard Hat Suspension Types

Pinlock
Feature a band with evenly spaced holes on one end and pins on the other end that fasten for a comfortable fit.

Ratchet & Swing-Ratchet
Feature a knob for tightening or loosening the band to customize the fit. Swing-ratchet suspension helmets let wearers reverse the position of the helmet without removing the suspension frame.

One-Touch & Staz-On
One-Touch have a clip that is squeezed and slid along the band to adjust fit. Staz-On suspension helmets have a band with evenly spaced holes on one end and pins on the other end that fasten to adjust.

Vented Hard Hats—Type 1, Class C

- Polyethylene

Vented hard hats help dissipate heat to keep workers cool. Type 1 hard hats protect wearers from vertical impacts. Vents on these Class C hard hats allow a clear path for electrical arcing, so they should not be used in locations where electrical hazards are present. Front brims protect the face from sun, reduce glare, and help shed rain. Full brims protect the face and neck and are worn in harsh sun. See Grainger.com® for available colors.

Work-at-Height Vented Climbing Helmets—Type 1, Class C

- ABS material
- With accessory slots

Type 1, Class C climbing helmets protect the head from vertical impacts caused by falling objects. Class C helmets are conductive and should not be used in locations where electrical hazards are present. These helmets have vents to allow air to circulate to keep workers cool. Climbing helmets enclose the backs and side of the head and have a chin strap to keep the helmet in place if a fall occurs. See Grainger.com® for available colors.

Top- and Side-Protecting Hard Hats—Type 2, Class E

- Polyethylene

Type 2, Class E hard hats are padded to provide protection against vertical and angled impacts up to 60°. Padding makes these hard hats heavier and more bulky than Type 1 hard hats. They are rated Class E for high-voltage electrical protection up to 20KV. Type 2 helmets are worn when indicated by OSHA or where swinging objects (such as hooks or chains) are present. Front brims shade the face and eyes from sun and help reduce glare. Full brims also shade the neck. See Grainger.com® for available colors.

Baseball-Style Bump Caps

- Hook-and-loop adjustment
- Inner ABS shell

These bump caps have a traditional baseball cap over a bump cap insert. They are often worn by contractors, exterminators, and other workers who might bump into stationary objects such as beams or piping. Bump caps are not ANSI rated and are not suitable for applications that require an ANSI-rated hard hat.

Hard Hat and Helmet Suspensions

- Suspension brand and helmet brand must be the same

Suspensions are the part of the hard hat or helmet that rests on the wearer's head. They provide a gap between the headgear and head, which helps absorb shock and redirect impact force away from the head and spine. Suspensions should be replaced yearly as part of normal maintenance and inspection practices, or earlier if the suspension shows signs of wear.

Cooling Headwear

Keep cool on the job with a variety of reusable towels, bandanas, hats, and sweatbands. Just soak in cold water up to 20 min. for instant cooling relief. Activate Towels in just a couple minutes—wear on your neck or use for wiping away dirt and sweat. Wear cooling Bandanas and Dew Rags alone or with protective hard hats. Brightly colored Hat provides visibility on busy jobsites and gives protection from element. Cellulose Sweatband absorbs sweat and helps keep it away from eyes and hands.

Noise Reduction Rating (NRR)

Noise Reduction Rating (NRR) is the maximum number of decibels (dB) that a properly fitted hearing protector will reduce noise levels. When choosing the right hearing protection for your application, OSHA suggests subtracting 7 from the NRR value, to help account for improper fit.

Level (db)	Example of Noise Levels
140	Rifle Fired 1 Meter Away
120	Basketball Game Crowd Noise
100	Chainsaw
90	Drilling Concrete, Leaf Blower
80	Vacuum Cleaner
50	Floor Fan

Insertion Method

Roll-Down—Roll-down earplugs must be rolled and compressed by hand before being inserted into the ear canal. Once inserted, the earplug expands to create a seal.

Push-In—As implied by the name, push-in earplugs are inserted into the ear canal with a gentle push. They do not need to be rolled and compressed before insertion.

Banded Ear Plugs

- Reusable band; disposable tips

Ideal for intermittent use when switching between noisy and quiet areas. Banded plugs are less bulky than ear muffs and more convenient than individual ear plugs, to protect hearing where high levels of noise reduction aren't needed. The reusable band holds the replaceable tips in place and allows them to be more easily inserted and removed than standard ear plugs. Wear the band over your head, under your chin, or behind your neck; it can also rest around your neck when the plugs aren't in use.

Metal-Detectable Ear Plugs

▪ Disposable; except Flanged and Pod Shape are reusable

Metal-detectable ear plugs fit into the ear canal like standard ear plugs and have a metallic element so they can be sensed by a metal detector. They're commonly worn by workers in food manufacturing and pharmaceuticals processing plants so that ear plugs lost on the production line can be found, to help prevent contaminated products from leaving the plant.

They expand within the ear to form a seal that reduces sound levels and help prevent hearing loss in noisy work environments. Corded to help keep them from falling off, and allow them to rest around your neck when not in use.

Note: For more information on plug shapes, see page 1643.

Ear Plug Dispenser					
Leight Source 500				**3WU31**	

Highly visible crank-handle dispenser provides a permanent location for workers to access disposable ear plugs. Tough anodized aluminum construction withstands constant use. Ideal for large factories and process industries that are looking to eliminate packaging waste. Wall-mountable. Holds 500 pairs of disposable ear plugs, sold separately.

GA GRAINGER APPROVED

No. 23Z422

No. 3TCN5

Empty Ear Plug Dispensers

Empty ear plug dispensers can hold ear plugs of any brand or style to meet the needs of workers in different areas of a facility. They provide a cost-effective alternative to branded dispensers and allow open access for refilling and acquiring ear plugs. Mount these ear plug dispensers to a wall or place them on a flat surface to create a dispensing point for ear plugs.

Passive Ear Muffs

These ear muffs passively block noise by relying on the insulating materials of the ear cups to dampen sound. They're typically worn in areas where workers don't need to speak with one another and the goal is to block all or most surrounding noise. As the NRR of these ear muffs increases, they tend to get bulkier due to the larger ear cups and increased insulation materials.

Push-to-Listen Ear Muffs

Push-to-listen ear muffs reduce sound levels by using electronics to actively filter out constant, loud noise. They allow noise filtering to be paused as needed in order to speak with coworkers. They're often used by road construction crews and in other settings where there's a need to communicate in the midst of constant background noise.

Impulse Noise Protection Ear Muffs

Impulse noise protection ear muffs (also called electronic ear muffs) electronically filter out constant, loud noise and short bursts of high-volume noise. These electronic hearing protection ear muffs reduce, or attenuate, loud noises while still allowing you to hear ambient sound. Electronic ear protection is often worn to protect against impulse (or impact) noises such as gunfire or metal stamping, pressing, and forging sounds.

Replacement Pad Kits for Ear Muffs

Replacement pad kits (sometimes called hygiene kits) extend the life and restore the performance of ear muffs by replacing worn or lost ear cup pads. They're also used to supply clean pads for a new user. New pads optimize hearing protection by maintaining a proper seal around the ears.

Frameless Safety Glasses

- Meet ANSI Z87.1
- 99.9% UV protection

A. Addison™—Has 9-base lenses and provides 180° field of vision. Curved temples with soft tips. Nonslip nosepiece.

B. Brooklyn™—Wraparound frame, curved temples with integrated side protection, and universal nosebridge.

C. Chaise Rocks™—Nonslip design with bayonet temples and universal nosebridge.

D. Condor® V—Features flexible, contoured spatula temples.

E. Condor® Mini V—Smaller size eyewear features flexible spatula shield temples.

F. Condor® Visitor—Universal size with spatula temples. Nos. 4JND6 to 4JND8 are 1-pc. construction, vented style. Fit over most prescription glasses, except No. 4VCL8 is designed for smaller faces.

G. Enticer™—1-pc. wraparound design with cushioned bayonet temples and nosepiece.

H. Jbird™—Has 9-base lenses and spatula temples with soft tips. Allows 180° field of vision.

I. Kramer VP—Wraparound design and soft rubber temple ends for a more comfortable fit.

J. Oxulux™—Wraparound design with contoured padded temples, nonslip gel pad, and universal nosebridge.

K. Oxulux™ OTG (Over-the-Glass)—Wraparound design with contoured padded bayonet temples, nonslip gel pad, and universal nosebridge. Universal size. Fits over most prescription glasses.

L. Quest™—1-pc. design with adjustable temples and integral brow bridge provides a wide field of vision.

M. Quest™ OTG (Over-the-Glass)—Extra-large size. 1-pc. design with adjustable temples and integral brow bridge provides a wide field of vision.

N. Persuader™—Contoured floating lens improves field of vision. Wraparound frame, bayonet temples with cushioned sleeves, and soft gel nosepiece.

O. Wasko™—1-pc. molded frame and lens with padded flexible temples.

P. Wasko™ Mini—1-pc. molded frame and lens with padded flexible bayonet temples. Small size.

Q. Winger™—Integrated side shields and metal alloy temples with nonslip rubber head grips.

Half-Frame Safety Glasses

- Meet ANSI Z87.1-2010
- 99.9% UV protection

Wraparound design with universal nosebridge.

A. Agitator™—Rubber temple tips and the included lanyard cord help keep the eyewear secure. Half-frame glasses have ventilated, straight-back flexible temples and a built-in rubber nosepiece.

B. Maddog™ III—1-pc. design with adjustable temples and integral side shields.

C. Nagle™—Wraparound frame with 10-base lenses and curved temples. Allows 180° field of vision. Universal nosepiece.

D. Nome™—Spatula temples and clear, soft, gel nose pad.

F. Persuader™ Metal—Wraparound metal frame with spatula temples and adjustable nosebridge.

G. PMXTREME™—Built-in rubber nosepiece for a comfortable fit and rubber temple tips help keep glasses secure and in place. Include a black lanyard cord for extra security while wearing.

H. ProFlyer™—Dual polycarbonate lenses, bayonet temples, and metal frame.

I. Spirit™—1-pc. design with adjustable temples, integral side shields, and wide field of vision.

J. Thecla™—Durable polycarbonate frame with dual lenses. Flexible fingers on the soft nosepiece and long padded temple tips for comfort and fit. Includes cord.

K. Thunder™—Ratchet-action temples and nonslip rubber head grips.

Half-Frame Safety Glasses

Honeywell
UVEX

- 99.9% UV protection

A. Acadia®—Versatile, sporty, indoor/outdoor wraparound style has sculpted, padded temples and premium integrated hinge mechanisms for fit, comfort, and compliance. Soft ribbed nosepiece is designed to minimize slippage.

Meet ANSI Z87.1

B. Avatar™—Designed for maximum all-day comfort and customizable fit, with indirect venting, ratchet temples, 9-base wraparound, adjustable temple length and lens tilt, and flexible nose pads.
- Meet ANSI Z87.1 and CSA Z94.3

C. Bandit™—Wraparound unilens design. Features dual lens with replaceable lenses, adjustable temples, and molded-in side shields.

Meet ANSI Z81.1

D. Fuse®—Wraparound 9-base lenses with adjustable nose pads and soft, flexible temple tips. Includes adjustable, breakaway retainer.
- Meet ANSI Z81.1 and CSA Z94.3

E. Genesis®—Dual 9-base wraparound lenses feature a shock-absorbing browguard and a ventilation channel to prevent fogging. Unilens design, flexible nose pads, adjustable temple length, and lens angle adjustment.
- Meet ANSI Z87.1 and CSA Z94.3

F. Genesis® S—Same features as Genesis® eyewear, but feature a 6% smaller frame for workers with slimmer facial profiles.
- Meet ANSI Z87.1 and CSA Z94.3
- Meet Military V0 Ballistic Test for Impact

G. Genesis X2®—Same features as Genesis® eyewear, but with a sportier design and cushioned temples.
- Meet ANSI Z87.1 and CSA Z94.3

H. Genesis XC®—Same features as Genesis® eyewear, but provide 20% more coverage for extra protection.

I. Mercury™—Wraparound dual-lens design offers a 180° field of vision with additional side protection. Soft, flexible nosepiece conforms to almost any nasal profile to reduce slippage while soft, padded temples provide secure, no-slip fit.
- Meet ANSI Z87.1 and CSA Z94.3

J. Millennia®—Wraparound dual 9-base unilens design. Feature browguard and built-in side shields for top and side protection. Include adjustable, breakaway retainer.
- Meet ANSI Z87.1 and CSA Z94.3

K. Millennia Sport™—Lenses have curved temples and universal nosebridge. Includes adjustable, breakaway retainer.
- Meets ANSI Z87.1 and CSA Z94.3

L. Protégé®—Expandable, floating unilens design with wraparound brow, cushioned temples, and a soft, flexible nosepiece.
- Meet ANSI Z87.1 and CSA Z94.3

M. Vapor® and N. Vapor® II—Wraparound frame with 9-base lenses provides 180° field of vision. Universal nosepiece. No. 4FE55 include adjustable, breakaway retainer.

Meet ANSI Z87.1 and CSA Z94.3

Full-Frame Safety Glasses

Honeywell UVEX

- Meet ANSI Z87.1-2015
- 99.9% UV protection

A. Astrospec 3000®—Unilens wraparound design with universal nosebridge, adjustable lens angle, and replaceable lenses.
- Meets CSA Z94.3
- Meets Military V_0 Ballistic Test for Impact

B. Hypershock™—Dielectric glasses are nonconductive, making them ideal for applications where accidental exposure to an electrical charge is possible. The full frame design offers high impact protection, with streamlined padded temples and a molded nosepiece for a more secure and comfortable fit. Uvextreme Plus® anti-fog lens coating provides you fog-free vision and greater scratch resistance for long life.
- Meet CSA Z94.3-2007

C. Livewire™ Sealed Eyewear—Foam subframe fits contours around the eyes for a comfortable seal. Padded, flexing temples with lens angle adjustment. Convert for goggle use with the included adjustable cloth headband. Hydrophilic/hydrophobic HydroShield® coating technology offers longer-lasting fog-free performance.
- Meets CSA-Z94.3

D. Tomcat®—Dual-lens design with metal frame. Adjustable nose pads and flexible padded temple grips.
- Meet CSA Z94.3-2007

E. Ultra-spec® 1000—Wraparound design. Uncoated unilens with molded-in side shields, browguard, and universal nosebridge.
- Meets CSA Z94.3

F. Uvex® RX Frame Only—Prescription-adaptable, unisex frame features adjustable nose pad bridge, regular hinge, and skull temples. Includes removable dust dam. Style number SW06E. Lenses sold separately.

North Adaptec® Safety Glasses

Honeywell NORTH

- Meet ANSI Z87.1-2015
- Meet CSA Z94.3
- 99.9% UV protection

Multiadjustable design provides a comfortable, customized fit for almost any face, with adjustable nosebridge, vented cushioned frame, and ratcheting temple hinges. Temple tension adjustment helps prevent slipping and allows comfortable extended wear. Hydrophilic/hydrophobic Uvex HydroShield® coating technology offers 90x longer-lasting fog-free performance.

Tirade™ Sealed Safety Glasses

Honeywell UVEX

- Met ANSI Z87.1-2010
- Meet CSA Z94.3
- 99.99% UVA/UVB protection

Offer protection in high particulate locations where debris, dirt, and dust present the risk of eye injury. Feature a large unilens design for a wide field of unobstructed peripheral vision, and a soft foam subframe to help ensure a comfortable gap-free fit. The Uvextra® anti-fog coating helps keep lenses clear. Indirect ventilation channels on the subframe provide superior dust filtration. The quick-release hinge system converts easily from temples to headband, with removable temples and standard adjustable headband included.

- 99.9% UV protection

Checklite®—Lightweight single-lens glasses are sized to fit smaller faces. Frameless design features colored spatula temples.

- Meet MIL-PRF-31013 military standards
- Meet CAN/CSA Z94.3-16

Bearkat®—The one-piece wraparound lens design allows you unobstructed vision and the tight fit can provide greater safety. Lenses have a scratch-resistant Duramass® coating and the flexible temples with non-slip soft material offer a comfortable fit. Bearkat® 3 models feature a soft, secure gel nosepiece.

- Meet MIL-PRF-31013 military standards, CAN/CSA Z94.3-16; except Bearkat® 3 only meet ANSI Z87.1-2015

Rubicon®—Curved lens provides distortion-free 180° field of vision. Spring-hinge temples and nonslip temple sleeves.

Klondike® Plus—Features adjustable temples, 11° base curve lens, and TPR nosepiece. 5-position ratchet temples.

Swagger®—Provides great comfort and excellent seal. Nonslip low-profile bayonet temples are thick and wide for better side protection and a bold modern look. Dual lens design. Soft TPR temple and nose pad material for long-wearing comfort.

- Meet ANSI Z87.1-2015
- No. 22JJ40 polarized lenses reduce glare

- Meet MIL-PRF 32432 impact requirements
- 99.9% UV protection

Models with anti-fog protection feature Fog-Off™ technology that won't wear off or wash off. Glasses having polarized lenses help to reduce glare.

Dagr—Feature sleek blade frame with co-injection rubber temples and a non-slip rubber nosepiece for a more comfortable fit.

Baldr—The large frame design allows for maximum coverage and glasses have co-injection rubber temples. Models with a foam gasket insert help to protect eyes by reducing debris entry.

Odin—Full-frame design with co-injection rubber temples and a comfortable fitting non-slip rubber nosepiece. Glasses having a foam gasket insert can protect eyes by reducing debris entry.

Safety Glasses

- Meet ANSI Z87.1-2010
- 99.99% UV protection

Select models feature permanent Platinum® coating on both sides of the lens to offer high resistance to scratching and aggressive chemicals and help delay fogging.

A. Prism—Durable nonconductive polycarbonate frame, excellent coverage, upper brow protection, comfortable straight temples, and sport-style design.

B. Rush—Wraparound lightweight nonconductive frame and premium optical quality. Design includes upper brow protection, nonslip temples, and adjustable nonslip bridge with silicone nosepiece.

C. Rush+—Ultra-sporty design with a nonslip adjustable bridge and flexible co-injected temples to customize fit. Platinum coating.

D. Contour—Ultra-lightweight half-frame provides panoramic view. Nonslip temple tips, rubber nose pads, and reinforced bridge. Antistatic, stylish design, premium optics.

E. Silium+—Ultra-lightweight for comfort in extended wear, with a nonslip adjustable bridge and straight, highly flexible temples. Platinum coating.

F. Baxter—Highly wrap-around frame for total comfort. Waterproof foam and special strap attachment system offer effective protection against liquid and solid spray, and from dust. Platinum coating.

G. Lowrider—High-contour, close fitting design with rubber temples for a comfortable and nonslip fit. No. 20V730 has high-impact polarized lenses that provide true color definition while fighting harsh glare.

H. Tracker Sealed Eyewear and RX Holder—A rubberized eye seal keeps out dust and other fine particles, and the adjustable head strap assures a snug fit and optimal protection. Each accept a Prescription Insert Holder.

Safety Glasses

- Meet ANSI/ISEA Z87.1-2015
- Meet Ballistic Military MCEPS GL-PD 10-12
- 99.9% UV protection

Feature advanced lens and frame technologies for greater style and comfort. Copper lens color is best suited for driving applications. Select models have military-grade Vapor Shield™ antifog lens technology that can resist condensation, fog, and haze even under extreme temperatures and conditions. Glasses with TPR nose pads and temple tips prevent slipping and help keep glasses in place.

A. Delano G2—Stylish, eyewear with a large viewing area features flexible, soft rubber temples for added comfort.

B. Zorge G2—Durable, TR90/nylon frame with soft, rubber temples for comfort.

C. Caraz —Extra-lightweight wraparound frame switches easily between glasses and goggles. A removable EVA foam gasket is attached to the frame to help keep foreign particles away from the eyes. Models featuring polarized lenses can reduce glare in bright light conditions.

D. Dakura—Flexible wraparound frame and soft temples.

E. Kazbek—Flexible, soft-touch nylon wraparound frame. Edge-Flex temples and TPR nose pads. Wide fit glasses feature frames with an additional 22mm width at the temple. Multi-Fit models have an adjustable nosepiece for a more comfortable fit on a variety of facial structures.

F. Reclus—Durable and flexible TR90/nylon frame with soft TPR nose pads and temple tips for greater comfort and durability.

- 99.9% UV protection

Contemporary design can be worn with detachable temples or with an adjustable headband for all-day comfort. Soft, flexible nasal pads and face cushioning for excellent fit. Suited for dirty, high-particulate work environments such as those where grinding, chipping, shaving and sanding occur. The hydrophilic/hydrophobic HydroShield® antifog coating technology on select items offers 90x longer-lasting fog-free performance than most other antifog products. No. D5296 offers increased magnification for reading, inspection and other fine-detail work.

Safety Glasses/PPE Dispensers

Dispensers accommodate packaged or nonpackaged protective eyewear and other PPE equipment. Wall mount or countertop use. Mounting hardware not included.

Safety Glasses Dispensing Trays—Double-hinged top lid provides easy access and seals out dust. Nos. 4GMR6 and 23Z418 have a foam bottom.

Safety Glasses Stack-Style Dispensers—All have an open top for quick filling and a lower flip-up dispensing door in front.

Safety Glasses Case with Door—Flip top hinged lid for filling helps keep dust out. Individual compartments store eyewear.

PPE Wire Dispensing Rack—Wire basket lets workers easily take and return safety glasses and other protective devices. Includes 3 labels: "Safety Glasses," "Hearing Protection," and blank label.

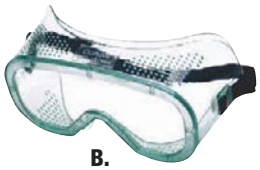
Goggles

- Meet ANSI Z87.1-2010
- 99.9% UV protection

Offered with direct or indirect venting. Direct-vented goggles let air flow into the goggle from the work environment. Choose indirect-vented to limit or prevent liquid splash passing into the goggle.



A. Condor®—Designed for general lab and shop applications. Can be worn with most half-mask respirators. Nos. 1VT66 to 1VT68 have perforated sides.

B. Platoon™ OTG (Over-the-Glass)—Soft vinyl body fits over most prescription eyewear. Translucent light-green frame reduces glare and side reflection. Nos. 4VCF4 and 4VCF5 have perforated sides.

C. Max Barron™—Foam-lined lenses with adjustable head strap. Black nylon frame.

Goggles

Honeywell UVEX

- Meet ANSI Z87.1-2015
- Meet CSA Z94.3 (except Nos. 2CVG2, 2CVG3, 6T363, and 3RYJ9)
- 99.9% UV protection

Select goggles feature hydrophilic/hydrophobic HydroShield® antifog coating technology, which offers 90x longer-lasting fog-free performance than most other antifog products.

A. Classic™ OTG (Over-the-Glass)—Soft, flexible PVC. Durable construction. Fit over most prescription eyewear.

B. Strategy® OTG—Lightweight TPE body with snug fit. Fit over most eyewear to help provide impact protection.

C. Futura™ OTG—Offer distortion-free 180° field of vision. Fit over most prescription eyewear.

D. Flex Seal® OTG—Silicone construction with soft body seal withstands extreme temperatures. Pivoting clips allow positioning on a hard hat or above the ears. Low-profile design fits over most prescription eyewear.

E. Stealth®—Soft, flexible elastomer seal conforms to facial contours. Quick-adjust headband clips. Prescription insert holder sold separately.

F. Stealth® Reader Goggles—Low-profile, wraparound design with pivoting headband clip and adjustable-slide neoprene headband.

G. Stealth® OTG—Pivoting headband clip and wide adjustable-slide headband allow goggles to be used comfortably with hard hats and over most prescription eyewear.

H. Carbonvision™—Wide-vision goggles with a soft, flexible body and frame conform to your face for excellent fit.

About Gloves and Glove Sizing

ABOUT GLOVES

Safety gloves add a layer of protection against dirt, grime, abrasion, cuts, lacerations, and burns. Gloves generally end at the wrist or elbow and are sometimes used with sleeve protectors to extend protection up the arm. Specialized gloves can have a variety of coatings and linings to provide additional benefits, such as heat-, cut-, and needlestick-resistance.

GLOVE SIZING CHART

To determine glove size, measure the the distance around the palm of the hand at the knuckles. Look up the measurement (in inches) in the chart to determine the corresponding size.

Palm Size (in):	6 to 7	7 to 8	8 to 9	9 to 10	10 to 11	11 to 12
Size:	XS	S	M	L	XL	2XL
Other Sizes:	Women's			Men's		
				Universal		
				One Size Fits Most		
					Jumbo	

Disposable Glove Materials

Nitrile gloves provide high resistance to puncture, tearing, and abrasion, as well as good chemical resistance. They are generally thinner and more tactile than vinyl gloves.

Natural rubber-latex gloves provide high elasticity and dexterity, exceptional grip in wet and dry applications, and good resistance against rips and tears. They can cause allergic reactions in some people.

Neoprene gloves are resistant to chemical splash, provide a good grip when wet, and stay flexible across a range of temperatures. They are more comfortable than nitrile gloves and less comfortable than latex and polyisoprene.

Vinyl gloves are latex-free and are generally used for frequent, short-term use in common, everyday applications. They are less formfitting and provide less protection against chemicals, tears, and abrasion than latex gloves.

Polyisoprene gloves are formfitting and have high tactile sensitivity, making them a good choice for picking up small items. They are latex-free and resist tears, punctures, and abrasion.

Polyethylene gloves (sometimes called sandwich gloves) are made of thin, clear, lightweight plastic and are intended for frequent, short-term use.

Condor · MCR SAFETY · MICROFLEX® · Ansell · SHOWA

General Purpose Disposable Gloves

Disposable gloves create a barrier between your hands and objects you are handling to keep hands clean and protected and keep oils and dirt on your hands from transferring to the objects. They are throw away after each task to prevent cross contamination. Thinner gloves offer higher dexterity and better touch sensitivity, while thicker gloves are more durable. No. D1814 features a super-thin flocked lining that absorbs moisture to keep hands dry and comfortable.

Medical-Grade Disposable Gloves

These gloves have exceptional tactile sensitivity and are worn to protect workers from biohazards and reduce the risk of contamination. They can be worn alone or as part of a two-glove system where gloves are doubled to provide additional protection against contamination. They have an Acceptable Quality Level (AQL) rating of 2.5 or lower, which indicates that these gloves are less likely to have pinholes and imperfections that can reduce durability and performance. Nos. D1841 and D1822 feature an aloe-coated inner surface to protect hands from drying and chapping.

Scorpio® Neoprene Gloves

Top-quality supported gloves are made to protect against a wide range of oils, acids, caustics, alcohols and many solvents, with good mechanical hazard resistance. The gauntlet cuff protects wrist and forearm.

Style Nos. 08-352 and 08-354—100% liquidproof gloves have a soft, stretchy knit liner that absorbs perspiration and helps prevent chafing. The textured finish provides an excellent wet grip.

Style Nos. 09-924, 09-928, 09-430, and 09-022—Quilted lining and top-quality full coating gloves with a comfortable contoured shape offers improved dexterity and reduced hand fatigue. Style No. 09-022 gloves permit intermittent handling in hot liquids up to 356°F and cold temps. down to -13°F.

- Meet FDA regulations for food contact, except Nos. 4T435 and 5AC18

Style No. 19-938—Premium-quality ¾-dipped gloves are designed for maximum protection. The fabric lining improves puncture and snag resistance, and the rough finish gives firm grip on wet surfaces.

Style Nos. 19-024 and 19-026—Double thermal liner allows intermittent contact with hot surfaces up to 400°F. A rough finish provides added protection and grip. The glove liner is removable for laundering.

Neoprene Chemical-Resistant Gloves

Sanitized cotton lining retards the growth of bacteria, mold, and mildew, reduces perspiration odor, and improves comfort.

Latex Blend—Durable Chem Master® gloves are double dipped; first in natural rubber latex for superior flexibility and strength, then in compounded neoprene blend for added chemical resistance and physical resilience. The black over blue construction warns you of wear and the need for replacement. Nonslip tractor-tread grip allows runoff of fluids. Excellent resistance to acids, oils, salts, and detergents.

Cut and Abrasion Resistance for Hand and Arm Protection

ANSI/ISEA are the American National Standards Institute and International Safety Equipment Assocation. The ANSI Cut and Abrasion Resistance tables shown here are provided by ANSI and help identify the level of resistance provided by a material, enabling compliance with OSHA regulations 1910.138 (a) and 1910.138 (b), mitigating risk of injury, and increasing worker productivity.

Cut-resistant gloves protect hands from direct contact with sharp edges such as glass, metal, ceramics, and other materials. Cut resistance is a function of a glove's material construction. High-performing fabrics add cut protection without adding thickness. The ANSI/ISEA 105-2016 standard provides a consistent scale for manufacturers to rate their products in each of the designated areas based on standardized test methods.

Abrasion level indicates the wear resistance properties of a material. This test method provides a comparative ranking of material performance, which can be used as an indication of relative end-use performance. Glove coatings improve abrasion level over uncoated gloves.

Cut-Resistant Gloves for Food Processing Environments

- Sold individually

Gloves are designed for comfort and dexterity while using knives, blades, and utensils in primarily dry food applications. Select gloves are specifically designed to protect areas most exposed to cut injury on the off hand, which does not hold the knife.

Spectra® and Dyneema® polyethylene fibers used to construct certain gloves are superstrong, lightweight, and extremely moisture/UV/chemical-resistant.

Note: Dyneema® is a registered trademark of DSM IP Assets B.V.

SafeKnit®—High-strength fibers offer superior comfort and flexibility and a high level of cut resistance in heavy-duty applications.

PolarBear®, PolarBear® Supreme, and PolarBear® Plus—PolarBear Nos. G9435 and G9436 lightweight knitted gloves provide comfortable protection for wearers working with sharp blades.

PolarBear Supreme No. G9432 employs a blend of fibers and advanced knitting method to provide the extremely high cut protection of stainless steel with a seamless design for added comfort.

PolarBear Plus No. G9437 has a close, comfortable fit good for most off-hand applications and to clean and change slicer blades.

PawGuard®—Medium-duty glove provides a close, comfortable fit and the cut protection of a heavyweight glove. Good for most knife-hand and some off-hand applications.

VersaTouch®—Knitted variable-stitch design adjusts to the shape of the hand to reduce fatigue and enhance cut protection. Exclusive materials manage moisture and hand temperature in hot and cold environments for high levels of comfort as well as cut protection. Off-hand (left) gloves are designed with zonal plating and Dyneema® Diamond Technology.

COATING MATERIALS

Coated gloves boost job performance by enhancing grip, particularly on slippery surfaces.

Natural Rubber Latex—A natural material with elasticity that resists cuts, punctures, and slashes.

Nitrile—Protects against petroleum, acids, and solvents, and resists snags, punctures, abrasion, and cuts.

Polyurethane—Allows tactile sensitivity and helps protect hands from harmful residue and chemicals.

LINING MATERIALS

Provide high level of hand protection.

Polyester—Cost-effective, durable material wicks moisture away from the skin. Well-suited for a wide range of demanding applications.

Kelvar®—Aramid fiber offers cut and heat resistance good for automotive, sheet metal, and glass handling tasks.

HPPE—High performance polyethylene material offers cut, puncture, and abrasion resistance in carpentry and joining tasks and when handling ceramics, glass, and plastics.

ActivArmr® Cut-Resistant Gloves

Ansell

▪ For dry and light oil environments

Lightweight, proprietary knits and snug-fitting designs deliver breathable, second-skin dexterity for all-day protection. Durable, comfortable gloves are good for general industrial and construction use. Select designs have specific liner, coating, and design features for specialized trades.

A. Cold Weather High-Visibility—2-ply design provides superior protection from the elements. Soft acrylic terry layer keeps hands warm in cold conditions. Bright orange liner offers extra visibility, and contrasting black ¾ double-dipped, sandy-finish coating provides excellent grip.

B. Medium-Duty Hi-Viz™—Highly visible bright orange liner and coating has a reflective logo to stand out in low light. Features Ansell Grip Technology™ to help wearers retain their grip on wet or oily objects, reducing fatigue, muscle strain, and risk of repetitive strain injury.

C. Multipurpose Medium-Duty—Reinforced palm ridges and a layer of Kevlar withstand harsh abrasion and cuts and deliver excellent dexterity and precision while working with rough materials and power tools. Adjustable pull-tab wrist with ID nameplate.

D. HVAC—Offers superior cut protection, enhanced wet/dry grip, and advanced dexterity while working with ducts and other sharp/jagged materials. Hook-and-loop neoprene closure with pull tab for tight fit.

E. General Industry—Stretch armor yarn combines Kevlar and Intercept Technology® to protect against snips, screws, and sheet metal to deliver excellent protection in general construction, installation, HVAC, and industrial tasks. Foam nitrile coating provides enhanced grip.

F. Heavy Laborer—Ergonomic, breathable glove provides superior comfort and protection from punctures, cuts, and abrasions during extended periods handling concrete, wood, or metal debris. Intercept Technology® employs stainless steel and Kevlar fibers to protect against snips, screws, and sheet metal. Reinforced gel-padded palm absorbs impact and vibration.

G. Multipurpose Heavy-Duty—Versatile glove is engineered to deliver ultimate cut, puncture, and abrasion resistance for the most demanding jobs in construction, demolition, sheet metal, and masonry. Intercept Technology® employs stainless steel and Kevlar fibers to protect against snips, screws, and sheet metal. Rugged construction features reinforced ridges for added palm and knuckle protection. Adjustable wrist closure with pull tab and ID nameplate.

HyFlex® Cut-Resistant Palm-Coated Gloves

Ansell

▪ **For dry and light oil environments**

Gloves are designed to balance comfort, protection, and dexterity when handling small parts and in general assembly applications.

Note: Dyneema® is a registered trademark of DSM IP Assets B.V.

Kevlar® Lining—Foam nitrile coating offers a sure grip. Style 11-500 delivers excellent cut protection and high tactile sensitivity for a broad range of applications. Style 11-510 features proprietary Intercept™ cut resistance technology, which employs nylon and Kevlar zonal plait on palm and back for flexibility, comfort, and durability with reinforced abrasion resistance.

Dyneema® Lining—Polyurethane coating offers tear and abrasion resistance, longer wear, and sure grip in dry and slightly oily environments.

Style 11-518 is a lightweight 18-ga. glove that offers a breathable, barehanded feel. Dyneema Diamond Technology provides unprecedented comfort, dexterity, and protection for precision handling and assembly of sharp, ultrafine parts.

Style 11-624 features ergonomic design with engineered yarn to provide comfort, softness, and coolness. Style 11-627 Dyneema® and Lycra® liner is cool and comfortable to help reduce hand fatigue.

Style 11-435 antistatic seamless plaited glove combines glass fiber and nylon yarn with Dyneema® fiber for cut protection. Eco-friendly coating provides enhanced dexterity and comfort.

HPPE Lining—Style 11-644 Ansell Cut Protection Technology™ combines a proprietary blend of high-performance polyethylene yarn (HPPE) with a polyurethane coating for enhanced cut protection, wear life, and comfort with a high level of dexterity.

Style 11-927 offers enhanced protection and a consistent grip on objects coated with lubricants in a wide range of viscosities. Oil-repellent Ansell Grip Technology™ with ¾-dip geometry grips in medium-duty oily applications almost as if conditions were fluid-free.

Kevlar/Stainless Steel Lining—Intercept Technology® yarn blend offers superior cut resistance, light weight, and outstanding dexterity. Resists heat and molten splashes. Foam nitrile coating helps grip when handling sharp parts and knives. Excellent for dry and light oil environments while handling glass, sheet metal, wood, concrete blocks, and other jobs in construction, metal fabrication, and assembly.

Style 11-501 stretch liner fits bare-hand close, to reduce the risk of snags and provide outstanding dexterity. Style 11-511 enhanced cuff overedging increases wrist elasticity. Style 11-515 high-visibility materials ensure fingers can be seen while installing glass and doing other tasks.

Cut-Resistant Gloves

SHOWA

Feature Hagane Coil® design that combines Hagane stainless steel with polyester to provide a high level of cut resistance.

S-TEX® 376—Ergonomic design with a ¾ nitrile-coated base that helps protect from abrasion, grease, and oil. An additional coating of nitrile foam covers the palm and fingertips to provide a secure lasting grip in oily and wet conditions.

S-TEX® 300—The form-fitting design allows maximum dexterity while the natural rubber palm coating has a rough textured finish for a secure grip under dry or wet conditions. Open-back design offers breathability for greater comfort.

S-TEX® 350—Nitrile coating on palms resists abrasions, snags and punctures, and protects against petroleum, acids, and solvents. Rough finish helps provide a firm grip under dry and greasy conditions. Comfortable open-back, ergonomic design.

S-TEX® 541—Polyurethane coating for dexterity, flexibility, abrasion resistance, and protects hands from grease and oil. Seamless liner helps prevent irritation for enhanced comfort. Ergonomic design reduces hand fatigue and the open back design helps promote breathability for greater comfort.

S-TEX® 303—Feature a shell with the added combination of Kevlar® to the stainless steel core for excellent hand protection from cuts and lacerations. Rubber palm coating for greater wet/dry grip and enhanced durability. Open-back design offers extra comfort and flexibility.

ActivArmr® Cut-Resistant Gloves for Oilfield Environments

Specialist styles are engineered to help keep hands dry and protected in messy environments, with breathable nitrile foam ¾ dip for enhanced grip and comfort. Intercept Technology®, with stainless steel and Kevlar® fibers, helps protect against cuts from sharp edges. The better grip on wet or oily objects offered by Ansell Grip Technology™ helps reduce fatigue, muscle strain, and risk of repetitive strain injury. High-visibility color helps boost safety in dirty or dark conditions.

Oilfield Services—Oil-repellent, water-resistant glove provides excellent grip and protection. It helps protect hands from oil and grease and from contact with heated pipes and vessels. Hi-vis design includes a retroreflective logo for low-light signaling.

- For dry and light oil environments

Oil and Impact—This style is made to help wearers stay comfortable and productive all day in rigorous upstream exploration and production environments. It features a TPR impact bumper on the back plus engineered synthetic/natural fiber yarns for high cut protection and dexterity, and proprietary wet-grip technology.

- For extreme oil environments and impact protection

Glove Coating and Lining Materials

Choose from a variety of coating material and liner options.

COATING MATERIALS

Bipolymer—Combination of nitrile and polyurethane that provides durability, abrasion resistance, softness, and dexterity.

Natural Rubber Latex—A natural material with elasticity that provides resistance to cuts, punctures, and slashes with a safe, secure grip.

Nitrile—A synthetic rubber that resists snags, punctures, abrasion, and cuts. Nitrile is suitable for people with latex allergies and provides resistance to petroleum, acids, and aromatic and chlorinated solvents.

Polyurethane—Flexible synthetic material helps protect hands from harmful residues and chemicals while providing grip and abrasion resistance. Allows tactile sensitivity.

PVC—Synthetic thermoplastic polymer provides abrasion resistance, tactility, and dexterity combined with wet and dry grip. Well-suited for applications with moderate to high wear rates.

LINING MATERIALS

Bamboo—Lighter, softer, and more absorbent than cotton or synthetic materials. Breathable material wicks moisture away from the skin. 100% natural bamboo knit shells are inherently strong, antibacterial, biodegradable, and provide UV protection.

Knit—Standard-weight lining allows hands to breathe for cool and comfortable extended-wear protection.

Nylon—Lightweight lining provides high tensile strength and dexterity.

Polyester—Durable, economical lining wicks moisture away from the skin.

Nitrile Coated Seamless Knit Gloves

Condor

- For dry and light oil environments

These light-duty gloves are designed for dexterity, flexibility, a secure grip, and to provide protection from abrasion, snags, cuts, and punctures. The durable synthetic nitrile coating resists grease, oils, and aromatic and chlorinated solvents—and it's suitable for wearers with latex allergies.

Flat-dipping curves the gloves like a hand for reduced hand fatigue and to help stay productive in a wide variety of jobs. The comfortable knit wrist helps keep dirt and debris out of your glove.

Select the coating finish that best suits your needs. Smooth coating offers excellent fingertip and hand sensitivity. Protect your hands from slipping when working with oily and greasy materials, without giving up softness and dexterity.

HyFlex® Nitrile Coated Gloves

Ansell

Style 11-800 and 11-801—Lightweight, flexible gloves allow dexterity with protection and grip in precision assembly and general handling. Increased stretch and flexibility in high-stress areas let the hand move more freely with less fatigue and more comfort, boosted by the excellent breathability. Nylon spandex elastic lessens the risk of latex allergy, and the silicone-free materials reduce potential product contamination.

- For dry environments

Style 11-900—Oil-repellent industrial work gloves are made for secure handling, dexterity, protection, and comfort. They offer a dry grip and abrasion resistance in moderately oily manufacturing and maintenance tasks.

- For dry and light oil environments

Style 11-840—Lightweight knit dipped gloves are a good choice for those who move from task to task in a busy workday. The proprietary FORTIX® nitrile foam coating boasts superior abrasion resistance. Its boosted breathability lets your hands stay cooler and drier with less sweat. The second-skin liner is shaped to the natural contours of the hand for added comfort, superior tactility, and greater dexterity.

- For dry environments

Style 11-926—Enhanced flexibility, oil grip, and tactility, plus improved oil repellence and wear life, are designed into these lightweight gloves. Fine-gauge nylon fiber spandex liner is ¾-dipped for full back-of-finger protection.

- For oily environments

Smooth Nitrile Coated Gloves

Nitri-Flex® Lite—Flat-coated gloves provide a tacky grip for wet and dry applications. Lightweight nitrile with a seamless nylon liner. Designed for comfort, flexibility, and dexterity. Perfect for small parts assembly, inspection, shipping and receiving, light fabrication, and material handling.

Showa® 376—Thin nitrile coating provides comfort, sensitivity, and splash protection against a wide range of chemicals. Elastic wrist holds glove in place. Superior grip in oily applications makes it ideal for dry and light oily environments.

Atlas®—Designed with coating that provides optimum flexibility yet resists cuts and abrasion. Lightweight with ventilated back for breathability. Provides easy movement with excellent dry grip in general-purpose applications.

Nitrile Coated Gloves

- For dry and light oil environments

Easy Flex®—Finger and palm coating lets the back of the hand breathe while protecting the working area. Gloves are snag-, cut-, and puncture-resistant. The nitrile coating repels oil and grease for a good grip. Gloves mold to the shape of the hand for a more relaxed, comfortable fit.

HyLite®—Comfortable natural hand shape is easy to wear for a long workday. The proprietary nitrile coating is flexible, repels oil, and has good mechanical resistance—to abrasion, cuts, punctures, and tears. This alternative to cotton, light leather, and PVC is silicone-free to help ensure metal sheets stay clean.

Hycron®—Heavy-duty coating is a proprietary nitrile formulation that offers superior resistance to snags, abrasion, and punctures. These rugged gloves are stronger and more flexible than PVC and 3 times more durable than heavy-duty leather. They provide an excellent grease/oil barrier and do not degrade like leather or cotton.

High-Visibility Impact-Resistant Mechanic's Gloves

EXO® Industrial Athlete Hi-Viz Impact—Performance-fit gloves for demanding jobs have a vibration-reducing reinforced palm and all-around impact protection, plus reinforced fingertips. Reflective accents and hi-viz colors help boost visibility and safety. Secure hook-and-loop wrist closure.

Industrial Impact Cotton Corded—The cotton cording provides all-around grip at an economical price for oil and gas, mining, demolition, heavy construction, and rigging applications.

Industrial Impact Rigger—Duraclad® reinforced palm, rope channel, and thumb boost grip and durability for heavy industrial environments, oil extraction and refinining, mining, demolition, and rigging.

KONG® Dexterity Super Grip—Proprietary Diamondclad® silicone-fused palm offers nonslip performance and maximum dexterity on wet and oily surfaces. Designed for complete hand and finger impact protection in rugged oil and gas environments. Abrasion-resistant materials are used in the reinforced saddle and thumb.

KONG® Oil and Waterproof—Cold condition gloves also are windproof for protection and comfort in miserable conditions on the rig or in the fields. Breathable material lets sweat evaporate to help keep hands dry and warm. The proprietary palm material offers superior abrasion resistance. Hi-viz palm and back of hand, multilayer microfleece insulation, and impact-resistant knuckle, finger, and metacarpal protection round off the rugged design.

Vibram® Rigger—Antistatic, antisaturation gloves are made for extreme durability and maximum grip when handling ropes and cables. The design features a 3-D beveled rope channel to boost directional grip, and impact-protective base of palm.

Vibram® O.B.M. and O.B.M. XOR—The Oil-based Mud Palm (O.B.M.) line is made for dirty, greasy jobs, with a tread pattern designed to channel high-viscosity lubricant and cold-temperature flexibility. The impermeable palm has an impact-protective base. Fingertips are designed for maximum grip on saturated tools and equipment. Maximum dexterity also is designed into these extremely durability gloves. O.B.M. gloves have PTFE protection on shell fabrics for increased resistance to oil and water. O.B.M. XOR (Extreme Oil Resistance) have a nitrile-coated cotton shell good for saturated environments.

Coated String Knit Gloves

Seamless construction with knit wrist for a close, comfortable fit and enhanced dexterity.

A. to C., Palm-Coated—Available with a raised dot pattern on the palm side or flat-dipped pattern on the palm and sides of the fingertips. Flat-dipped gloves conform to the hand and resist degradation through stretching.

D. to K., Double-Sided Coating—Gloves coated on both sides are fully reversible for extended wear. Available with a raised dot pattern, flat dipped, or with a fish net pattern.

Leather Glove Information

GRADE/MATERIALS

Leather Grade—As a natural product, leather material can vary in color, thickness, and response to water, heat and cold. Grading starts from the top with A, which usually is the softest and has very few surface flaws. Other grades can be a little tougher and are likely to have more surface flaws. Leather cut from the side and shoulder of the animal offers high durability. Full- or top-grain leather comes from the external side of the hide and is typically smooth. Split leather or suede is more economical, but not as durable as grain leather.

Cowhide—Excellent abrasion resistance, breathability, and thermal protection.

Deerskin—Features the highest tensile strength. Soft, flexible, and long wearing. Suitable for jobs where optimal dexterity is important.

Elkskin—Offers the best dexterity, reduces hand fatigue, resistant to oils and moisture, and does not crack or stiffen.

Goatskin—Most abrasion resistance. Soft and pliable. Twice as durable as cowhide and pigskin materials.

Pigskin—High abrasion resistance and heat protection. Material is flexible and won't stiffen when wet. Suitable for jobs that are exposed to moisture.

THUMB STYLES

Keystone—1-pc., inset thumb is double-sewn with double thickness at critical wear points. Provides extra comfort and allows extra wear.

Wing—Thumb design extends to the side of the hand and offers comfortable gripping and free thumb movement. Provides extended wear.

Straight—Cut as 1 piece extending straight from the wrist. Less material than the similar wing thumb, reducing the cost of the glove.

CUT STYLES

Gunn—Seamless back for greater comfort; the palm side of the middle 2 fingers is sewn into the palm at the base of the middle 2 fingers. Reinforced seam with a welt increasing gloves' durability and wear life.

Clute—Parallel seams on back of glove made from a continuous piece of leather for greater ease of movement, comfortable gripping, and a roomy fit.

CUFF STYLES

Knit Wrist

Safety—2½" cuff length

Gauntlet—Extended 4½" cuff

Slip-On

Shirred Wrist

Leather Driver's Gloves

Condor

- Gunn cut
- Shirred wrist

These comfortable work gloves cover the whole hand with excellent abrasion resistance, breathability, and thermal protection. Most are stitched with strong polyester thread. No. H6336 Kevlar® stitching is extra-strong, plus its stretch resistance helps keep the seam tight.

Welding Gloves

APPLICATIONS

Stick—Thick, heavy-duty gloves with welted fingers offer superior burn, spark, and high-heat resistance. Gauntlet cuff provides additional wrist protection. Nos. 23J997 and 23J996 have padded forearm and elbow. Nos. 4AZH3 and 4AZH4 have Kevlar® knit sewn to cuff.

MIG—Provide good burn, spark, and medium heat resistance. Enhanced dexterity allows operation of trigger and welding guns. No. G6139 has hook-and-loop wrist closure.

TIG—Thinner leather provides superior feel and dexterity with light burn, spark, and heat resistance.

Choose the Right Ergonomic Products to Help Prevent Injuries

Using **ergonomic principles** that design the workplace to accommodate employees can help in **avoiding Work-Related Musculoskeletal Disorders** (WMSDs). MSDs are soft tissue injuries that affect the blood vessels, ligaments, muscles, nerves, and tendons.

Investment and Return

Simple and relatively inexpensive workplace modifications such as adjustable work platforms, footrests, or chairs can aid in major reductions in workplace stress.

Corrective Measures

A reduction in workplace stress can help decrease lost work days and improve productivity and team member morale. Employee training on ergonomic issues can aid personnel in identifying problem areas within their work area that may require ergonomic improvements.

Employee Evaluation

Receiving feedback from team members regarding their ergonomically-designed tools and furniture can help ensure the equipment meets their specific requirements.

Back Supports

Condor

Elastic Knit Supports—Elastic construction provides gentle compression and warmth for a more comfortable fit.

Spandex Supports—Spandex fabric is breathable and provides firm support for a more comfortable fit. Nos. D0581 and D0588 feature stretchable bias binding for greater flexibility, a wider range of motion, and a more comfortable fit.

Weight-Lifter's Style Support with Lumbar Pad—Feature more support, less flexibility, and a restricted range of motion compared to other back supports. Ideal for use in heavy lifting applications.

Establishing an Electrical Safety Work Program

OSHA 29 CFR 1910.333(a) states that employers must employ safety-related work practices to prevent electrical shock or other injuries resulting from either direct or indirect electrical contact. The **NFPA 70E Standard for Electrical Safety in the Workplace** requires employers to perform an **Electrical Arc Hazard Assessment** for each situation.

A hazard assessment must be performed using 1 of the following 2 methods:

1. Incident Energy Analysis
2. Arc Flash PPE Category

The **Grainger Online SafetyManager® System** offers NFPA 70E Electrical Safety Training - 2015 Series to help you keep your workplace in compliance with the NFPA 70E Electrical Safety standard. Access our library of **easy-to-follow training courses** (subscription required), including Training Module 4: Personal Protective Equipment and Clothing requirements, as well as **helpful technical articles** at **grainger.com/safetymanager**

Protective Clothing and Personal Protective Equipment Table 130.7(C)(16)

Arc Flash Category*	Minimum ATPV Rating cal./cm²	Required Garments	Required Protective Equipment
1	4	Shirt (Long Sleeve) and Pants (Long) or Coveralls; Flash Suit Hood or Faceshield; Jacket, Parka, Rainwear, or Hard Hat Liner (AN)	Hard Hat; Safety Glasses or Goggles (SR); Hearing Protection (Ear Canal Inserts); Heavy Duty Leather Gloves; Leather Footwear (AN)
2	8	Shirt (Long Sleeve) and Pants (Long) or Coveralls; Flash Suit Hood or Faceshield and Balaclava; Jacket, Parka, Rainwear, or Hard Hat Liner (AN)	Hard Hat; Safety Glasses or Goggles (SR); Hearing Protection (Ear Canal Inserts); Heavy Duty Leather Gloves; Leather Footwear (AN)
3	25	Shirt (Long Sleeve) (AR); Pants (Long) (AR); Coveralls (AR); Flash Suit Jacket (AR); Flash Suit Pants (AR); Flash Suit Hood, Gloves, Jacket, Parka, Rainwear, or Hard Hat Liner (AN)	Hard Hat; Safety Glasses or Goggles (SR); Hearing Protection (Ear Canal Inserts); Heavy Duty Leather Gloves; Leather Footwear (AN)
4	40	Shirt (long sleeve) (AR); Pants (Long) (AR); Coveralls (AR); Flash Suit Jacket (AR); Flash Suit Pants (AR)	Hard Hat; Safety Glasses or Goggles (SR); Hearing Protection (Ear Canal Inserts); Heavy Duty Leather Gloves; Leather Footwear (AN)

** 1 of the 2 methods used to determine the PPE category for a job task. AN = As Needed (Optional), AR = As Required, SR = Selection Required.*

Pro-Wear® Electrical Arc Flash Protective Apparel Kits

- Meet ASTM F1506 and NFPA 70E standards, except Nos. J6808 and J6809 meet NFPA 70E only

Made from arc flash resistant material. Sewn with Nomex® thread, except Nos. J6808 and J6809. Kits Nos. J6808 and J6809 feature a total fabric weight of 11 oz./yd.² compared to the standard 40 calorie garment with a fabric weight of 18 oz./yd.². The lighter fabric helps keep you cooler and improves comfort without compromising safety.

CPA CHICAGO PROTECTIVE APPAREL

No. J6799

Electrical Arc Flash Protective Apparel Kits

- Meet NFPA 70E standard, except No. J6474 meets ASTM F1506 and NFPA 70E

Garments are a cotton/nylon blend, except No. J6474 is single layer UltraSoft® cotton/nylon fabric for more comfortable wear, and No. J6799 is TuffWeld® fabric that provides inherent FR protection with greater comfort and durability. Kits include a gear or storage bag that helps keep items close at hand and eases kit transport.

Pro-Wear® Electrical Arc Flash Protective Apparel

SALISBURY by Honeywell

- Meets ASTM F1506 standards

Pro-Wear® 8, 12, and 40 cal./cm² garments are made from arc flash resistant material, sewn with Nomex® thread. 100 cal./cm² garments are made from a proprietary layered fabric and sewn with flame-resistant Nomex® thread.

Coveralls—Full cut with set-in sleeves, expansion back, hook-and-pile front closure, 2-ply Nomex® wristlets, and adjustable pant cuff gussets.
- Meet NFPA 70E standards

Coats—For use with PRO-HOOD® Nos. 5EU30, 3YA98, and 2NNG2. Expansion back. Dual-stage front closure with plastic zipper, hook-and-pile storm flap, and Nomex® wristlets. 32"L.
- Meet NFPA 70E standards

Bib Overalls—Relaxed cut, integrated suspenders, adjustable hook-and-pile waist straps, and pant cuff gussets.
- Meet NFPA 70E standards

Overpants—Flared legs and loose design with elastic waistband allow pants to be easily taken on and off and fit over existing clothing. Hook-and-pile cuff adjustment and front closure.
- Meet NFPA 70E standards

Hoods—Included universal air system allows safe, easy breathing.
- Meet ASTM F2178 standards

CrossVent™ Hood

Protera® Electrical Arc Flash Protective Apparel

NATIONAL SAFETY APPAREL®

- Meets ASTM F1506 and NFPA 70E standards

DuPont™ Protera material is inherently flame-resistant and its protection cannot be washed out or worn away. 8 cal./cm² coverall is constructed from a lightweight 6½ oz. Protera material. 40 cal./cm² flashsuit features a multilayer combination of Protera, Kevlar®, and Nomex® material that is 30% lighter than flame-resistant cotton/nylon blend garments, reducing the risk of heat stress.

Coveralls—2-way covered zip-front closure, hidden snap closures on breast pockets, 2 rear and 2 front pockets, and elastic waist. 32" inseam.
- NFPA 2112 certified

Coats—Stand-up collar with hook-and-loop placket closure and knit wrists. 32"L.

Bib Overalls—Easily adjustable shoulder straps. 2 pockets and hook-and-loop fly and calf closure. 30" to 32" inseam.

Hood—Includes faceshield and universal hard hat adapter.
- Meets NFPA 70E-2015, ASTM F2178-12, and OSHA 1910.269

CrossVent™ Hood—Lightweight and washable hood provides a quiet breeze that cools and decreases lens fogging. Internal fans are attached with FR hook-and-loop for ease of removal for laundering. Includes two 9V batteries.
- Meets NFPA 70E-2015, ASTM F2178-12, and OSHA 1910.269

NATIONAL SAFETY APPAREL® SALISBURY by Honeywell Condor BRADY

Electrical Arc Flash Protective Accessories

- Tested to ASTM F2178 and NFPA standards

Head Protection Kits, PPE CAT 2—Provide total head protection for NFPA 70E PPE CAT 2 in 1 convenient kit. Antifog faceshield provides an excellent field of view.

Weight Balancing Arc Flash Faceshields, PPE CAT 2—Sit in a balanced, compact position, centered over top of hard hat when not needed. Faceshields provide a clear view and full color recognition.

Arc Goggle and Balaclava—High-energy arc goggle and carbon OPF blend fiber balaclava (sold separately) are designed to be worn in combination for ATPV arc rating of 53 cal./cm².

Note: Not approved for NFPA 70E-2015.

Insulating Aprons—Insulated 42"L rubber aprons protect workers from low-voltage electrical hazards. Made of high-strength reinforced rubber. Include 2 Nomex® bib straps and 2 Nomex waist straps with nonmetallic buckles. Meet ASTM F2320 standards.

Hair and Beard Nets—Made of woven Nomex® fabric. Meet ASTM F1506 standards.

Storage Bags and Backpack—Faceshield Storage Bag features a fleece lining and a drawstring closure. Canvas Storage Bag holds arc flash clothing and accessories. Backpack is made of water- and abrasion-resistant reinforced fabric. Features interior and exterior reinforced compartments with flap closures, integrated handle, and padded, adjustable straps.

Leather Arc Flash Gloves

YOUNGSTOWN #1 IN DURABILITY

- Meet NFPA 70E-2015 standard and OSHA 29 CFR Part 1926

Made of 18 oz./yd.² goatskin leather, with an ergonomic design for a comfortable fit with excellent dexterity. Reinforced fingers, saddle, palm, and knuckle improve durability and protection for the wearer. No. J0410 has a slip fit cuff for secure fit and is arc rated 27 cal/cm². No. G6920 has a 4" cuff for wrist protection and is arc rated 20.8 cal/cm².

Rubber Insulating Gloves and Accessories

RUBBER INSULATING GLOVES

- Meet ASTM D120, IEC EN60903, and NFPA 70E standards

Protect against electrical shock. Gloves should be tested every 6 months in accordance with ASTM F496, "Standard Specification for In Service Care of Insulating Gloves and Sleeves" at an authorized safety equipment testing facility.

Note: Switching glove colors assures all gloves are in the proper test cycle per OSHA and ASTM requirements. Every time a new pair of gloves is used, the colors need to be alternated. Alternate colors by using 1 color for the first test period and a different color for the second test period. Example: Red Class 00 gloves are worn for first test cycle period, then Black Class 00 gloves are worn during the second test cycle period. Class 1, 2, and 3 gloves feature an exterior and interior color for easier inspection of tears.

ASTM Voltage Chart

Class No.	AC Test Voltage	AC Max. Use Voltage†
00	2500V	500V
0	5000V	1000V
1	10,000V	7500V
2	20,000V	17,000V
3	30,000V	26,500V

† AC maximum use voltage in accordance with ASTM specifications.

LEATHER PROTECTORS

- Meet ASTM F696 standard

Top-grain leather protects rubber insulating gloves against physical damage. Goatskin is soft, pliable, and offers greater abrasion resistance than cowhide.

MOLDED SLEEVES

- Meet ASTM D1051 standard

Natural rubber. Curved arm style. Type I.

GLOVE KITS

Convenient kits include 1 pr. of rubber insulating gloves with goatskin leather protectors and canvas glove bag.

ACCESSORIES

Canvas Glove Bags—Designed for temporary storage of gloves and protectors. Belt clip for glove bag included.

Sleeve Harness—Holds sleeves securely in place with buttons. Color may vary.

Glove Inflator Kit with Adapter—Field-inspect gloves in a wide range of sizes, including those in Class 0 and Class 00. Includes inflator, adapter, carrying bag, and nylon fastening strap.

Glove Dust—Cooling frictionless powder absorbs moisture and perspiration inside rubber gloves.

Electrical Protection Equipment

LINE HOSES

Type II ozone-resistant rubber remains flexible in cold weather. Safety orange color.

INSULATING BLANKETS AND ACCESSORIES

Fabric-reinforced Type II ozone-resistant Salcor® rubber is flexible and customizable.

Roll—Clear PVC Roll Blanket No. 5EU29 allows visibility of insulated surfaces.

Low-Voltage—Feature hook-and-loop fasteners for fast installation and safe removal. Yellow color.

Eyelet Style—Reinforced beaded edges for added strength and tear resistance. Designed to be easily secured using Clamp Pin No. 5ZV66 (sold separately). Safety orange color.

Slotted Style—Designed for flexibility in special cover-up situations. Use where protruded objects interfere with proper placement of other cover-up devices.

Magnetic Blanket Button—Apply with shotgun stick or rubber gloves to eyelets of insulating blankets.

Blanket Clamp Pin—Holds insulating blankets in place.

Blanket Canisters—Molded, high-impact orange polyethylene canisters protect insulating blankets in storage.

ARC PROTECTION BLANKETS

- Meet ASTM F2676 standard

Provide barrier protection from exposure to explosive electrical arcs and flashes. Nos. 5YGL0 and 5YGL2 include loops for keeping blanket in place; Nos. 5YGL1 and 5YGL3 include grommets. Not electrically insulating.

GROUNDING SETS AND ACCESSORIES

Easy to apply multiple grounding jumpers. Recommended for 3-phase wye systems. Canvas Bag No. 5ZV85 available separately.

VOLTAGE DETECTOR KITS

Audio/visual indicator verifies live or de-energized conductors and equipment. Operate on 3 C cell batteries. Case and shotgun adapter included.

HOT SWITCH STICKS AND STORAGE CONTAINER

Storage Container—Tubular weathertight PVC container includes 2 mounting brackets and 4 bolts.

Hot Switch Sticks—Closed cell foam-filled tubular fiberglass.

- Meet ASTM F711 standard

SWITCHBOARD MATTING

Flame-Resistant Shirts and Pants

Note: Additional sizes, including long lengths, are available on Grainger.com®.

BULWARK EXCEL FR® SHIRTS
- Excel FR Work Shirts: PPE CAT 1, arc rating ATPV 7.7 cal./cm²
- Excel FR ComforTouch® Shirts: PPE CAT 2, arc rating ATPV 8.6 cal./cm²

Feature flame resistance for the life of the garment. Long sleeve with banded, topstitched collar, tailored sleeve plackets, and topstitched cuffs with adjustable button closures.

BULWARK HI-VIS FR SHIRTS
- Button Down Shirt: arc rating ATPV 8.6 calories/cm²
- Crewneck Shirt: arc rating EBT 10 calories/cm²

Front and back with 2" silver reflective striping. Button Down Shirts have comfortable Ultrasoft® fabric and a high-visibility upper half for ANSI compliance.

BULWARK HI-VISIBILITY ZIP-FRONT HOODED FLEECE SWEATSHIRTS WITH WAFFLE LINING
- Arc rating ATPV 35 cal./cm²

Front and back feature 2" flame resistant heat seal silver reflective striping. Zipper front and comfortable waffle knit lining.

BULWARK IQ SERIES® FR PERFORMANCE HENLEY SHIRT
- Arc rating ATPV 8.2 cal./cm²

Rugged Westex G2™ fabric is breathable and moisture wicking to help keep you cooler and drier.

EXCEL FR COMFORTOUCH® UNIFORM SHIRTS
- Arc rating 8.6 cal./cm²

Durable Comfortouch cotton/nylon fabric with 2 chest pockets having button flap closures and sewn-in pencil stall.

EXCEL FR® HENLEY SHIRTS
- Arc rating ATPV 9.6 cal./cm²

Single spade chest pocket, knit henley collar, and rib-knit cuffs.

HI-VISIBILITY WORK SHIRTS
- Arc rating ATPV 8.4 cal./cm²

Front and back with 2" silver reflective striping. Button front, 2 chest pockets with button closures, and sewn-in pencil stall.

NOMEX® IIA UNIFORM SHIRTS
- Arc rating ATPV 4.8 cal./cm²

Two chest pockets with button flap closures and sewn-in pencil stall.

NSA LONG SLEEVE T-SHIRTS
- Arc rating ATPV 4.0 cal./cm²

Moisture-wicking fabric aids in heat stress and can proactively regulate your body temperature.

EXCEL FR® COMFORTOUCH® DUNGAREES
- Arc rating ATPV 14.6 cal./cm²

Durable, triple-needle felled outseam, button closure, and 5 jean-style pockets. Handy rule pocket and utility pocket on right leg; hammer loop and utility pocket on left leg.

BULWARK FLAME RESISTANT EXCEL FR® COMFORTOUCH® PANTS
- Arc rating ATPV 12.2 cal./cm²

Button closure with 2 slack-style front pockets, 2 set-in hip pockets, and a left hip pocket with button closure.

SLEEVE

- Meets ASTM D6413-13

Comfortable and washable, this flame-resistant sleeve helps protect your upper arm from sparks in light welding applications. Fits easily into welding glove cuffs and has an elastic top and wrist for a more comfortable fit. The anti-static Weldlite™ fabric is rot and mildew resistant, and it preserves its flame resistance for up to 50 home or 25 commercial washings. Sold by the pair.

JACKET

This cool, comfortable, and washable jacket offers protection from sparks in light welding applications. Relaxed fit helps provide all day comfort, and it has adjustable snap wrists and a large inside pocket. The anti-static Weldlite™ fabric is rot and mildew resistant, and it preserves its flame resistance for up to 50 home or 25 commercial washings. The leather-reinforced, black anodized snaps are non-reflective.

Heat-Reflective Aluminized Clothing

- Reflects up to 95% radiant heat

STEEL GRIP®

5-ply Dual Mirror® construction provides wear resistance, reflectivity, and resistance to molten metal splash. 15-oz. aluminized PFR Rayon (ARL) fabric is used for short-term exposure. 19-oz. aluminized Thermonol (ATH) is a Kevlar®/fiberglass fabric for long-term contact.

Jackets—Feature laydown collar and semi-raglan sleeves. Covered front snaps with wrist snap closure. Seams are serged and stitched with Kevlar®.

Hoods and Replacement Faceshield—Include swing-open, clear 7" x 11" Lexan® facepiece. Adjustable ratchet suspension.

Gloves—Kevlar® blend gloves have an aluminized back to reflect radiant heat and a wool lining for thermal protection and protect up to 900°F intermittent handling.

Bib Aprons—Adjustable web neck and waist straps attach with clip snap and D-ring fasteners. All edges are serged.

NSA®

Aluminized Carbon Kevlar® fabric provides excellent thermal insulation and maximum protection against molten metal splash, including molten iron and aluminum.

Coats—Feature front snap closures with back flap and underarm eyelets for ventilation. Split sleeve with snap closures.

Hood—Fitted hood allows hard hat use. Extended bib provides chest, back, and shoulder coverage. Adjustable leather shoulder straps fasten under armpits and secure the hood in place. Lens/faceshield clips on aluminum frame. Features a gold film that radiates heat.

Sleeves—Snap wrist closure and open top.

Gloves—Heat- and abrasion-resistant gloves with open-palm style and reversed wool lining for thermal protection.

Bib Apron—Adjustable leather straps on the neck and at the waist fasten with a buckle and snap to secure the apron in place.

Work Pants and Jeans

Dickies

INDUSTRIAL WORK PANTS
▪ Style No. 2112272

Multiple pockets include deep, reinforced front pockets and left back pocket with button closure. Feature wide belt loops. Durable pants are made of 65% polyester/35% cotton vat-dyed wrinkle-resistant twill that is industrial-wash friendly and has stain release properties. Relaxed fit.

TRADITIONAL WORK PANTS
▪ Style No. 874

Work pants have a center crease for a professional look. Printed waistband for comfort. Details include tunnel belt loops and 4 pockets (2 front and 2 welt back pockets; back left pocket has button closure). 65% polyester/35% cotton wrinkle-resistant twill has stain release properties. Original fit.

PAINTER'S PANTS
▪ Style No. 1953

Pants are designed to fit over work boots. They have triple-stitched felled seams for durability. Details include multiple tool pockets, hammer loops, rule pocket on right leg, and double back pocket. 100% cotton painter's drill. Relaxed fit.

PREMIUM INDUSTRIAL CARGO PANTS
▪ Style No. 2112372

Durable cargo pants have a gusseted crotch and wide belt loops. Features reinforced front pockets and 2 cargo pants with hidden zipper closure; extra pockets on outside left cargo pocket and inside right cargo pocket. 65% polyester/35% cotton vat-dyed twill. Relaxed fit.

PERFORMANCE SHOP PANTS
▪ Style No. LP605

Feature 6 multifunctional pockets from cell to bellow. Back pockets are angled for easy access. These durable pants sit slightly below waist, have a straight leg and provide extra room in seat and thigh areas. Comes equipped with StayDark® technology and feature moisture wicking abilities along with contour yoke for ease of movement. Made of 65% polyester/35% cotton this flexible, wrinkle-resistant twill has stain release properties and is industrial wash friendly. Heavy CB belt loop and double knee has opening for kneepad. Relaxed fit.

CARPENTER JEANS
▪ Style No. LU200

Tough, heavyweight denim fabric with triple-needle stitching on the side seam, yoke, and seat seam for long life. Straight-leg style with a relaxed fit that sits slightly below the waist with extra room in the seat and thigh for a more comfortable fit. Include a hammer loop and dual tool pockets. The pre-washed denim is durable enough to withstand industrial laundering.

ANSI High-Visibility Safety Apparel Information

Conspicuity classes specify visibility and other requirements for warning vests or other apparel, based on the wearer's activities and the environment. The classes describe the amount and placement of reflective material, vest style, and background material. For further information, see Quick Tip #153: High-Visibility Clothing Standards at grainger.com/quicktips.

PERFORMANCE CLASS 1 (TYPE O)
Offers the minimum amount of high-visibility material to differentiate the wearer from non-complex work environments and is only appropriate for off-road (Type O) environments.

PERFORMANCE CLASS 2 (TYPE R OR P)
Provides additional amounts of high-visibility material that allow for better definition of the human form. Performance Class 2 is considered the minimum level of protection for workers exposed to roadway rights-of-way and TTC (temporary traffic control) zones.

PERFORMANCE CLASS 3 (TYPE R OR P)
Provides greater minimum level of high-visibility material that the apparel must contain. Performance Class 3 provides more visibility to the wearer in both complex backgrounds and through a full range of movement by the required placement of backgroud, retroreflective, and combined performance materials on the sleeves and pant legs (if present). A garment or vest without sleeves worn alone is not considered Class 3 protection.

Flame-Resistant Rainwear

- Meet ASTM D6413

Safetyflex®—Specialty PVC on polyester material is durable, mildew resistant, and provides a comfortable fit. Fabric is chemical resistant to many acids, alcohols, alkalies, oils, and salts, while the Therm-O-Rad sealed seams provide you 100% liquidproof protection. The jacket features full cut shoulders with 90° sleeve to body angle for supreme freedom of movement, an attached hood, and a storm fly front to seal out rain, wind, and contaminants. The tapered sleeves can fit in protective gloves and can accommodate glove rings for additional safety. Overalls have a plain front and feature a stitch bonded, non-woven lining that resists tears, punctures, and dissipates moisture. Suspenders have a snap lock buckle for easy adjustments. Snap closures are heavy-duty for long life.

Magnaprene™—Nylon fabric is coated with neoprene for abrasion and mildew resistance, and to protect against acids, chemicals, oils, and solvents. The stitched and taped seams offer 100% waterproof protection. Jacket features batwing sleeve construction for maximum freedom of movement and take-up snaps on the sleeves for an adjustable fit. Comfortable corduroy tip collar and a storm fly front that helps seal out rain, wind, and contaminants. Pants have take-up snaps on the ankle cuffs for an adjustable fit and heavy duty snaps for long life.

TINGLEY
A TRADITION SINCE 1896

High-Visibility Arc-Flash and Flame-Resistant Rainwear

- 2" silver reflective tape
- Jackets and Coats are Type R Class 3
- Bib Overalls are Class E

Eclipse™ Quad-Hazard® rainwear features Thermo-Grid® technology to block out heat energy, while the flame resistant PVC coating on Nomex® provides 100% liquid proof protection. Ideal for use in all electric and gas utilities, power generation, pipeline and construction work, as well as in petrochemical applications. Resistant to many acids, oils, alcohols, salts, and alkalies.

Jackets and Coats—High-visibility, liquid-proof coats provide excellent arc flash protection and have an overhead shoulder design to let you do overhead work without limiting your range of motion. The zipper/storm fly front has a snap closure and hidden non-conductive, non-corrosive hardware to seal out heat, wind, rain, and contaminants, while hook and loop take-up straps on wrists help assure an adjustable fit. D-ring access lets you attach a fall protection harness. Also feature a flame-resistant corduroy collar with rollaway hood and a full-vented cape back for improved air circulation.

Jackets Nos. J2556 and J2557 also provide flash fire protection, and have an adjustable elastic drawcord.

Bib Overalls—Snap fly front overalls feature Quad-Hazard® high-visibility, liquid proof, arc flash, and flash fire protection. Suspenders have heavy-duty non-conductive quick-release buckles and crossovers, while the hook-and-loop take-up straps on ankle cuffs provide an adjustable fit and help seal out contaminants.

Chemical Resistant Bib-Style Aprons

PolyCo Ansell Condor

Economy Chemical-Resistant—VR® polyolefin aprons resist industrial concentrations of hydrofluoric, hydrochloric, sulfuric, and nitric acids and are FDA Approved for indirect food contact. Vinyl aprons resist oils, fats, and chemicals. Urethane aprons offer lightweight comfort and long wear. PVC and PVC blends aprons provide superior flexibility and resist grease, fats, oils, punctures, and abrasion. Nitrile aprons are resistant to oil, fuel, and hydrocarbons.

Premium Chemical-Resistant—SBR rubber aprons are abrasion resistant and protect against mild solvents, chemicals, and acids. Neoprene and Hycar aprons protect against a wide range chemicals, acids, oils, grease, and animal fats while maintaining flexibility over a wide temperature range.

Basic SMS—The Spun-Bonded Melt-Blown Synthetic (SMS) fabric is a polypropylene material constructed of 3 durable layers that resists abrasion and wear.

Polypropylene—Durable polypropylen material resists wear and abrasion. No. H2308 has a hook-and-loop closure for easy donning/doffing.

Spunbond Polypropylene—Lightweight, spunbond polypropylene material is comfortable to wear.

Tyvek® 400—Fabric features no films or laminates to abrade or wear away. Protection is built into the fabric itself, and it provides better protection than microporous film fabrics even after wear and abrasion.

Microchem® by AlphaTec® Protective Coveralls

Ansell

Each style has elastic ankles and cuffs.

68-1500

Breathable design help reduce the risk of heat stress and is proven to filter 100% of particles less than 3 microns. Ideal for applications involving stripping, clear up or handling of asbestos, general maintenance, construction and contract cleaning. Serged seams combine strength with a particle barrier.

68-1500 PLUS FR

Flame retardant and anti-static SMMS nonwoven fabric provides a good barrier to particulates and low hazard liquid sprays or splashes. Comfortable design allows full freedom of movement when worn over heat and flame protective clothing. Strong serged seams provide a particle barrier.

68-1800

Protects from low hazard liquid spray, splashes, and particles protection. Bound seams provide superior strength and a liquid and particle barrier. Low linting to help reduce the risk of fiber contamination in some critical areas.

68-2000

Helps provide both protection and comfort with exceptional liquid and particulate protection. Bound seams offer excellent strength and a liquid and particle barrier. Meet ASTM F1761 and EN 14126:2003 resistance to penetration of blood, body fluids and blood-borne pathogens.

68-2000 COMFORT

Specifically designed for those working in warmer climates or working environments to help reduce the possibility of heat stress. Bound seams offer superior strength, and a liquid, and particle barrier.

Disposable Protective Clothing

TYVEK® 400

Fabric is comfortable and lightweight while providing puncture- and tear-resistant protection in wet or dry applications without restricting movement when stretching and bending. Offers inherent barrier to particles down to 1 micron even after abrasion. Coveralls meet OSHA requirements for asbestos and lead abatement.

TYVEK® 400D

Fabric offers the high protection of Tyvek on the front of the garment, while the back is made from highly breathable DuPont™ ProShield® fabric to increase breathability and help reduce heat stress. Thumb loops on sleeve ends and elastic waists help keep garments in place when donning gloves and performing strenuous activities. Excellent for use in demanding applications that have limited frontal exposure to hazardous particles and liquid splash. Both fabrics are low-linting with antistatic properties. White front and blue back.

Coveralls—Zipper-front coveralls with comfort fit design for greater range of movement.

Collared Shirts—Long-sleeve shirt with 4 plastic snaps and serged seams.

Pants—Feature elastic waistband and serged seams.

Collared Lab Coats—Feature 5-snap front with a storm flap, serged seams, and set-in sleeves that allow greater freedom of movement.

Pullover Hood—Elastic opening hood features serged seams and is shoulder-length to offer greater coverage.

Bib-Style Apron—Provides full front coverage and features bound neck with long ties and bound seams.

Sleeves—Feature serged seams.

Shoe/Boot Covers—Feature serged seams. Skid-resistant Nos. 6LY43 and 4LUR4 prevent slipping.

Chemical-Resistant Protective Coveralls

Provide puncture- and tear-resistant protection in wet or dry applications without restricting movement.

Tychem® 2000—Provide protection from light chemical splash and biohazards. Made from polyethylene-coated DuPont™ Tyvek®.

Tychem® 4000—Provide protection against a wide range of chemicals. Made from DuPont™ Tyvek® fabric with Saranex® 23-P lamination construction.

Tychem® 9000—Multilayer chemical barrier provides broad protection for handlers of hazardous materials. Puncture-, tear-, and abrasion-resistant. Feature zipper-front, double storm flap with hook-and-loop closure.

Tychem® 2000 SFR—Protects against a range of chemicals and also provides secondary flame resistance when worn over FR garments like those made with DuPont™ Nomex®.

Tyvek® 800 J Chemical-Resistant Protective Clothing

- CE Category III Type 3-B, 4-B, 5-B, and 6-B; require additional taping for liquid-tightness

Garments combine freedom of movement, durability, and protection. They resist pressurized jets of low-concentration, water-based inorganic chemicals. Proprietary fabric is designed to offer chemical, liquid, and oil protection in very humid applications. Elastic around the face and a self-adhesive chin flap help make a tight seal around a full-face respirator.

Jacket and Bib Overalls (Sold Separately)

Flame-Resistant Jacket and Bib Overalls (Sold Separately)

Ansell AlphaTec® Breathable Chemical-Protective Clothing

Chemical Protective Clothing, Jackets and Bibs—This everyday protective workwear has a proprietary Gore® membrane to help manage heat stress. The clothing offers exceptional liquid chemical splash protection for all-day safety. It is tough and durable but lightweight for excellent comfort. Red color.

Chemical Protective Clothing, Flame Resistant—Designed to be flame resistant while providing an exceptional barrier against organic and inorganic chemicals and biological agents. Seams are stitched with thermally stable and chemically inert TENARA® sewing thread to help provide a strong liquid and particle barrier.

Ansell Microchem® by AlphaTec® Chemical Resistant Clothing

68-2300 Series—Protect against harmful chemicals and blood borne pathogens, while being lightweight and relatively strong and durable. Bound seams provide superior strength in a liquid and particle barrier.

68-4000 Series—Provide an exceptional barrier against biological agents and organic and inorganic chemicals. Feature ultrasonically welded and taped seams for a strong liquid and particle barrier.

General Purpose Boots

General purpose rubber boots keep feet dry and protected from liquid splash, including water, oil, and chemicals. They are worn over socks when feet are in constant contact with water and chemicals where regular footwear would be damaged. They are generally taller than other footwear, allowing workers to tuck in pant legs and create a higher barrier between the liquid and legs.

Food Processing Boots

Food-processing boots are worn over the sock to protect workers from hazards encountered in food production and processing settings, such as animal fat, food by-products, and cleaning chemicals. They are for use in the latter part of the food production process and are not for use around live animals.

Full Rubber-Dipped Neoprene

Neoprene is flexible and form-fitting for a snug, secure fit. The rubber coating on the entire outside surface up the boot is waterproof to keep feet dry.

Lightweight PVC

Made of lightweight air-injected material that is self-insulating to keep the wearer cool in hot environments and warm in cold environments.

Ankle Boots

Cover the foot to the ankle to protect the bottom, sides, and top of the foot.

Mid-Calf Boots

Cover the foot, ankle, and lower leg to the calf. Workers can tuck pants into the overboots to keep pants dry.

Knee-High Boots

Cover the foot, ankle, and lower leg to the just below the knee to protect workers where splash and water depth are above the ankle and calf. Workers can tuck pants into the overboots to keep pants dry.

Farming, Agriculture & Fishery Knee Boots

Farm, agriculture, and fishery boots are worn when workers are in continuous contact with animal fluids, barnyard waste, and waste from fish and fish processing. Farming and agriculture boots are worn where feet come into contact with farm animals and animal waste produced by livestock, chickens, pigs, and other animals. Fishery boots protect against fluids in marine-related activities near oceans and lakes, including fishing and shrimping.

Hazardous Materials Boots

Hazardous materials (hazmat) rubber boots are worn over-the-sock to protect feet from nerve agents and extremely harsh and caustic chemicals, such as those encountered when responding to hazmat emergencies or when working in chemical processing. They are tested to meet NFPA 1991 (Edition 2016) standards for vapor-protective ensembles for hazardous materials emergenices. Hazmat boots are generally worn with other protective equipment. PVC is highly chemical-resistant and dielectric. Steel toes protect the front of the foot from minor injuries caused by walking into obstacles.

Rubber Hip-Waders
No. D0327

Waders

Waterproof waders are worn over the sock and extend to the hips or chest to cover more of the body than knee boots, allowing wearers to stay dry when working in deep water. They are worn by water and wastewater workers, plumbers, and others who work in deep water. Rubber and PVC are chemical-resistant. PVC weighs less than rubber, reducing fatigue when waders are worn for long periods of time.

Anti-Fatigue Overshoes

Anti-fatigue overshoes attach to existing footwear to provide a cushioned base that can help reduce back and leg pain caused by standing or walking for long periods of time. They are often used by warehouse and assembly line workers and food service personnel where anti-fatigue mats are impractical. Anti-fatigue overshoes for **food service applications** are resistant to water, cleaning chemicals, and oils. **Lightweight overshoes** weigh less than general purpose overshoes to reduce fatigue when wearing them all day.

General Purpose Overboots & Overshoes

General purpose overboots and overshoes are waterproof to keep feet dry and provide some chemical resistance. They can be put on and taken off without removing existing footwear, making them convenient for intermittent use or use by individuals who require orthotics, who want to use their own footwear, or who have other special footwear considerations.

Overshoes

Slip over existing footwear to cover the foot to the ankle to protect the bottom, sides, and top of the foot.

Mid-Calf Overboots

Cover the foot, ankle, and lower leg to the calf. Workers can tuck pants into the overboots to keep pants dry.

Knee-High Overboots

Cover the foot, ankle, and lower leg to the just below the knee to protect workers where splash and water depth are above the ankle and calf. Workers can tuck pants into the overboots to keep pants dry.

Safety Toe Overshoes, Toe Caps & Metatarsal Guards

Safety-toe overshoes, toe caps, and metatarsal guards are worn over regular shoes or boots when protection is needed intermittenly. **Safety toe caps** protect the front of the foot and top of the toes from damage caused by walking into obstacles. **Metatarsal guards** protect the top of the foot from light impact injuries, and **leg guards** protect the top of the foot and shin.

WINTER WALKING | SEYMOUR MIDWEST

Floor Stripping & Coating Overshoes

Floor stripping and coating overshoes are worn over existing footwear to protect floors and provide traction to reduce slips and falls. They are worn on slippery floors or when workers are removing an existing or adding a new floor finish. The surface covers the bottom of the foot and is nonmarring. **Traction overshoes** have a sole that is coated with a nonmarring abrasive grit to increase traction and protect floor surfaces. **Rigid-spiked overshoes** minimize contact with freshly applied coatings, allowing it to flow back into place after workers walk on it.

Traction Devices

Traction devices attach to the bottom of existing footwear to provide secure footing when walking on ice, snow, and other wet or slippery surfaces. Transitional traction devices are attached with straps and can be moved out of the way when moving indoors. Devices for sustained use are designed to be worn for longer periods of time either indoors or outdoors.

Men's 6" Safety Work Boots

Timberland PRO

▪ **All available in sizes between 7-14**

Rubber outsole is abrasion-, slip- and oil-resistant.

Note: All styles are available in medium width; for wide widths and additional sizes, go to grainger.com/footwear

Style No. 1064—Designed with lightweight, flexible cement construction, these boots feature a microfiber leather upper, a mesh lining with antimicrobial treatment, a removable open cell polyurethane insole, an EVA midsole, a rubber outsole, and a fiberglass shank.

Style No. 26063—Features shaped alloy safety toes for lightweight protection and fit. Cement construction provides flexibility and reduced break-in time. Molded polyurethane midsole for lightweight, durable cushioning. Contoured open-cell polyurethane footbed has temperature-regulating technology sock cover to keep your feet drier.

Style No. 47592—Premium full-grain leather upper for comfort and abrasion resistance. Breathable water-impermeable lining helps to keep feet dry in most types of wet conditions. Mesh lining has antimicrobial treatment for odor control.

Style No. 52562—Antifatigue technology includes a contoured footbed, an antimicrobial mesh liner, and roomy toe provide all-day comfort. Steel shank delivers structural support, and a puncture-resistant footplate provides flexible underfoot protection.

Style No. 85594—Leather work boot is designed with antifatigue technology for long hours in tough conditions. Features a contoured single-density open-cell polyurethane footbed with antimicrobial cover for breathability and odor control.

Respiratory Filter and Gas/Chemical Cartridge Abbreviations

PARTICULATE FILTER TYPES

NIOSH-approved filters are rated as N95, R95, P95, N99, N100, or P100. The number 95, 99, or 100 indicates the filter efficiency percentage rate.

N Series—Used in environments free of oil aerosols.

R Series—Resistant to oil mist. Use is restricted to one 8-hr. work shift.

P Series—Oil-proof with time use restrictions specified by manufacturer.

GAS AND CHEMICAL CARTRIDGE ABBREVIATIONS

AG—Acid Gas
AM—Ammonia
CD—Chlorine Dioxide
CL—Chlorine
FM—Formaldehyde
HC—Hydrogen Chloride
HF—Hydrogen Fluoride
HS—Hydrogen Sulfide
MA—Methylamine
MV—Mercury Vapor
OZ—Ozone
OV—Organic Vapor
SD—Sulfur Dioxide

Disposable Particulate Respirators

- NIOSH approved

Electrostatically charged microfibers are designed for ease of breathing. R and P series respirators may have additional time-use limitations. Refer to instructions for specific information.

A. GENERAL INDUSTRIAL

Provide protection against certain non-oil-based (N series respirators) or oil-based (R and P series respirators) particles.

B. HEALTHCARE/SURGICAL

- Meet CDC guidelines for tuberculosis exposure control
- FDA cleared for use as surgical masks

Reduce exposure to airborne particles generated by electrocautery, laser surgery, and other powered medical instruments. Also reduce the potential exposure of the wearer to blood and other body fluids. No. 49U069 fold-flat mask has a 3-panel design to help reduce eyewear fogging. Chin tab provides easy adjustment and positioning.

C. WELDING

Feature adjustable straps (except No. 4MH67), Cool Flow™ exhalation valve, and cake-resistant filter material (except No. 4MH67) for comfort and durability.

OV/OZ—Feature a carbon layer that helps provide respiratory protection where metal fumes may be present including those with ozone and nuisance level organic vapors.

D. ODOR-REMOVING

AG—Suggested for protection against particles where nuisance-level (levels beneath OSHA PEL) acid gases may also be present such as primary aluminum smelting, chemical processing, glass etching, and paper processing.

OV—Use in foundries, undercoating, petroleum operations, and agriculture where exposures may include nuisance-level (levels beneath OSHA PEL) concentrations of organic vapors.

E. 100 LEVEL

Use where certain OSHA substance-specific regulations require 100 level respirator for particle exposures to lead, cadmium, arsenic, or methylenedianiline (MDA). Excludes asbestos.

Disposable Particulate Respirators

- NIOSH approved

Dura-Mesh® shell resists collapse, even under hot and humid conditions. Contour-molded nosebridge has a foam cushion for an easy soft, comfortable seal without a metal nose band.

A. Standard 2-Strap—Elastic straps are attached securely so they don't break the seal.

Nos. 1DLL7, 1DLN1, and 1DLP3 feature a low-profile design with a lower, wider nosebridge. No. 6DMW8 FastFit® offers flat-fold convenience with cup-shape comfort. Individually packaged for hygiene in a dispenser box.

B. Adjustable Cloth Straps—Tug-to-fit adjustable cloth straps provide speedy, comfortable fit. No. 3NML1 has a low-profile design to fit easily under welding hoods.

C. and D. AirWave®—FlexFit® design expands and contracts as you move and speak for all-day comfort. Wave design lets more air flow in and out for easier breathing. SmartStrap® models with adjustable soft cloth strap allows the respirator to hang loosely from the neck when not in use.

E. HandyStrap®—Cloth strap with buckle allows mask to hang around the wearer's neck, always ready for use.

F. Healthcare and Surgical Masks—Meet CDC guidelines for tuberculosis protection. 2 latex-free straps—on the 1500 series they are color-coded by size.

No. 6DMW9 FastFit® opens quickly and seals easily, and handily refolds to store in a scrubs pocket. Hygienic individual packaging in a quick-access dispenser box.

7800 Series

9000 Series

Half- and Full-Facepiece Respirators

MOLDEX
Ideas that wear well.

User-friendly reusable respirators are designed for comfort and convenience, with a wide field of vision and fewer parts for simplified maintenance. Filters and cartridges are sold separately.

7000 and 7800 Series Half-Facepiece—Lightweight respirators with extra-wide sealing flange and compact design fits well under welding helmets and with safety glasses. The premium 7800 Series offers higher heat and compression resistance with enhanced comfort and durability.

9000 Series Full-Facepiece—Streamlined, ultra-lightweight respirators feature a ratchet fastening strap system and standaway head harness for easy, quick removal. The frameless mask has an extra-wide lens for extended field of view.

9000 Series Full-Facepiece Accessories—Spectacle Kit lets you use prescription lenses (not included) with the respirator. Lens Covers help protect lenses from scratching and overspray.

Half- and Full-Facepiece Respirators

3M

- NIOSH approved

Cartridges and filters sold separately. Fit test kits sold separately, see page 1775.

6000 SERIES

Soft, lightweight facepiece with easily adjustable head strap offers increased comfort. Full-facepiece models feature a large lens that provides a wide field of view.

6500 SERIES

Adjustable head harnesses provide excellent fit and comfort over long shifts. The Cool Flow™ valve helps reduce heat and moisture, for better comfort and easier breathing. With a light, comfortable silicone face seal. Models with Quick Latch mechanism permit easy on and off; no need to remove your hard hat or faceshield as you move in and out of contaminated areas.

FF-400 SERIES

Feature a soft silicone nose cup and large lens that allow for superior peripheral vision. Unique 3M™ Scotchgard™ protector helps the lens resist dirt, paint, and stains and makes it easier to clean. 3M™ Cool Flow™ exhalation valve reduces heat and moisture buildup inside the facepiece.

7000 SERIES

Soft, pliable facepiece and adjustable head strap for maximum comfort. Half-facepiece respirators are easily adjustable and feature Cool Flow™ exhalation valve. Full-facepiece respirators feature standard nose cup to prevent fogging, double-flap face seal, and an antiscratch polycarbonate lens for greater durability.

AIR REGULATOR ASSEMBLY

Use with 6000, FF-400, and 7000 series facepieces and supplied air hose to have respirators in supplied air mode. Kit includes waist belt, air control valve, and breathing tube.

ACCESSORIES FOR FULL-FACEPIECE RESPIRATORS

Spectacle Kits—Allow prescription eyewear to be worn with respirator.

Lens Covers—Protect lenses from soil or damage.

Advantage® Half- and Full-Facepiece Respirators

MSA The Safety Company

- NIOSH approved

Cartridges and filters sold separately. Fit test kits available; see page 1775.

200 LS Half-Facepiece—Soft, light, and comfortable. Sealing surface conforms to wearer.

420 Half-Facepiece—Allow quick adjustment for stable, comfortable fit. Adapt to a variety of head sizes and facial contours. Switch easily between lock-down and drop-down modes.

420 Half-Facepiece with Threaded Cartridge Adapters—1-pc. headband and harness assembly eliminates pressure points; form-fitting neck buckles and wide straps provide a comfortable fit. Face seal adapts to facial contours. Adjustable crown strap and quick, easy switch between lock-down and drop-down modes for flexibility. Include 2 cartridge adapters for use with Comfo® threaded cartridges, available on Grainger.com®.

3200 Full-Facepiece—Soft facepiece with rubber head harness and adjustable straps. Respirators feature antiscratch polycarbonate wrap-around lens and nose cup.

4200 Twin-Port Full-Facepiece—Dedicated twin-cartridge respirators with adaptable bayonet cartridge adapters mounted onto the lens. Rubber head harness. In-turned lip provides ideal face seal.

4200 Respirator RD40 Adapter—Converts the 4200 full-facepiece respirator for applications including supplied air respirators, powered air-purifying respirators (PAPRs), and gas mask configurations.

3200 and 4200 Accessories—Spectacle kit allows prescription eyewear to be worn with respirator. Lens covers protect lenses from soil or damage.

3100 Full-Facepiece

MSA The Safety Company

Advantage® Single-Port Full-Facepiece Respirators

- NIOSH approved

3100 series respirators have a nosecup that helps reduce lens fogging. Canisters attach directly to the facepiece with a single-port, standard-thread filter connection at the chin.

Honeywell NORTH

Half- and Full-Facepiece Respirators

- NIOSH approved

Cartridges and filters sold separately. Fit test kits available; see page 1775.

HALF-FACEPIECE RESPIRATORS

5500 Series—Comfortable, low-profile design in latex-free materials is an economical choice for subcontractors, plant guests, and occasional users.

7700 Series—Medical-grade silicone half mask with a dual flange provides complete face-to-mask sealing and all day comfort.

RU8500 Series—Features a speech diaphragm that provides vocal clarity and aids in communication.

RU8800 Series—Has a triple flange that provides 3 surface areas to seal mask to the face. Designed to fit the widest range of facial types with silicone construction for all day comfort.

FULL-FACEPIECE RESPIRATORS

5400 Series—Economical models feature a 200° field of vision. Support APR, PAPR, and CF-SAR configurations.

RU6500 Series—Soft, durable silicone seal for all day comfort. Models feature the most configurations for APR, PAPR, and CF-SAR using either the center port or side ports.

7600 Series—Medical-grade silicone sealing surfaces and a speech diaphragm that allows clear communication. Antiscratch polycarbonate lens provides a 200° field of vision and a downward view for sight in all directions. Support APR, PAPR and CF-SAR configurations.

7600 Series Welding—The welding shield can be flipped up or removed when not welding. 2" x 4¼" shade plates not included.

FACEPIECE ACCESSORIES

Backpack Adapter—Backpack relocates APR cartridges to wearer's back to accommodate welding faceshields, or to move cartridges away from paint spray to help extend cartridge life. Converts half- (5500, 7700, RU8500, or RU8800 series) to a backpack-style respirator and helps minimize weight on the facepiece.

Welding Attachment—Converts 5400 and 7600 Series full-facepiece respirators to a welding respirator. Uses standard 2" x 4¼" welding lens, sold separately.

Spectacle Insert Kits—Metal spectacle frame with support wire accommodates personal prescription lenses (not included) that are fitted to the frame.

Honeywell NORTH

Primair® 700 Series Powered Air-Purifying Respirator (PAPR)

No. 449N06

Features 3-speed airflow for more comfortable use in manufacturing, pharmaceutical, and hospital lab applications. The illuminated keypad has large buttons you can operate even when wearing gloves. The battery and blower motor are integrated into an ergonomic belt that distributes the weight for a more comfortable fit. Filter locks into place with just a ¼ turn to help ensure a tight and secure connection.

Description	Includes	Mfr. Model	Item No.
PAPR System	Blower, Battery, Charger, Comfort Pad, Belt, Bonus Starter Kit with PA100 Filter and Optional Filter Cover	PA701HE	449N06
Straight Breathing Tube		PA031	449N07

More Headgear Choices

Personnel who already have fit-tested North® Honeywell® headgear can adapt it to a CA200 PAPR system—all it takes is a breathing tube and cartridge. This lets the wearer keep familiar gear and helps reduce the complexity of respiratory protection compliance. See page 1763 for NIOSH-approved half- and full-facepiece respirators.

Honeywell NORTH

CA200 Series Powered Air-Purifying Respirator (PAPR) Assembly Kits

No. 16M250

No. 16M256

- NIOSH approved

Assemblies feature a triple-alarm system with audible, vibratory, and visual alerts that warn the wearer when there are blocked or clogged filters and at 5% and 10% battery life remaining. Airflow automatically adjusts to meet OSHA and CSA cfm requirements. Each kit includes a blower, Li-ion battery, belt (standard or decon), single-unit charger, flow meter, and carrying case. Require breathing tube, headgear, and cartridges, sold separately.

Note: Personnel who already have fit-tested Honeywell® North® tight fitting facepieces can adapt it to a CA200 PAPR system—all it takes is a breathing tube and cartridge. This lets the wearer use a common facepiece and helps reduce the complexity of respiratory protection compliance. See page 1763 for NIOSH-approved tight fitting facepieces (ie. half- and full-facepiece respirators).

ALLEGRO INDUSTRIES

Pureweld® Powered Air-Purifying Respirator (PAPR) System

- NIOSH approved
- Meets ANSI Z89.1 Type 1 Class G for head protection, Z87.1+ for faceshield/eye protection

All-in-1 welding helmet provides head, eye, face, and respiratory protection. The helmet has an integrated lightweight, battery-driven positive-pressure PAPR, which eliminates waist belts and trailing hoses or leads. A heads-up display and visual and audible alarm for air flow and filter and battery life are provided by the electronic systems management (ESM) feature. Flow rate adjusts to 7.6 or 8.2 cfm. The system can function as a fracking respirator to help protect oil and gas workers against inhaling silica dust. The welding window flips up for easy visibility and conversation through a clear inner visor. Choose fixed or autodarkening filter. Includes neck cape, HE filter, battery pack, and charger.

EZ Air and EZ Air Pro PAPRs

- NIOSH approved
- Meet ANSI Z89.1 Type I Class G for head protection, Z87.1+ for faceshield/eye protection

Complete particulate system for industrial applications offers combined respiratory, eye, and face protection against hazardous airborne contaminants and flying debris. Include downtube with FR cover, blower, HE filter, waist belt, battery, charger, and storage bag. Batteries provide up to 8 hr. use per full charge, 5 hr. full recharge time.

EZ Air—Motorized, lithium-ion battery operated system provides constant supply of fresh, filtered air over user's face. Large helmet design accommodates safety glasses under faceshield. Has airduct headgear assembly and flow tester, and features audible, visual, and vibration alarms. Waist belt is lightweight and adjustable. Rechargeable battery.

EZ Air Pro—Designed with superb balance, no fit testing required. Helmets are interchangeable with supplied air respirators and be converted. Ergonomically and lightweight waist pack has low profile style and holds NiMH battery pack.

Adflo™ Powered Air-Purifying Respirator (PAPR) Systems for Welding

3M

- NIOSH approved
- Facepieces meet ANSI Z87.1-2010 for high impact

Headgear combines hard hat, welding filter, and positive-pressure airflow to help wearer be productive and comfortable while welding or grinding.

The lightweight, compact blower offers continuous filtered air for protection against particles and certain gases. Its slim profile fits into tight places.

The Speedglas™ filter provides superior optical performance. Speedglas™ headgear's auto-darkening feature allows sight at comfortable light levels, with constant eye and face protection.

Systems include a high-efficiency particulate filter, wide leather belt, lithium-ion battery, storage bag, and starter kit.

With 9100-Air Headgear—Lighter and more stable than other systems, this features an adjustable head suspension and a more balanced design. Provides more protection to the ears and sides of the neck. The smooth up-and-down pivot design can lock shield in a raised position.

With 9100FX-Air Headgear—Innovative flip-up pivot design allows easy transition from welding to grinding modes for greater welding flexibility. Clear, wide-view grinding visor offers an enhanced field of view.

With 9100MP Headgear—Provides 5 levels of welder protection in 1 comfortable and easy-to-use system. Compact and lightweight design helps protect the eyes, face, head, hearing, and respiratory system. Also provides overhead protection, increased peripheral vision, and superior optical quality.

- Meets ANSI Z89.1-2009 requirements for Type I Class G hard hats

With L-905SG Helmet—Features grinding and tack modes, with 5-position sensitivity control, adjustable recovery delay, welding shield, and wide-view faceshield that allows excellent peripheral and downward vision.

- Meets ANSI Z89.1-2009 requirements for Type II Class G hard hats

Speedglas™ Auto Darkening Filters (ADF) and Magnification Plates—Filters feature a built-in magnification plate holder and 7 selectable dark shades, plus the capability to lock in a shade for plasma and torch cutting. They also have a shade 3 grinding mode and tack welding mode to help reduce eye fatigue during tacking applications. Can be used in TIG applications on settings as low as 1A.

Sentinel XL™ CBRN PAPR System

- NIOSH approved
- Latex-free

Capacity-2-rated loose-fitting PAPR provides first receivers and other first responders with chemical and biological protection. The butyl hood assembly has a lay-flat design for easy storage; it has a field-replaceable antimicrobial head strap, superior optics, and taped seams. The rugged, dual-chamber blower delivers high flow rates. With an audible/visual low voltage alarm. The system includes a Quick Loc™ waist belt, flow meter, 3 CBRN cartridges, and nonrechargeable battery.

Description	Mfr. Model	Item No.

3M

CBRN Powered Air-Purifying Respirators (PAPRs)

Breathe Easy™ PAPR Systems—Belt-mounted systems include butyl rubber hood, breathing tubes, decon belt, CBRN cartridges, battery pack, and airflow indicator. Butyl rubber hood material meets MIL-C-51251A.

- NIOSH CBRN approved

CBRN Conversion Kit—Enables conversion of 3M™ non-CBRN Breathe Easy models to NIOSH CBRN approved systems.

Biological Conversion Kits—Convert Breathe Easy in chemical response configuration to a biological response configuration. Include 3 loose-fitting head covers, breathing tube, and HEPA filter cartridges.

3M Supplied Air System Components

Easily build a supplied air respirator system. Just choose headgear, a breathing tube, and an air source that fits your needs.

Note: Headgear, breathing tube, air control valve, and compressed air supply hoses are required parts of a NIOSH-approved system.

HEADGEAR AND ACCESSORIES

Versaflo™ M- and S-Series Headgear and Accessories—Compact, lightweight, and easy to maintain while helping protect the wearer from a range of hazards. Versatility, comfort, and ease of use make this headgear suitable for a variety of applications.

H-Series Hood and Accessories—Can be easily worn with limited facial hair or eyewear.

- Hood assembly meets ANSI Class 1, Class E requirements for industrial headgear

Speedglas™ L-SG Series Welding Headgear and Accessories—Feature arc detection electronics for use with all arc welding processes. Wide-view facepiece allows for excellent peripheral and downward vision. Headgear provides respiratory protection up to 1000 x PEL.

- Meet ANSI Class I and Type II requirements for industrial headgear

SUPPLIED AIR CONTROL, HOSES, AND FILTRATION

V-Series Air Control Devices—The devices are designed to provide a continuous air flow. For enhanced wearer comfort, Nos. 4YG10 (cool) and 1CGB7 (warm) allow the compressed air supply temperature to be adjusted up to 50°F.

Supplied Air Hoses—Combine up to 3 high-pressure hoses in any combination not to exceed 300 ft. Low-pressure hoses can only be used in single increments of 50 or 100 ft.

Compressed Air Filter and Regulating Panel—Helps filter and regulate compressed air.

SAR Headgear and Components

SAR HEADGEAR

Disposable Airline Hoods—Feature 1-pc. design with fully integrated breathing tube and head suspension. Hood adjusts easily with hook-and-loop closure and has an absorbent foam headband.

Nos. 3WXJ7 and 11V243 are splash-resistant and seal in air flow. No. 3WXK2 laminated fabric with heat-sealed seams is made to offer zero permeability to air and moisture, and provide total protection against hazardous materials.

- NIOSH approved

Full-Facepiece Respirator and Helmets—Full-Facepiece Respirator is designed for high-pressure (150 psig) SAR systems, with a double-sealing flange for close fit. Adjustable belt holds the air flow valve and over-the-shoulder hose out of the way. High-impact, antifog, distortion-free polycarbonate lens.

Low-profile, lightweight Economy Air Shield Helmet has a quick-release suspension, flip-up visor, headband ratchet assembly, cotton neck shroud, and chin guard. The high-impact, antifog polycarbonate lens with antiscratch coating provides a wide field of distortion-free vision.

Deluxe models provide head, eye, face, and respiratory protection against hazardous airborne contaminants and flying debris in demanding industrial environments. Feature fire-retardant, coated fabric neck cape. Air Shield and Welding Helmet is made of glass-filled nylon with a variable-shade autodarkening lens, shade 9-13, good for all welding processes including TIG and TIG pulsing.

- Economy model meets ANSI Z87.1-2003
- Deluxe models meet ANSI Z89.1 Type 1 Class G for head protection, Z87.1+ for faceshield/eye protection

SAR COMPONENTS

Air Flow Control Devices—Low Pressure Flow Adapter allows an LP SAR hood to connect to an ambient air pump or low-pressure air source. OBAC quick-connect design with belt and clip assembly.

High-Pressure controllers are for use with high-pressure SARs. Their low-profile design won't get in the way. Each has Hansen fittings with belt and clip assembly. Personal Air Cooler adjusts air flow up to 25° cooler than ambient. Air Temperature Controller adjusts air 25° warmer or cooler than ambient, and includes a leather sheath for protection from temperature extremes. Adjustable Flow Control Valve changes air flow for greater comfort.

Air Supply Hoses—Use low-pressure hoses with ambient air compressors and high-pressure hoses with supplied-air compressors.

Filtration Panels—3-stage filtration system removes water, oil, and particulate contaminants, and provides alerts for high levels of CO. Include pressure regulator with gauge, pressure relief valve, case and stand.

- Meet NIOSH requirements

Bullard

SAR Respirator Assemblies and Components

SUPPLIED AIR RESPIRATORY (SAR) HEADGEAR

CC20 Respirator Hoods—Hoods deliver continuous airflow and protect face, head, and neck. Provide excellent peripheral vision through 6" x 17" facepiece.

Note: To build a complete Bullard® supplied air system, choose 1 each from the following groups: respirator hoods and breathing tube assemblies for use with a breathing air compressor or free-air ambient pump.

88VX Abrasive Blasting Helmet Respirator Assembly—Respirator has a lightweight inner shell with an adjustable headband and wide-angle facepiece. Assembly includes a helmet, cape, ¼" industrial interchange fittings, breathing tube, airflow control, belt, inner/outer lens, and 5 Mylar® lens covers.

- NIOSH approved
- Facepiece meets ANSI/ISEA Z87.1-2010
- Head protection meets ANSI/ISEA Z89.1-2014

Note: For use with breathing air compressors.

BREATHING TUBE ASSEMBLIES

Control the flow of air into the respirator.

SUPPLIED AIR RESPIRATORY (SAR) COMPONENTS

Climate Control Tube—Control the temperature of air delivered to the respirator.

Air Supply Hoses—For use with breathing air compressors and have ⅜" I.D. Starter hose has ¼" female coupler and ¼" male fitting. Air supply hose for use with free-air ambient pumps. Hose has ½" female coupler and ½" male fitting.

41 Series Airline Filter—7-stage filtration system with 6 layers of filtration to remove water, oil, odors, and particulates. Includes 2 outlets with pressure gauge, relief valve, and pressure regulator. Can be used with other compressor safeguards to provide clean air to airline respirators.

CO Monitor—Displays the CO concentration with audible alarm when high CO levels are present. Includes remote alarm connection devices and connection kit for Airline Filter No. 6AM36 and any compressed breathing air source.

- Operates on 110/220VAC or 12VDC

Grade-D Breathing Air Filtration and CO Monitors—Portable Clean Air Box (CAB) system provides 3-stage filtration and carbon monoxide (CO) monitoring. Filters remove oil, water, particulates, oil vapor, and odors. Independent regulators provide proper airflow to each user. CO monitor features remote-capable, high-intensity 90dB alarm with strobe; internal and external visual display; and 90-sec. auto calibration. Powered by 110VAC or 8 AA batteries. Housed in a rugged polycarbonate Pelican® case that withstands harsh work environments.

Bullard

Portable Ambient Air Compressors

Portable Free-Air® pumps can quickly and easily supply breathable air. Transfer ambient air from a clean air location to a supplied air respirator.

Nos. 3AM92 and 6AH13 feature Carbofine outlet filter. Medium-efficiency inlet filter keeps particulates larger than 25 microns out of the air supply. Monitors, calibrators, and airline filters are not required.

No. 38NF68 includes wheel kit, roll cage, inlet filters, and pressure gauge.

Supplied Air Respiratory (SAR) Packaged Systems and Airline Assemblies

Honeywell NORTH

- NIOSH approved

SAR Packaged Systems—Kits include everything needed to set up an airline system. The rotary vane air pump supplies breathable air from a clean-air environment. Breathing tube for all systems is located behind the back to keep it out of the way.

Packages with facepiece respirators include one or two Honeywell North 7600 full-facepiece or 7700 half-facepiece mask(s) made of 100% silicone. Packages with hood respirators include a Primair™ 100 Series hood with cotton neck seal for comfort; great for users with facial hair or when fit testing is not practical.

1-person systems have a ¾-HP pump and 50-ft. breathing hose. 2-person systems have a 1½-HP pump and 2 50-ft. breathing hoses.

Supplied Airline Assemblies—No. 16M255 converts Honeywell North full-facepiece respirators (7600, RU6500, 5400) or half-facepiece respirators (7700, RU8500, 5500) into a SAR through the cartridge connection port; expanding the use of existing respirators helps eliminate additional fit test requirements.

Nos. 16M253 and 16M254 are compatible with all Primair™ series hoods. No. 16M254 includes a PVC belt for easy decon cleaning.

AIR SHIELD SARS

Provide clean, continuous air flow for personal protection. Low-profile, lightweight air shield/helmet has quick-release suspension and antifog polycarbonate lens. Each system includes shield/helmet(s), ambient air pump, and 50-ft. breathing hose. 1-person systems have a ¾-HP pump and 1 shield. 2-person systems have a 1½-HP pump and 2 shields. Models with welding helmet have an autodarkening filter good for all welding processes including TIG and TIG pulsing.

Economy—Offer protection in body repair, chipping, grinding, and spray painting applications. Replaceable high-impact lens with antiscratch coating provides a wide field of distortion-free vision. Feature flip-up visor, headband ratchet assembly, cotton neck shroud, and chin guard. Welding helmets are made of thermoplastic resin with a shade 10 polycarbonate plate.

- Meet ANSI Z87.1-2003

Deluxe—Provide head, eye, face, and respiratory protection against hazardous airborne contaminants and flying debris in demanding industrial manufacturing environments. Feature fire-retardant, coated fabric neck cape. Welding helmets are made of glass-filled nylon with a variable-shade autodarkening lens, shade 9-13.

- Meet ANSI Z89.1 Type 1 Class G for head protection, Z87.1+ for faceshield/eye protection

ABRASIVE BLAST HELMET SAR

- Facepiece meets ANSI Z87.1

Nova 2000™ helmet features large wraparound lens for optimal vision and sound-deadening foam padding. System provides a portable air source with even air flow for 1 user and includes helmet, ¾-HP pump, and 50-ft. air hose.

Cougar™ and PUMA™ SCBAs

- NIOSH approved

Feature a first-stage regulator with minimal moving parts and a low-profile second-stage regulator with first-breath-on activation. Mighty-Light® backpack provides a stable, secure fit and enables quick cylinder changes.

Cougar™ SCBAs—Designed for industrial users who need protection against environments that are immediately dangerous to life or health (IDLH). Include silicone rubber TwentyTwenty® Plus medium facepiece with 5-strap harness and skirt and easily removable exhalation valve, plus cylinder and bell low-air alarm.

PUMA™ SCBA—Designed for users who wear glasses or are hard to fit with a conventional facepiece. The apparatus comes with a one-size-fits-all hood made of Challenge® NXT material with medium nosecup, flexible neck seal, and sealed FEP lens; cylinder; and plain whistle low-air alarm.

Highly adaptable devices not only monitor multiple gases at once, but also feature streamlined messaging capabilities to help users respond effectively to hazards. The rugged polycarbonate housing with protective rubber overmold has reinforced high-contact areas to help prevent wear from friction, plus a raised plastic rail to help protect sensors when the instrument is face-down.

Flexible interface with customizable text can keep onscreen messaging as simple as "EVACUATE" or "VENTILATE," to help reduce nuisance alarms and false evacuations. The backlit liquid crystal display can also show full-screen alarms that let users identify the source and type of hazard in emergencies.

LENS™ Wireless technology lets team members receive readings and alarms from peers' monitors for quick man-down, panic, or gas hazard response.

iAssign™ tagging lets you track user exposure and site measurement data, even when different Ventis Pro Series gas monitors are used from day to day.

The monitors can be used for personal protection, or order with pump for confined-space applications. Sensor options include flexible slot positions to adapt to a range of applications.

Note: Ventis™ Pro series use the same DSX™ Docking Stations and accessories as the Ventis MX4 Multi-Gas Detectors; find them on page 1777.

Radius™ BZ1 Area Monitors with LENS™ Wireless

INDUSTRIAL SCIENTIFIC

No. 52HN76

- 108dB audible and gas/non-gas visual alarms
- Multiple sensor options, including PID, to detect up to 7 gases
- iNet® and DSX™ Docking Station compatible

Worksite gas hazard monitors are engineered for long-lasting, easy-to-operate detection and protection. The modular design allows for smaller instrument inventories and enhanced uptime in the field. Text-based configuration and navigation simplifies setup and use.

Radius BZ1 Area Monitors—Preconfigured LENS™ Wireless networking connects devices at turn-on, for instant gas readings that can help your team react quickly to emergencies.

- Include SafeCore™ Module with DualSense® Technology

SafeCore™ Modules and Radius BZ1 Base—Proprietary, interchangeable SafeCore Modules house critical tech including sensors, software, wireless, and pumps (on select models). Smart sensors are positioned face-down in the modules to help reduce false alarms from weather conditions.

Modules fit into the durable, weather-resistant Radius Base, which has built-in audio and visual alarms designed to capture attention even in high-noise environments. Swap out modules to switch sensor setups or change from a nonpumped module to a pumped one for confined-space sampling. The large display shows customizable alarm messages such as "EVACUATE" or "VENTILATE."

DualSense® Technology employs 2 sensors to detect the same gas, to help increase worker safety.

DSX™ Docking Stations—Designed to dock a SafeCore Module for data downloads, bump tests, calibration, and settings changes.

V-Cal™ Calibration Station
No. 6UAV4

INDUSTRIAL SCIENTIFIC

Ventis™ MX4 Multi-Gas Detectors

- 95dB audible, bright LED and vibrating alarms
- DSX™ Docking Station and iNet® compatible
- Backlit LCD

True portability with multi-gas detection in single-gas size. Configured for non-pump applications or with an integral pump for sample draw applications. Available with a tough, safety orange overmold for visibility of the instrument in dark environments. Detectors with diffusion include calibration cup. Detectors with pump include calibration tubing and sample tubing. All detectors include desktop charger and rechargeable batteries.

DSX™ Docking Stations—Maintenance stations provide easy gas detector bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected No. 44ZC35 offers automatic schedule tracking with email alerts and notifications about worker exposure and instrument use and service needs.

Standalone No. 44ZC37 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

V-Cal™ Calibration Stations—Allow for quick and easy calibration or function (bump) testing of the monitor. Stand-alone operation; PC not required.

iBrid™ MX6 Multi-Gas Detectors and Confined-Space Kits

- 95dB audible alarm
- DSX™ Docking Station and iNet® compatible

Readings are shown on a high-visibility full-graphic LCD. Feature 5-way navigation button and concussionproof overmold housing. Each includes calibration cup with tubing, belt clip, carrying case, and desktop charger.

Confined-Space Kits—Contain detector, sampling pump with 10 ft. of tubing, Li-ion 24-hr. battery, single unit charger, spare alkaline battery pack, calibration cup with tubing, calibration gas and regulator, and carrying case.

DSX™ Docking Stations—Gas detector maintenance stations provide easy bump tests and calibration, with automated record-keeping to help preserve compliance data.

Cloud-Connected No. 44ZC38 can automatically track bump test and calibration schedules, and send email alerts and notifications about worker exposure and instrument use and service needs.

Standalone No. 44ZC42 automatically detects calibration gas type and expiration date when a cylinder is connected. It can automatically print bump and calibration certificates to a USB direct-connect printer (sold separately).

Tango™ TX1 Single Gas Detectors

INDUSTRIAL SCIENTIFIC

- 100dB audible, visual, and vibrating alarms
- IP66/67 ingress protection
- DSX™ Docking Station and iNet® compatible

Detectors can be ordered as a carbon monoxide, hydrogen sulfide, sulfur dioxide, or nitrogen dioxide instrument. DualSense™ technology includes 2 of the same sensor for the detection of a single gas through a proprietary algorithm and displayed as a single reading to the user. Feature segment liquid crystal display and 2 button keypad. Top of case is designed with polycarbonate with a rubber overmold and the bottom is conductive polycarbonate. Replaceable lithium nonrechargeable battery provides 3-yr. run time.

Calibration Check Gas Cylinders and Automated Test Stations

Calibration Gas Cylinders—Aluminum 500 psig cylinders contain sufficient gas for multiple MSA® instrument calibrations. Required regulator sold separately.

Automated Test Stations—Galaxy® GX2 stands provide simple, efficient gas detector testing, calibration, and charging. Compatible with detector data management systems.

Altair® 2X and Altair® 2XP Single-Gas Detectors

- 95dB audible, visual, and vibrating alarms
- IP67 rating for dust and water ingress

The superior performance and long service life of XCell® sensor technology in a rugged rubberized armor housing offer enhanced wearer safety, compliance, and traceability, as well as drastically reduced total cost of ownership.

Altair® 2X—Speedy sensor response and recovery reduce gas consumption for calibration and gas bump tests.

Altair® 2XP—XCell® Pulse technology and simple flow check deliver a daily stand-alone bump test without specific calibration gas or accessories.

Altair® 5X Multi-Gas Detectors

- Audible (95+dB), visual, and vibrating alarms
- MotionAlert™ 30-sec. "man down" sensor

Rugged, datalogging portable detectors employ XCell® technology for faster performance and more than 4 yr. typical sensor life. Large buttons allow easy operation with gloved hands. Each includes calibration cap, tubing, and charger.

Altair® 5X—Integral pump for consistent flow. Nos. 44KE54 and 44KE55 measure gases simultaneously and detect VOCs. Kits Nos. 6RRA1, 6RRA0, 6RPZ9, 6RPZ8, and 45KE55 come with 10-ft. sampling line and 1-ft. probe.

- IP65 rating for dust and water ingress

X-am® 5600 Multi-Gas Detectors

6-gas capacity detector is offered in dual and single sensor configurations, with specified gas sensors. Fast, durable infrared sensors last up to 8 yr., and need calibration only every 12 mo. Select units have an IR-Ex sensor that eliminates the need for catalytic Ex sensors.

Note: Replacement sensors and accessories are available on Grainger.com®; search for "draeger replacement sensors" or "draeger gas detector accessories."

Detectors—Small, robust instruments with simple 2-button control detect and log oxygen and explosive, combustible, and toxic gases and vapors. Large LCD shows all readings and can display peaks, STELs, and TWAs.

An excellent personal monitor, it can be combined with an X-zone® 5500 (sold separately, this page) to monitor entire areas.

- Visual alarm
- Suitable for use in Ex zone 0 explosive atmospheres
- X-zone® 5000 series compatible

No. 36E613

Accessories—Time-saving Bump Test Station, with pressure gauge and regulator, is for use with X-am 5600 and X-am 5000 detectors. Remote Sampling Pump reaches up to 66 ft. Includes locking dust/water stop filter, shoulder strap, and batteries.

X-zone® 5500 Wireless Gas Monitor

- Visual and audible (adjustable volume) alarms
- Suitable for use in Ex zone 0 explosive atmospheres

Stand-alone, easily transported monitor helps provide a safe environment in hazardous areas. Control and sensing are provided by an X-am® 5600 or X-am 5000 detector, with appropriate sensors (sold separately, this page). Multiple units can be employed to define a wireless extended monitoring fence line. Includes diffusion cap, pump, and battery.

Pac® 7000 Single-Gas Detectors

Miniature XXS sensors offer fast reaction times and 5- to 6-yr. expected service life. Impact-resistant housing helps protect against corrosive chemicals and radio interference. Battery life is 2880 hr. for O_2, 5760 hr. for H_2S and CO. Detector life is unlimited. Offered in select configurations.

Note: Replacement sensors and accessories are available on Grainger.com®; search for "draeger replacement sensors" or "draeger gas detector accessories."

Detector—Small, robust personal monitors have user-friendly features including a large LCD with backlight and 1-handed operation, even when wearing gloves. Adjustable intervals for tests and calibration, reminders, and "out of order" message if overdue or failed. 120-hr. data logger has date and time stamp.

- Visual, audible, and vibrating alarms
- Adjustable TWA and STEL alarms
- IP68 dust and water ingress protection

No. 36D918

Accessories—Bump Test Station quickly checks instruments and sensors, and provides automatic calibration in case of unsuccessful tests.

CHERNE® ★ GA GRAINGER APPROVED ALLEGRO INDUSTRIES

Manhole Equipment

Manhole Cover Hooks—Made of 5/8" forged hexagonal steel for the strength to lever up heavy covers. Choose straight or right-angle handle.
- 300-lb. capacity

Manhole Lid Lifter—All-steel construction. Includes rubber grip for handle and foot. Recessable hook.

Magnetic Manhole Lid Lifters with Dolly—2-position lifting points help one person break loose the most stubborn covers—up to 36" dia.—safely and with minimal back strain. Lifters collapse for easy transport and storage.

Manhole Guardrail—Collapsible. Steel frame construction. Includes heavy-duty safety chains.

Guardrail Winch—Mounts easily; 300-lb. cap. Side pieces are aluminum, and winch bar is steel tubing with a 3" drum. Includes 2 independent ratchet systems and automatic brake.

Umbrella and Umbrella Stand—Heavy-duty, waterproof vinyl umbrella is safety yellow color for visibility. Easy stowage in the included bag. Sturdy 2-pc. metal pole can be pushed into the ground, strapped to a manhole guard rail, or used with No. 11C537 metal stand; tilts for convenient placement.

Tent Heater—Steel housing with enclosed heating elements and a sealed motor. Raises the temperature 50°F. UL Listed; CSA Certified.

Confined-Space Fans, Blowers, and Accessories

PLASTIC AXIAL FANS

Standard 115VAC and 12VDC models are portable 8" outlet fans constructed of orange polyethylene and are available with removable canister ducting. Explosionproof models are constructed of black conductive polyethylene to prevent static buildup and are available with conductive ducting. UL Listed, CSA Certified.

STEEL AXIAL FANS

Standard 115VAC No. 4YG70 runs at 72dBA at 1m for extra-quiet operation. Nos. 4YG66 and 4YG68 are 1-pc. axial fans with attached polyethylene duct canister. 12VDC Unit No. 4YG69 includes power cord with battery clips. UL Listed, CSA Certified.

STEEL AXIAL IN-LINE FANS

Fans can be installed in series for running long lengths of ducting. Include 8" or 10" duct adapters on each end of the fan. UL Listed, CSA Certified.

CENTRIFUGAL BLOWERS

All except No. 5FYA1 are mounted on a lightweight tubular steel, dual-handle frame. Polyethylene housing with 8" inlet and outlet flange. UL Listed, CSA Certified.

115V—Models have gray housing, aluminum nonsparking blower wheel, and include GFCI power cord, except Explosionproof Blower No. 5FXZ8 has a black conductive housing and a grounding lug to remove static electricity.

Gasoline with Briggs & Stratton Engine—Includes a 5-ft. remote steel exhaust hose to keep CO away from blower's intake. Meets Cal/OSHA emission standard.

Pneumatic—Uses a compressed air source with a flow capacity of 10 to 100 cfm and a pressure range of 10 to 100 psi. Includes coalescing filter, regulator, and moisture separator/lubricator. Static grounding lug installed for intrinsic safety.

DUCTING

Retractable, wire-reinforced design with 8" cuffs on both sides. Conductive duct includes 18" ground wire on each end.

SADDLE VENT® VENTILATION ACCESSORY KITS

Include Saddle Vent with universal mount and 90° elbow, one 6-ft and 15-ft. length of 8"-dia. ducting, and duct storage canister.

SADDLE VENT®

Vents fit manhole openings 20" and larger. No. 3WE69 removes static buildup in hazardous ventilation environments.

CONFINED-SPACE ACCESSORIES

Individual components to help you design a system to address your specific needs.

Confined-Space Fans, Blowers, and Accessories

Designed for positive and negative ventilation.

Plastic Axial Fans—Lightweight and quiet. Constructed of durable polyethylene with a built-in handle. Fans that include a canister assembly attach to the intake or exhaust side of a blower. No. 32MZ75 has a dual articulating swing arm for precise positioning. Fans with explosionproof motors meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. Fans with DC motor include power cord with battery clips.

Steel Axial Fans—Steel construction with handle for easy transport. Nos. 4UDK1, 3PAK4, and 3PAK5 meet Class I, Div. I and II, Groups C & D and Class II, Div. I and II, Groups F & G. No. 32MZ58 meets Class I, Div. I and II, Groups B, C, & D and Class II, Div. I and II, Groups F & G.

Steel Axial Fan Air Bags—All-in-one portable axial fan system built into a heavy-duty polyester bag. Zippered ends allow blower to be used without removing unit from the bag.

Plastic Centrifugal Blowers—Polyethylene construction with a built-in handle and 8" flange on intake and exhaust ports. Nos. 5GVU5 and 5GVU6 are UL Recognized, CSA Certified.

Ducting—Retractable with wire-reinforced design. Cuffs on both sides ease attachment. Conductive ducting prevents static buildup in hazardous locations.

Manhole Ventilation Systems—Low-profile manhole air vent, 90° elbow, and built-in mounting all in 1 unit. Include collapsible duct for easy entry, stored in a small storage bag. Ducting is vinyl and polyester with PVC coating. Systems are compact, lightweight, and not statically conductive. Made from linear low-density polyethylene.

Confined-Space Accessories—Individual components to help design a system to address specific needs.

DuraHoist™ Confined-Space Equipment

- Meets OSHA, ANSI, and CSA standards

Portable Fall-Arrest Anchor Post—Provides 3 independent swiveling connection points for anchoring fall-arrest devices. Telescoping design collapses to 33" for transport and storage. Powder-coated finish.

1-Pc. Adjustable Mast—Quick-release pin allows easy collapsibility. 12" to 29" offset.

2-Pc. Adjustable Upper Mast—Provides extra operating reach when needed and allows components to be used in various configurations.

Adjustable Offset Upper Mast and Lower Mast Extension—Provide flexibility to extend height from 41" to 146" when used with No. 1XEP7. No. 2KTD1 adjusts from 12" to 29".

3-Pc. Portable Base, No. 5RPT8—Features adjustable screws and a built-in level indicator to help assure level setup on uneven surfaces. Use with No. 5RPT7.

3-Pc. Portable Base, No. 1XEP7—Adjustable screws and built-in level indicator for easy setup on uneven surfaces. Max 29" offset. Use with Nos. 1XEP6 and 2KTD1.

Floor-Mount Sleeve—Use with Nos. 1XEP6 or 2KTD1 for horizontal concrete or steel structures.

Bracket Assembly—Mounts winch to Adjustable Masts Nos. 1XEP6 or 2KTD1.

Vehicle Hitch-Mount Sleeve—Easily installs on 2" hitch to provide a portable anchor connection for Adjustable Masts Nos. 1XEP6 or 2KTD1.

DBI SALA

Advanced™ Confined-Space Equipment

Portable Fall-Arrest Post—Compact and lightweight, designed for use on top of vertical platforms. Features 3 swivel anchor points that can rotate 360° for freedom of mobility for up to 3 workers.

5-Pc. Hoist System—Includes adjustable offset upper mast, lightweight lower mast, and 3-pc. base.

4-in-1 Davit Guard—Provides portable fall arrest, confined-space entry, and rescue system with davit and guardrail. Lightweight and durable, can be assembled without tools and folds down to less than 12" for portability and storage.

Davit Arm—For portable fall arrest post rescue. Assembles easily to address material handling or rescue needs.

Steel Anchor Base—For use in closed environments free from chemicals or moisture.

Vehicle Hitch-Mount Sleeve—Installs into 2" hitch to provide portable anchor point connection.

Honeywell MILLER

QuickPick™ Rescue Kits

- Meet OSHA and ANSI standards
- 5:1 lifting ratio
- Weight cap.: 400 lb.

Preassembled rescue solutions in an easy-to-store kit require only an overhead anchorage to employ. Backup Braking System acts as a foolproof secondary fall protection device in case the rescuer accidentally releases the rope. Comply with ANSI Z359.4 Safety Requirements for Assisted Rescue and Self Rescue Systems, Subsystems and Components.

Includes	Cable Length	Mfr. Model	Item No.

Confined-Space Rescue Equipment

Condor

- Meets ANSI Z359.4 standard (except No. 35KU76)

Complete Confined-Space Rescue Systems—Prepacked systems with tripod are easy to transport and quickly deployed. Each device includes a storage bag. 310 lb. workload cap.

Tripod—Features 2 head-mount pulleys, nonskid foot pads, and 2-stage collapsible leg adjustment for secure, quick setup. With storage bag. 310 lb. workload cap.

Hoist—Personnel-rated. 310 lb. workload cap.

Rescue Self-Retracting Device (SRD)—3-way recovery device offers dual-mode SRL-R operation as a recovery winch and self-retracting lifeline. It includes a swivel carabiner and storage bag. 310 lb. workload cap.

Retrieval Yoke—Attaches securely to shoulder D-rings on confined-space retrieval harnesses. Spanner bar keeps yoke legs separated for unencumbered egress. Adjustable to wearer shoulder width.

- Meets ANSI Z359.1-2007

Confined-Space Rescue Equipment

Honeywell MILLER

- Meets OSHA, ANSI, and CSA standards

Complete Confined-Space Rescue System—A MightEvac® self-retracting lifeline with rescue retrieval (SRL-R), tripod, carabiner, and pulley are provided along with heavy-duty equipment bags.

Tripod—Rubber skid pads on feet and safety chain between legs enhance stability. 310-lb. workload capacity.

ManHandler® Personnel-Rated Hoist/Winch—Rescue speed of 20 fpm. Built-in mounting bracket.

MightEvac® SRL with Emergency Retrieval Hoist—The MightEvac® combines a MightyLite® self-retracting lifeline with a retrieval hoist for emergency evacuation. No annual factory certification required. Average rescue speed of 25 fpm. 310-lb. weight capacity.

Includes	Mfr. Model	Item No.

Honeywell MILLER

Horizontal and Vertical Lifeline Systems

- Meet OSHA, ANSI, and CSA standards

HORIZONTAL SYSTEMS

TechLine™
- Accommodate 2 users

Designed for applications where an overhead anchorage is not present. Include waterproof bucket for safe and dry storage.

SkyGrip® Kits with Anchors

Connections at each end attach to vertical anchorage points.

Xenon®
- Accommodate 2 users

Permanent systems provide automatic pass-through fall protection. Stainless steel components.

VERTICAL SYSTEMS

Vi-Go™ Ladder Climbing System
- Accommodates 4 users

Permanently installed flexible cable system with automatic pass-through provides fall protection for fixed ladder applications. Does not require a cable guide. Easy 1-handed attachment/detachment. Accommodates ⅜" cable. Fall arrestors sold separately.

GlideLoc®

Rigid rail systems are permanent with minimal maintenance required. Fall arrestors sold separately.

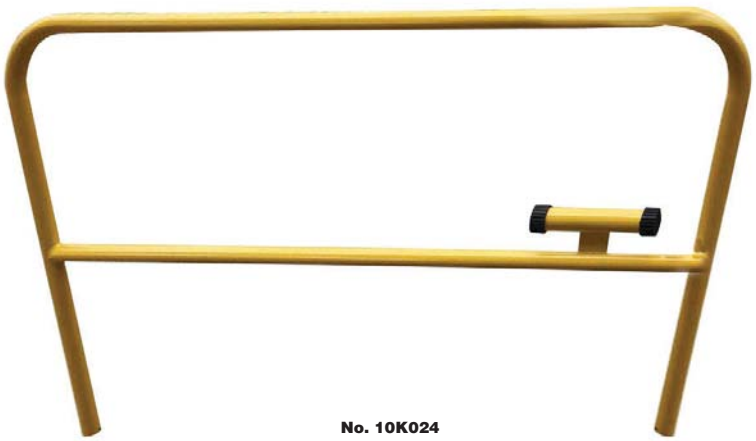
Portable Guardrail System

Helps eliminate fall hazards by preventing personnel from falling to lower levels. Free-standing system doesn't require surface attachment so you can create custom configurations for floor or wall openings, hatchways, manholes, shafts, or truck docks. The simple set-screw design allows easy installation. The durable finish helps resist corrosion for long life.



Guardrail Roof Kit—Includes the items you need to create a free-standing safety barrier.

Guardrail Gate—Compact gate is adjustable from 23" to 38"L.

Guardrails—Require Guardrail Base Assembly No. 5KCX6, sold separately.

Guardrail Base Assembly—Rubber pad on bottom helps provide skid resistance and protects surfaces from damage.

Anchorage Connectors

- Meet OSHA and ANSI standards

Pass-Thru Anchors—Smaller D-ring passes through larger D-ring to attach to structural member; can be passed through multiple times to adjust overhead height.

Roof Anchors—Permanent and reusable anchors are designed for fall protection during maintenance, repair, and construction on pitched and flat roofs.

Mounted D-Ring and D-Bolt Anchors—Provide economical fall protection anchorage for installation on structural steel members, in a variety of work environments. D-rings are zinc-plated, except No. 45J296 is stainless steel.

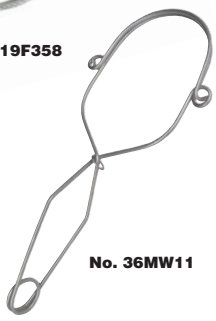
Concrete Anchors—Temporary, reusable anchors can be relocated repeatedly. They are engineered for use in cured, existing concrete.

Condor

Beam Anchor and Toggle Anchor—Easy-to-install anchors can be relocated and reused.

Clamp-on Beam Anchor anchor is well-suited for fixed positions. Heavy-duty aluminum alloy construction.

Toggle Anchor can be mounted horizontally or vertically; toggle action secures it in place on the beam. Heavy-duty alloy steel construction.



Rotating SRD Anchor—Temporary anchor provides 360° rotation for a personal self-retracting device (SRD), sold separately. It is compatible with Condor® self-retracting lifeline Nos. 22RT98, 22RT99, and 22RU01 on page 1800.

FALLTECH

Anchorage Connectors

- Tensile strength: 5000 lb., except 3600 lb. for Nos. 36MF79 and 36MF81

Pass-Thru Anchor—Great for I-beams and other rated structural members. A 3" wear pad provides cut and abrasion resistance.

Sling Anchors—Use with I-beams and other rated structural members. Forged alloy steel hardware.

No. 36MW12 is an economical and lightweight anchor sling with heavy-duty polyester webbing. Nos. 19F358 and 36MW08 are excellent in harsh environments, with high-strength cable that provides superior cut/abrasion resistance.

Wire Hook Anchor—Squeeze-open anchor is easily installed. For use only in overhead applications.

Suspended Cable Anchor—Designed to provide a single-person fall arrest or restraint anchor point in surfaces such as steel decking, concrete, and grating. Anchoring plate is 6" x 6" x ¼".

Concrete Anchors—Web Anchor is made for pour-in-place concrete applications. Constructed to resist the abrasion common with rebar form work.

Rotating Bracket models are multiuse anchors featuring a reusable zinc-plated steel anchor plate with an integral 360° self-orienting D-ring.

Adjustable Rotating SRD Anchor—Fall arrest/restraint anchor with 360° rotation mounts to wood or metal roofs or steel decking to extend the capability of personal cable self-retracting devices (SRDs, sold separately). Connection D-ring allows attachment of horizontal or vertical lifeline systems.

Beam Anchors—For use on overhead I-beams.

No. 36MF78 has nylon slider pads and ratcheting design with thumb latches. No. 19F359 has dual aluminum locknut jaws, center D-ring, and aluminum hex bar. Tool-less installation. No. 36MW10 features heavy-duty steel frame and wheels for temporary or permanent installation on closed-end horizontal beams.

Parapet Wall and Window/Door Jamb Anchors—Connectors install without fasteners to provide temporary anchorage.

Parapet Wall Anchor is for use on 9" and higher parapet walls, ½" to 15" thick. Window/Door Jamb Anchor adjusts to 21" to 51" openings to provide fall arrest/restraint anchorage.

Full-Body Harnesses

- Meet ANSI standards
- **Capacity: 425 lb.**

Designed for construction and industrial environments, featuring load-impact indicators and lanyard keepers. Constructed of high-strength polyester webbing and alloy steel hardware. Fully adjustable fit with subpelvic strap.

Cross-Over harnesses' triangle shape and tangle-free design helps make donning fast and easy. They have front D-rings for climbing and side D-rings for work positioning applications.

Standard and General Industry—Practical harnesses are designed and equipped to provide adjustability, fit, and value for a wide range of fall protection applications.

General Industry models are designed for the professional user, and offer durability and long life. Adjustments are fast and easy with the friction roller torso adjusters. Belted models feature padded waist support and include tool belt and shoulder pads.

Heavy-Duty models are particularly durable to meet the requirements of demanding professional users.

Premium Comfort Construction-Grade—Construction-grade harnesses have combined D-ring locations to suit multiple fall protection applications. Premium comfort features include a padded torso yoke for shoulders and back and a breathable air mesh shoulder yoke with integral nonslip dorsal D-ring adjustment.

Positioning and retrieval models are configured for job-specific fall protection without sacrificing full adjustability and durable service life. Friction roller torso adjusters and the padded yoke allow fast, easy adjustment and help keep harnesses tangle-free.

Accessories—D-Ring Extenders provide longer reach to ease connecting energy-absorbing lanyards and self-retracting lifelines. No. 30HG84 choke-loop design reduces weight on the dorsal D-ring.

No. 45J297 attaches to most full-body harnesses and helps reduce stress on the body while suspended, waiting for rescue after a fall. Fully adjustable.

Protecta® Pro™ Full-Body Harnesses

- Meet ANSI standards
- **Tensile strength: 3600 lb.**
- **Capacity: 420 lb.**

Comfortable X-design. The fixed D-ring helps reduce the need for readjustment throughout the workday. Lanyard keeper holds excess line to prevent tripping and entanglements. Nos. J6572 to J6574 are vest-style harnesses; great for general-purpose applications.

Nos. J6553 and J6555 have an easy-link web adapter that allows easy attachment of personal self-retracting lifelines and keeps the D-ring available for lanyards, overhead self-retracting lanyards (SRLs), or rescue devices.

DBI SALA

ExoFit NEX™ Full-Body Harnesses

- Meet ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Designed and constructed for no-tangle donning and a comfortable secure fit. Soft and lightweight, yet durable, with built-in nonslip shoulder, hip, and leg padding. Breathable, moisture-wicking lining keeps wearer dry. 1-handed Revolver™ vertical torso buckles provide easy adjustment of shoulder straps. Duo-Lok™ quick-connect buckles adjust with memory fit feature and allow adjustments to lock in place. Molded protective shell components prevent abrasion and wear and tear in targeted areas. Repel technology webbing reduces attraction of mold and dirt. Integrated suspension trauma straps provide quick pressure relief after a fall. Molded break-away lanyard keeper easily accepts larger snap hooks.

Vest Style—Harness includes Tech-Lite™ aluminum back D-ring.

Construction—Include Tech-Lite™ aluminum back and side D-rings, tongue buckle legs, and integrated hip padding with belt and lumbar wear protection.

Wind Energy Climbing—Feature a radio and Lad-Saf® sleeve holster on the front and removable tool loops on the belt, enabling the wearer to carry equipment while climbing a tower. Include aluminum front, back, and side D-rings and integrated hip padding with belt and lumbar wear protection.

- Meet CSA and CE requirements

Arc-Rated 40 cal/cm² HRC 4—Nomex®/Kevlar® construction with flame-resistant and nonconductive properties. Include PVC-coated aluminum back D-ring and comfort padding.

- Meet ASTM F887-05 arc flash standard and CSA requirements

ExoFit STRATA™ Full-Body Harnesses

- Meet OSHA and ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Packed with safety technology, these full-body harnesses are not just among the safest on the market, but they're also designed to be among the most-comfortable and lightweight. The breathable PolarMesh™ back pad helps keep you cool, and the proprietary LIFTech™ Load Distribution System redistributes weight to help reduce forces on your shoulders by up to 85% compared to leading competitor harnesses. Additional features include Tech-Lite™ Aluminum Side and Dorsal D-Rings for security without extra weight, an EZ-Link™ Quick SRL Adapter for easy self-retracting line connecting and disconnecting. Tri-Lock Revolver™ Connectors store excess webbing to help provide an extra layer of security around your legs. With an impact indicator and integrated suspension trauma straps.

ExoFit™ Vest Style—Built-in nonslip shoulder, hip, and leg padding stays in place. Soft edging provides enhanced comfort and mobility. Fixed back D-ring.

ExoFit™ Wind-Energy—Feature built-in back and leg padding, plus protective hip padding. Built-in lanyards hold tools and equipment so hands remain free. D-rings are PVC coated.

ExoFit™ Confined-Space—Shoulder D-rings allow use in confined-space entry/rescue applications.

ExoFit™ Construction—Has the same features as ExoFit™, with hip pad and belt for use with tool pouches. Side D-rings for work positioning allow hands-free operation.

ExoFit™ Tower-Climbing—Front D-ring connects to permanent ladder safety systems. Removable seat sling provides suspension and added comfort.

ExoFit™ XP—Removable shoulder, back, and leg cushioned padding allows harness to be washed. 3-D mesh lining eliminates odor and mildew. Adjustable spring-loaded, stand-up back D-ring enables connections to be made without straining. Integral lanyard keeper holds excess line to prevent tripping and entanglements.

ExoFit™ XP Construction—Harnesses have the same features as ExoFit™ XP, plus a hip pad and belt with loops for use with tool pouches. Side D-rings for work positioning allow hands-free operation.

Trauma Strap—Allows suspended worker to stand up in harness to relieve pressure. Continuous loop design allows 1- or 2-ft. suspension. Attaches to most harnesses.

Delta™ Full-Body Harnesses

- Meet ANSI standards
- Tensile strength: 6000 lb.
- Capacity: 420 lb.

Durable polyester webbed construction repels water and resists abrasion. Delta No-Tangle™ design holds the shape of the harness, making it easier to put on. Revolver™ torso adjusters provide fast, secure fit. Padded spring-loaded stand-up back D-ring provides extra comfort throughout the neck, shoulders, and back and allows for quick and easy connections.

Standard and Positioning Vest Style—Good for general purpose applications. Models with side D-rings are also for work positioning. Nos. 2UZJ2 and 2UZJ1 have belt loops for separate belt attachment.

Cross-Over—The triangular-shaped, tangle-free design simplifies speedy donning. Front D-rings are for climbing, and side D-rings are for positioning applications.

Construction—Shoulder and hip padding with belt allows use with tool pouches. Side D-rings for positioning.

High-Visibility Work Vest—Reflective orange vest has a built-in harness. Meets ANSI/ISEA Class 2.

Titan™ II Nonstretch Full-Body Harnesses

- ANSI Z359.11 compliant
- Tensile strength: 5000 lb.
- Capacity: 400 lb.

Durable non-stretch harnesses provide affordable lightweight fall protection for workers in the general construction, manufacturing, and oil and gas (refinery) industries, and similar fields. The harnesses feature easy vertical adjustability that stays in place, and a slip resistant back D-ring pad. Forward-positioned side D-rings help keep your tool bags in the right place for easy access, while Hi-Viz orange color webbing provides improved visibility for increased worksite safety.

No. J5478 features lighter, strategically-placed padding for optimal airflow while working at heights and a removable tool belt that stays in position when disconnected, even when tools are attached.

ComforTech™
Harness
No. G4009

Hi-Vis Vest
Harness
No. G4014

Full-Body Harnesses

FALLTECH Fall Protection. Precision Engineered.

- Meet ANSI standards
- Capacity: 425 lb.

FlowTech™— Lightweight harnesses provide maximum air circulation. Feature forged aluminum D-rings, aluminum adjusters and buckles, exterior pad assemblies, and multiple adjustment positions.

ComforTech™— Incorporates gel, memory foam, and lumbar support to increase comfort. 5-pt. adjustment. Features include twin breakaway lanyard keepers, padded shoulder yoke, and waist and leg pads. Allows mounting of tool pouches on waist belt.

Hi-Vis Vests—Features include internal donning cloak for tangle-free use, subpelvic straps, and front and rear pockets. No. G4013 is made of standard contractor-grade reflective material. No. G4014 is made of open-weave mesh with a breathable lining and meets ANSI Class 2 standards.

Arc-Rated—Comply with ASTM F887, OSHA 1926, and ANSI Z-359.1 requirements.

D-Ring Extender—18" Kevlar® webbing with insulated D-ring and choke loop helps maintain continuous arc flash protection when attached to the dorsal D-ring or loop of an arc flash harness.

Tool Leashes—Abrasion-resistant webbing and aluminum or steel carabiners keep dropped tools from striking lower levels. Max. tool capacity 15 lb.

Honeywell MILLER

AirCore™ Full-Body Harnesses

- Meet ANSI and CSA standards
- Tensile strength: 5000 lb.
- Weight capacity: 400 lb.

Lightweight construction helps reduce fatigue for increased productivity. Comfortable, stylish design encourages compliance.

Contoured padding is strategically placed at lumbar, neck, and inner thighs. Proprietary, breathable open-core pad construction reduces heat and moisture to help keep the wearer cool and comfortable. Lumbar pad is replaceable on select models.

DuraFlex® stretchable webbing improves mobility. Low-profile cam buckles allow fast, easy, simultaneous shoulder web adjustment.

The front D-ring extends performance and comfort for climbing, confined space, and rescue operations.

Models with aluminum hardware are 20% lighter than steel models and corrosion-resistant for longer service life and reduced replacement costs.

Certain models feature a removable belt with leather guide that is functional and comfortable.

Leather bos'n chair with select models provides an adjustable, rigid work seat; also available separately.

Tower Climbing Harnesses—Engineered for comfort and easy adjustability on cell phone, TV, radio, and utility towers.

Wind Energy Harnesses—Customized, lightweight design helps keep workers safe and comfortable for reduced fatigue and all-day endurance while building and servicing wind turbines. The replaceable lumbar pad features nonmarring materials to protect the harness and the wall of the turbine from damage.

Oil and Gas Harness—Designed as an all-day harness for everyday tasks on drilling or service rigs and in the oil fields and various harsh environments. 18" extended back D-ring is an easy-to-reach attachment point for multiple uses, leaving the stand-up back D-ring as another connection point. Enhanced lumbar padding and expanded front waist padding provide increased comfort and support. Choose a seat sling or bos'n chair for added support and reduced wearer fatigue.

Honeywell MILLER

Miller Revolution™ Full-Body Harnesses

- Meet ANSI, and CSA standards
- Tensile strength: 6000 lb.
- Capacity: 400 lb.

Durable harnesses have flexible, 2-sided polyester webbing with contrasting color. Shape retention memory and independent upper- and lower-torso adjustments make them comfortable enough to wear all day. Web finials' clip-on design organizes webbing after proper adjustment. Highly visible encapsulated pack protects label. Stand-up D-ring allows easy attachment. Back shield conforms to most body shapes, keeps back D-ring in proper position, and minimizes impact from snap hooks and self-retracting lifelines. Cam buckle permits 1-handed adjustment or release simultaneous with shoulder strap (except No. 2KUC2 has friction buckle shoulder straps). PivotLink™ Connection rotary design allows harnesses to move with the body. Provides attachment point for belts, tools, and accessories. Fall indicators take the guesswork out of when to take harnesses out of service. Flexible belt pads on Nos. 5PA95 to 5PA98 minimize absorption and maintain optimal air circulation during positioning.

Revolution™ Construction—Designed to meet the durability requirements for construction applications while providing all-day comfort. Feature back and shoulder padding and modular accessory attachment system.

Revolution™ Arc-Rated—Insulated against electrical shock, with fire-retardant Kevlar® webbing and leather under all hardware. Nos. 1XEN8 and 3PRU1 have front rescue loops. No. 3PRU1 has pad and removable belt. For more Arc-Rated products, see page 1707.

Revolution™ Vinyl-Coated—Ideal for dirty environments such as petrochemical and water treatment plants. Resists physical deterioration resulting from exposure to a variety of liquids and maintains overall performance level.

Relief Step™ Safety Device—Allows suspended worker to stand up in harness to enhance blood circulation and prevent suspension trauma after a fall. Small, lightweight unit attaches to any full-body harness.

10 ft.	8327-Z7/10FTYL	36WA07

Honeywell MILLER

Personal Fall Limiters and Cab-Mount Bracket

- Meet ANSI and CSA standards

PERSONAL FALL LIMITERS (PFLs)

Self-retracting lanyards with polyester webbing and quick-activating brake systems eliminate the need for extended fall distance clearance. 6-ft. working length is suitable for most applications; 9-ft. length is great for scaffolding and order picker applications; 11-ft. length offers maximum mobility.

Harness connectors have 3600-lb. gate strength unless noted as 5K (5000 lb.). Connectors are made of steel unless noted as aluminum.

MiniLite®—Lightweight stainless steel interior components with high-impact thermoplastic housing.

Scorpion™—Can be attached directly to the harness D-ring for use as a personal fall limiter or as a traditional lifeline.

Turbo T-BAK™ Retractable Tie-Back—All-in-1 design with anchorage connector reduces the amount of equipment required on a jobsite.

TurboLite™—Impact-resistant nylon housing is compact and lightweight. Unit attaches directly to harness back D-ring for increased mobility.

Twin Turbo™ Systems—Allow 2 TurboLite or Turbo T-BAK tie-back retractable PFLs to be connected to a single harness for 100% tie-off fall protection. Systems with D-ring connector easily attach to noncoated metallic back D-rings. Systems with lightweight G2 connector attach to harness webbing below the D-ring, leaving it open for other equipment. G2 Connector Kit and components are available separately. No. 49U980 includes 1 each of 49U981, 49U982, and 49U983.

Self-Retracting Lifelines

- Meet ANSI and CSA standards

Quick-activating braking system stops free falls, providing a safe and quick rescue. Steel connectors with 3600-lb. gate strength. No annual factory recertification required.

Black Rhino™—Small, lightweight housing holds corrosion-resistant stainless steel and aluminum components. Withstands harsh environments.

MightyLite™—Durable, corrosion-resistant stainless steel and aluminum housing. Install overhead; great for hard-to-mount locations.

MightyLite™ LE—Arrestors feature integrated shock-absorbing packs designed for leading edge (LE) applications. Rated for up to a 310-lb. user in LE applications and up to a 400-lb. user when mounted overhead. Models with Kevlar® packs are for use in LE welding applications.

Falcon™—Ultra-durable units have impact-resistant nylon housing with stainless steel and aluminum components.

DuraSeal™—All units come with a cable sling with carabiner (not shown). The cable sling can be used as the primary anchorage connector for carabiner mounted units. It can also be used as a secondary anchorage that can be attached to the handle of the unit.

Falcon™ Edge—Up to 30% lighter than similar models to help ease installation and reduce worker fatigue. Nos. 420H88 to 420H90 have an integrated shock absorber with a flame retardant cover that resists weld splatter in welding applications.

Self-Retracting Lifelines

NANO-LOK™

- Meet ANSI standards, except Tie-Back

Standard—Light, compact units feature an impact-resistant housing with swiveling anchorage loop and automatic quick-activating arrestor.

No. 45WA80 is designed for welding, grinding, and other high-heat applications. It has flame-resistant Kevlar®/Nomex® fiber webbing and is arc rated APTV 8 cal./cm^2.

Tie-Back—Units incorporate a 36" tie-back leg, to eliminate the need for a separate anchor connector, tie-off adapter, or scaffold choker. UV-resistant nylon housing.

LE (Leading Edge)—Designed for safety and comfort in foot-level tie-off and sharp-edge applications. Weight-dispersing energy absorber and 360°-rotating connector attach directly to harness, leaving the D-ring open. 2-leg SRLs provide 100% tie-off.

Connectors—Use to secure a Nano-Lok SRL directly to a full-body harness webbing, leaving the back D-ring available.

TALON™

- Meet ANSI and CSA standards (except Nos. 3TNH1 and 3TNH2 do not meet ANSI)

Standard—Compact design with quick-connect handle for direct attachment to anchorage or harness.

Tie-Back—Eliminate the need for a separate anchorage connector. Built-in lanyard keepers and hook-and-loop attachment fit most harnesses.

Cab Mount Bracket—Connects directly to the cab for convenient anchorage point.

ULTRA-LOK®

- Meet ANSI standards

Corrosion-resistant stainless steel components with durable polyurethane housing. Antiratcheting, twin disc brake system limits arresting forces.

ULTRA-LOK® RSQ

- Meet ANSI standards

Provide fall arrest with assisted rescue capabilities and automatic self rescue. Constructed of reinforced plastic and include built-in carrying handle.

SEALED-BLOK™

- Meet ANSI and CSA standards

Fully sealed design protects working components, enhances safety, and extends working life.

Condor

- Meet ANSI standards, except Heavy User Internal Shock Absorber models

For use as the connecting deceleration element of a personal fall-arrest system.

Standard Internal Shock Absorber—Feature a continuous-length, internal energy-absorbing material jacketed with a durable tubular web. Include impact indicator.

Heavy User Internal Shock Absorber—Additional internal energy-absorbing material limits fall arrest forces experienced by users between 310 and 400 lb. (including tools and equipment).

Tie-Back—Pack-style shock absorber has tie-back D-ring.

Elastic—Expand and contract with wearer's movements to reduce potential entanglements and tripping hazards.

Choker Loop—Provide lightweight, secure attachment to the harness D-ring.

Shock-Absorbing Lanyards

- Meet ANSI standards

EZ-Stop™—Lightweight and compact modular design reduces the overall cost of ownership by allowing individual components to be purchased and replaced separately as needed.

EZ-Stop™ Tie-Back, Nos. 46W446 and 46W447—Single-leg tie-back web has a snap hook at one end and tie-back hook at the other.

EZ-Stop™ Retrax™—Adjustable spring technology retracts lanyard automatically to fit the working area.

EZ-Stop™ III—Tubular webbing integrates the shock-absorbing core. Stretches instead of tearing when subjected to fall-arrest forces.

ShockWave2™—Expand and contract to user's movements to minimize tripping and entanglements.

ShockWave2™ Tie-Back, No. 425Y89—Include the same features as the ShockWave2 with the added versatility of a tie-back to eliminate the need for a separate anchorage connector.

Rescue Helmets

- Kevlar® composite shell material
- One size fits most

R5 series rescue helmets feature a smaller design and are ideal for working in tight or confined spaces. Typical applications include USAR, paramedic and rescue, and industrial safety. R6 series helmets are lightweight and feature a ventilation system that keeps water out when closed. Adjustment system keeps helmets centered on the head. These helmets can carry multiple accessories and are particularly suited for firefighting, USAR, paramedic and rescue, and industrial safety applications.

Class II and Class III Rescue Harnesses

Feature sturdy lightweight nylon webbing harnesses and triple locking pompier hook with 2" side opening gate.

541NYC AND 544FR SERIES CLASS II

- Meet NFPA 1983

Designed for fire service personnel. A sliding D-ring attachment point allows for use with escape systems. 541NYC Series features adjustable, color-coded leg straps. Choose left or right side harness opening to accommodate all types of bunker pants. 544FR Series flame-resistant harnesses are made of 1¾"W Kevlar® webbing with Kevlar thread. Can be worn as an internal harness when paired with compatible bunker pants, or externally with loops on outside.

Note: Measure waist over bunker pants to determine proper size selection.

543CH SERIES CLASS III

- Meet NFPA 1983

For rescue-only operations. Excellent mobility and functionality for lowering yourself or others as a rescuer, for use with an escape system, for rescuing a wearer, and more. 5 load-bearing attachment points. Feature front and back forged steel D-rings and aluminum carabiner. Adjustable, color-coded friction leg straps provide easy donning and size adjustment. Shoulder strap buckles.

Connectors and Hardware

Carabiners—Carabiner with triact-lock automatic locking feature is for frequent manipulations. Use carabiner with screw lock for occasional manipulations or where foreign material could jam the automatic locking system. Both have a pear shape that is practical for easily connecting multiple items.

Anchor Plates—For creating multiple anchor systems. 19mm holes accommodate the locking sleeves of most carabiners. Meet NFPA 1983.

Swivels—Prevent rope twisting when the load is turning. No. 35ZM16 has a large opening to attach to pulleys and lanyards. Meet NFPA 1983.

Pulleys

Gemini and Twin—Double pulleys have side plates designed for use with a Prusik friction hitch in lightweight progress capture systems. No. 3NGF1 accepts up to 3 carabiners.
- **No. 3NGF1 meets NFPA 1983 G**

Rescue—High-strength, high-efficiency pulley for maneuvering heavy loads and for intensive use. Accepts up to 3 carabiners.

Minder—Prusik minding pulley accepts up to 3 carabiners.
- **Meets NFPA 1983 G**

Pro—High-efficiency lossproof pulley keeps things simple when setting up a hauling or load deviation system. The side plate locks under load.
- **Meets NFPA 1983 T**

Kootenay—Large rope channel allows passage of joining knots. Locking pins on sheave allow pulley to be used as an anchor.

Jag Double and Jag Traxion—High-efficiency pulleys are designed to work together to make a 4:1 haul system. Jag Traxion double-progress capture pulley has a toothed cam with self-cleaning slot for optimal performance with frozen or muddy ropes.
- **Meet NFPA 1983 T**

Pro Traxion—Allows rope installation while pulley is connected to the anchor. Large diameter sheave and side plate locks are suitable for hauling heavy loads.
- **Meets NFPA 1983 T**

Personal Flotation Devices (PFDs)

- **15½-lb. buoyancy**
- **Durable nylon outer shell**
- **USCG Type III Approved**
- **No. 444M92: 17½-lb. buoyancy, vinyl-dipped outer shell, USCG Type V Approved**

Life Vests—Feature poly-twill inner construction and 2 adjustable belts to hold jacket securely in place. No. 45MP78 features a leg strap for added safety, a convenient grab strap that allows for quick recovery, and a pop-up pillow for added head support. No. 45MP77 comes with a leg strap for additional safety. Nos. 45MP74, 45MP75, and 45MP79 feature a chest strap to help keep the vest from riding up. No. 45MP79 adds reflective material on the front and back for greater visibility in low light conditions. No. 444M92 has opening in back to accommodate most fall harnesses, plus adjustable shoulders and sides.

Life Vests with Dual Chest Pockets—Feature an outer shell with polyethylene foam and 2 adjustable encircling belts, a heavy-duty zipper, and large arm holes that allow for more freedom of movement. Belts are hidden to help reduce snags. Reflective material on front and back for greater visibility in low light conditions. Include 2 large cargo pockets, dual chest pockets, and 2 D-ring holders for small attachments.

Mesh Shoulder Life Vests—Include an outer shell with polyethylene foam. The mesh shoulder, back, and sides help to keep you cool in warm weather. Feature 2 adjustable encircling belts and a heavy-duty zipper. Belts are hidden to help reduce snags. The reflective material on front and back allows for greater visibility in low light conditions.

Inflatable Personal Flotation Devices (PFDs)

▪ Fit chest size: 30" to 52"

Hydrostatic inflator on these devices automatically inflates vest when submerged in 4" or more of water. They withstand use in the most severe marine environments. Feature status indicator window, strobe light holder, safety whistle, and SOLAS reflective tape.

Commercial Vest—Features a low profile for maximum mobility, 420-denier coated nylon shell, comfortable neoprene collar, back-up oral inflation tube, and D-ring for kill-switch attachment. Offer Type II performance for commercial use. Meets ANSI 107-2004 Class 2 Standard when worn over an ANSI garment.

▪ USCG Approved Type II/Type V

Work Vest—Offers enhanced mobility and reduced heat stress even in constant wear situations. Approved for use on inspected and uninspected vessels of any size. Features durable polyurethane-coated nylon shell for improved puncture and abrasion resistance. Includes inflator cover to protect inflator cap, back-up oral inflation tube, and manual activation cord.

▪ USCG Approved Type V

Compact Tactical Vest—Designed specifically for body armor and tactical vests that use a Modular Lightweight Load-carrying Equipment (MOLLE) webbing system.

Conversion Kit—Reconfigures No. 12L912 PFD (sold separately, this page) from automatic to manually activated inflation.

Tactical Jackets, Parkas, and Raincoat

5.11 ALWAYS BE READY

A. Response Jacket™—Wind- and water-repellent, 100% polyester microfiber shell is ideal for spring weather. Features hidden ID panels on the chest.

B. Big Horn Jacket™—Microfiber shell and fleece lining, with Back-Up Belt System™: Hidden chest pockets that allow quick access to critical gear. Side zippers on left and right side give easy access to sidearm or provide added ventilation.

C. Tactical Fleece Jacket—Wind-resistant, 100% polyester fleece with 100% nylon panels. Abrasion-resistant collar, shoulders, biceps, and back of forearm. Side-seam zippers allow sidearm access. Zippered exterior hand warmer pockets and interior pockets. Can be used with 3-in-1 Parka No. D4702.

D. Chameleon Jacket™—100% polyester bonded soft shell fabric, features a drop tail, water and wind repellency, and 3 zip-out ID panels.

E. Sabre Jacket 2.0™—Designed for superior wet weather performance with waterproof, breathable 100% microfiber softshell fabric and fully seam-sealed construction. Features the Quixip™ quick-access side zipper. Numerous pockets provide ample storage. Additional features include 3 zip-out ID panels, large shoulder patches, and a removable hood.

F. 3-in-1 Parka™—High-performance waterproof and breathable outer jacket is resistant to tears and abrasion. The fleece inner liner is extremely durable and wind-resistant. 100% nylon shell. Side zippers ease access to duty belt and provide ventilation. ID panels on the chest and back are removable.

G. 5-in-1 Jacket™—100% nylon shell has a removable fleece liner with zip-off sleeves, enabling the jacket to be worn 5 different ways. Waterproof, breathable construction. Waist-length with side zippers for ventilation and access to duty belt. Removable ID panels on chest and back.

H. Responder Parka™ and Responder Hi-Vis Parka™—Waterproof, breathable parkas are resistant to bloodborne pathogens. High-performance seam-sealed construction features 100% nylon shell with removable polyester fleece liner, hook-and-loop wrist closures and storm flaps, removable hood, and zippered armpit vents. 5.11® Traxion™ nonslip shoulder panels. ID panel at right chest. High-visibility model has 3M™ reflective trim.

- **No. D4723 meets ANSI Class II, Level II/ISEA 107-2010**

I. Reversible Hi-Vis Rain Coat—100% nylon oxford shell in a fully waterproof, seam-sealed design. Adjustable-length jacket serves as a full-coverage coat, or snap off the lower portion to parka length. Features a full snap front, pass-through pockets for easy access to duty belt, shoulder mic loops, integrated badge tab, and a snap-adjustable sleeve hem.

- **High-visibility yellow side meets ANSI/ISEA 107-2015 Class III, Type R**

Tactical Shirts

A. Utili-T™ Crew-Neck T-Shirt—Features a 1" high-density collar and is cut long to stay tucked in. Moisture-wicking 100% ringspun cotton.

B. Utility Polo—Cotton/polyester pique knit material is wrinkle- and fade-resistant, with a no-roll collar, drop tail with side splits, and dual-pen pockets on the sleeve.

C. Tactical Polo—100% cotton jersey is shrink-, wrinkle-, and fade-resistant for a lasting neat, clean, professional appearance and fit. Stay-flat, no-roll collar. Mic-clip attachments at shoulders and sternum. Short sleeves. Pen pockets on left sleeve.

D. Professional Polo—Made of comfortable, hard-wearing 100% cotton pique knit. Includes convenient left-sleeve pen pockets. Looks neat, clean, and professional. Wrinkle-, shrink-, and fade-resistant. Stay-flat, no-roll collar. Short sleeves.

E. Performance Polo—100% snag-resistant polyester jersey is wrinkle-, shrink-, and fade-resistant. Moisture-wicking, antimicrobial material helps reduce odor-causing bacteria. Stay-flat, no-roll collar. Short sleeves. Dual-pen pockets on left sleeve.

F. Bike Patrol Shirt—Performance-fit shirt has flexible reflective tape on the sleeves, chest, and back for visibility, plus a longer drop tail for neatness and underarm gussets for range of motion. Details include a mic loop at the placket and a chest pen pocket. 100% moisture-wicking polyester jersey with antimicrobial treatment.

G. Helios Polo Shirt—4.5 oz. snag-resistant jersey knit fabric offers moisture-wicking, quick-drying, and odor control characteristics. Integrated underarm gussets ensure a full range of movement, while a pen pocket, front mic loop, and shoulder mic pockets allow you to keep important accessories within easy reach.

H. Tactical® Shirts—100% cotton canvas with proprietary hidden document pockets, cape back with mesh lining, and hidden button-down collar. Long Sleeve No. D6797 features adjustable cuffs and sleeve keepers.

I. Taclite® Pro Shirts—Lightweight, breathable 65/35 polyester/cotton ripstop material is PTFE-treated to resist spills and stains. Feature proprietary hidden document pockets, cape back with mesh lining, and hidden button-down collar.

J. ¼-Zip Job Shirt—Shirt features a Break-Through™ chest pocket with hook-and-loop divider that can carry a full-size radio. Hand warmer pockets, mic-clip pockets, and pen pockets provide additional storage space. Cotton/poly fleece with fade-, shrink-, and wrinkle-resistant finish.

K. Rapid Assault Shirt—Designed for breathability while under full armor. Lightweight cotton/poly/spandex knit fabric wicks perspiration and dries quickly. Side mesh panels improve air flow to keep the wearer cool. Saddle-shoulder design allows maximum range of motion. Flat-lock seams reduce chafing. ½-zip front. Woven collar can be worn up or down. Large dual shoulder pockets offer additional storage.

RINGERS GLOVES

Tactical Gloves

- Black color
- CE EN388 2016, EN407, TAA Compliant

Lightweight and flexible, flame-resistant shooter gloves have Kevlar stitching for increased durability, plus touchscreen compatible middle fingertip for use with most electronic devices. Constructed to fit the natural contour of the hands, ideal for strategic multi-tasking in a variety of critical tactical situations. Offer an adjustable hook-and-loop cuff with a convenient loop for attaching to hooks on vests, belts, and uniforms.

General Duty Gloves—Flame resistant Nomex® covering top of the hand and fingers. Goatskin leather palm with patch for durability and contoured fit. Specifically designed trigger finger and thumb for enhanced tactile feel. Leather fingertip patches on top of hand to reinforce wear and tear zones.

Hard Knuckle Gloves—Low profile FR Thermal Plastic Rubber (TPR) for maximum impact protection on fingers, and thumb areas. Leather reinforcement patches on fingertips extend glove life. Lightweight FR Nomex materials protect the top of hand areas. Premium goatskin leather palm for durability and contoured fit. PVC palm patch with padding on palm heel for extra durability. Custom designed finger and thumb construction for enhanced trigger and tactile feel. PVC knuckle protector laminated with Kevlar blended fabric.

3D Firefighter Gloves

- Meet NFPA 1971-2013

Firefighters Gloves are designed to deliver natural movement, better grip and tactility, and excellent dexterity. These wristlet gloves offer a Kangaroo leather palm and Cowhide leather back material. PIVOT-THUMB™ and formed knuckle guard provide natural, anatomically correct thumb-to-finger movement. These gloves have a Nomex®/Kevlar® thermal lining for heat and slash protection. CROSSTECH® inserts provide long lasting protection against hot water, blood, body fluids and common chemicals by resisting damage due to flexing, abrasion and heat exposure. The style has rounded fingertips, curved thumbs and fingers, and exclusive TRU-3D™: complete fourchettes on all sides of every finger and thumb. INNO880B™ gloves are constructed with 2 layers of Nomex knit at the wrist for additional protection.

FireDex®

Men's Shoe-Fit Insulated Fire Boots

- Meet NFPA 1971, Current Edition

Fire-Dex® FDXR100 Shoe-Fit Firefighting Boots are built to provide waperproof protection and thermal wool insulation for firefighters in the field. They feature rubber construction with reinforced rubber shin guards and heels. Steel toes, plates, and shanks offer rugged protection. Integrated pull-on loops help to enable easy donning/removal. Articulating louvers on side tread offer added traction, and the sole tread pattern is designed to help push water outward. Reflective trim provides added visibility.

Fire and EMS Bags

ergodyne WORK GEAR

FIRST AID ONLY

Maltese cross instantly identifies fire bag and star of life identifies EMS bags.

Arsenal® Large Personal Gear Bag—Bag has a front outside pocket and 2 side pockets. 1000-denier nylon, double-coated polyurethane construction with 2" webbing handle, pull strap, and removable shoulder strap.

Arsenal® Responder Trauma Bags—600-denier polyester bags have an easily accessible outside front pocket. Bags open completely for easy access to the main hold and 6-division multitiered mesh interior pocket. 1½" webbing side straps and shoulder strap.

Arsenal® Trauma Bags—600-denier nylon bags have lockable double-pull zippers to help keep narcotics and other controlled substances secure. Large main zippered pocket opening provides quick access to gear. Durable shoulder straps with reflective striping. Customizable interior compartments on large bags keep contents organized for easy access.

Arsenal® Backpack Trauma Bags—Easy-to-carry packs have 3" padded shoulder straps with reflective striping, phone holder, heavy-duty carry handle, and reflective trim on main panel. Large zippered opening provides quick, easy access to the main hold; segmented to keep supplies organized. 600-denier polyester construction with PVC backing.

First Responder Bag—Nylon bag has a main compartment with divider, side pockets for additional storage, webbed handles with padded hook-and-loop closure, and over-the-shoulder strap for easy carrying.

Evacuation Stair Rescue Chairs and Devices

Model 40 Chairs—Two 5" stationary rear wheels, rear lifting handles, and 2-position front handles ease movement through cramped quarters. Features two 5-ft. quick-release restraints and locking safety latch.

EZ-Glide® Chairs—Track system carries patient down stairs and through tight spaces. Allows one person to evacuate patients up to 200 lb. and two people to evacuate patients up to 500 lb. Features include an ergonomic, 5-position extending lift bar; handles; 3 web straps; footrest; and folding design. Model with PowerTraxx® allows lifting patients up stairways without risking back injury.

Head Immobilizer—Immobilize heads of patients with suspected spinal injury. Lightweight, easy-to-clean unit has 2 plastic-coated, closed-cell foam supports with 2 straps and large ear holes that allow medical monitoring. Universal attachment base secures to any backboard.

Extrication Device—Helps minimize the risk of further injury during extrication from confined spaces. Wraparound design provides horizontal flexibility and vertical rigidity. Includes a wraparound vest, neck roll, color-coded body straps, 2 head straps, and carrying case. Made of vinyl-coated nylon with built-in handles.

EVAC+CHAIR

Evacuation Board, Mat, and Sheet

Designed to help one or more people slide a mobility-impaired individual to safety in an emergency.

Evacuation Board and Mat—Hook-and-loop straps secure the person in place and a pillow reduces head movement for safe transport. To protect against hitting steps, door frames, and corners, the board has fold-up sides and the mat's padded sheet wraps around the body.

Patient Evacuation Sheet—Adjustable wraparound straps cocoon the patient to the mattress. Long straps at head and foot help control transfer to the floor and out, even down stairs. Sheet installs between the mattress and bed, ready for immediate use.

MEGAMOVER portable transport unit

Portable Transport Units

Transport Units—Compact and cost-effective units transport, transfer, or rescue patients from areas not accessible to stretchers. Feature nonwoven, latex-free construction with 14 attached handles for ergonomic lifting. Nos. 45EU90 and 45EU91 have PowerGrip™ handles for added comfort.

Transport Chairs—Constructed of strong, nonwoven material with 8 reinforced-nylon, yellow handles for ergonomic lifting. Rolls up to the size of a water bottle for easy storage. No. 45EU92 has PowerGrip™ handles for added comfort.

Barrier Sheet—Barrier sheet can be used as a durable transfer device or as a blanket for warmth. Nonwoven/poly construction acts as a fluid barrier to prevent any cross contamination.

Stretchers

Basket Stretchers—Use for rescue from confined spaces and elevated locations with poor access.

No. 2LBB8 has a flat carbon-steel patient support down its length. Replaceable netting adds support.

No. 2LBB9 has a fully internal stainless steel frame, HDPE outer shell, and single-plane sliding surface on the bottom. Replaceable closed-cell foam pad.

Nos. 2LBB7 and 46P351 feature an HDPE shell supported by a heavy-duty aluminum frame. Equipped with four 2-pc., quick-release restraints and a replaceable closed-cell foam mattress. No. 46P351 separates in half for easy storage and backpack transport to remote rescue locations.

No. 46P352 nonmetallic stretcher can be safely used in areas with electrical hazards and combustible atmospheres. Plastic-coated aluminum frame, plastic rivets, and wooden runners.

Scoop Stretchers—Eliminate the need for log-roll maneuvers to significantly decrease movement of the cervical spine. Adjusts to patient height.

All-aluminum No. 46P344 with open-center design permits patient to be X-rayed. Narrow foot-end frame for use in confined areas. Folds for storage.

No. 3CRF1 features X-ray translucent polymer construction and 2-pc. 5-ft. polypropylene webbing with quick-release buckles.

Pole Stretcher—Lightweight, heavy-duty aluminum frame folds lengthwise and crosswise for compact storage. Vinyl-coated nylon cover resists stains, blood, and bodily fluids. Nonslip handgrips.

Evacu-Aid™ Stretcher—Compact and lightweight stretcher features nonslip surface with reinforced stress points. Designed with 8 handgrips for safe patient transport by 2 to 4 people.

Traverse Rescue Stretcher—Use for horizontal or vertical casualty evacuations. Lightweight, compact design is ideal for high angle, confined space, and helicopter rescue operations. Webbing carry handles can be attachment points for a lifting bridle.

Emergency Stretcher—Flat stretcher for transferring patients who have no suspected spinal injury. Lightweight aluminum frame, bacteriostatic vinyl-coated nylon cover, folding 4" wheels, and posts.

Combination Stretcher Chair—Wheeled chair, stair chair, and flat stretcher. Aluminum frame, vinyl-coated nylon cover, restraints, and folding head- and foot-end posts and wheels.

Tactical Litter and Backboards

Tactical Litter—Features heavy-duty aluminum frame and hinges; includes 2 restraints. Durable polypropylene mesh cover allows blood, bodily fluids, and hazardous chemicals to flow freely away from patients. Mil. Spec. MIL-L-49511B.

Disaster Litter—Lightweight litter is ideal for use by EMS services, fire departments, law enforcement, or hospitals for mass casualty response.

Backboard—Lightweight, buoyant, seamless HDPE construction features 2 handles at a tapered end to help stabilize transport. Smooth head area allows attachment of all head immobilizer devices.

Millennia Backboard—Lightweight, contoured shape with easy-slide offers smooth patient movement in any space. Easy-to-clean plastic shell with foam-filled construction provides X-ray translucency.

Iron Duck Spineboards—Durable HDPE shell over nontoxic foam for durability and easy cleaning.

No. 52WU19 spineboard is X-ray and CT scan translucent and MRI scan compatible. Won't compromise CPR efforts or aggravate cervical spine injuries. No. 52WU23 folding spineboard is ideal for tight spaces. Stainless steel mechanical pivot and internal aluminum runners.

Disposable Backboards—Durable, virgin fiber corrugated backboards are coated to prevent absorption of rain or fluids. Require minimal storage space and are quickly and easily assembled.

Assembled Backboard Restraint Strap Kit—1-pc. restraints feature 2" nylon/polyester webbing with quick-release chrome-plated, automotive-type metal buckle. Includes a storage pouch.

Quick Restraint System—10-point, 6-strap system has color-coded nylon straps with hook-and-loop closures. Fits sizes from child to adult. Use with Backboard No. 2LBB5 and Scoop Stretchers Nos. 46P344 and 3CRF1, sold separately, this page.

KAMP-RITE

Cots and Tent

For protection against inclement weather, select items include a waterproof rain fly with access door and air vents.

Folding Cots—Compact cots are easily stored and transported. Nos. 3PAH3 and 29TM93 have a mildew-resistant, washable polyester cover. No. 19TU18 has scissor-action folding legs reinforced with hinges, supports, and 2 snap-on end braces; includes a carrying bag. No. 13V987 features a drop-down storage pocket on each side that double as handles. No. 36UV16 unfolds for quick 1-person setup; includes carrying bag. No. 4VNG5 has fully adjustable head- and footrests for comfort and patient restraint straps.

Tent Cots and Gear Storage Bag—Heavy-duty, powder-coat construction. Each includes a rain fly. No. 4VNG2 includes wheeled roller bag. Gear Storage Bag clips on the framework of Tent Cots to provide additional storage.

IPS Tent—Use as traditional tent or place directly on cot. "No-See-Um" insect mesh. Carry bag for storage and transport.
